Recent Advances in Natural Language Processing V Nicolas Nicolov,Galia Angelova,Ruslan Mitkov,2009-10-22 This volume brings together revised versions of a selection of papers presented at the Sixth International Conference on "Recent Advances in Natural Language Processing" (RANLP) held in Borovets, Bulgaria, 27–29 September 2007. These papers cover a wide variety of Natural Language Processing (NLP) topics: ontologies, named entity extraction, translation and transliteration, morphology (derivational and inflectional), part-of-speech tagging, parsing (incremental processing, dependency parsing), semantic role labeling, word sense disambiguation, temporal representations, inference and metaphor, semantic similarity, coreference resolution, clustering (topic modeling, topic tracking), summarization, cross-lingual retrieval, lexical and syntactic resources, multi-modal processing. The aim of this volume is to present new results in NLP based on modern theories and methodologies, making it of interest to researchers in NLP and, more specifically, to those who work in Computational Linguistics, Corpus Linguistics, and Machine Translation.

Adrenergic Receptor Protocols Curtis A. Machida,2008-02-03 Adrenergic receptors are important modulators in the sympathetic c- trol of various metabolic processes in the central and peripheral nervous s- tems. These receptors are localized at multiple sites throughout the central nervous system (CNS) and serve as important regulators of CNS-mediated behavior and neural functions, including mood, memory, neuroendocrine c- trol, and stimulation of autonomic function. Adrenergic Receptor Protocols consists of 35 chapters dealing with va- ous aspects of adrenergic receptor analyses, including the use of genetic, RNA, protein expression, transactivator, second messenger, immunocytochemical, electrophysiological, transgenic, and in situ hybridization approaches. This volume details the use of various methods to examine the adrenergic receptor system, using aspects of the genetic flow of information as a guide (DNA? RNA ? transactivator ? protein expression ? second messenger analyses ? cellular analyses ? transgenic whole animal approaches). Adrenergic Receptor Protocols displays step-by-step methods for s- cessful replication of experimental procedures, and would be useful for both experienced investigators and newcomers in the field, including those beg- ning graduate study or undergoing postdoctoral training. The Notes section contained in each chapter provides valuable troubleshooting guides to help develop working protocols for your laboratory. With Adrenergic Receptor Protocols, it has been my intent to develop a comprehensive collection of modern molecular methods for analyzing adrenergic receptors. I would like to thank the many chapter authors for their contributions.

MPLS in the SDN Era Antonio Sanchez Monge,Krzysztof Grzegorz Szarkowicz,2015-12-07 How can you make multivendor services work smoothly on today's complex networks? This practical book shows you how to deploy a large portfolio of multivendor Multiprotocol Label Switching (MPLS) services on networks, down to the configuration level. You'll learn where Juniper Network's Junos, Cisco's IOS XR, and OpenContrail, interoperate and where they don't. Two network and cloud professionals from Juniper describe how MPLS technologies and applications have rapidly evolved through services and architectures such as Ethernet VPNs, Network Function Virtualization, Seamless MPLS, Egress

Protection, External Path Computation, and more. This book contains no vendor bias or corporate messages, just solid information on how to get a multivendor network to function optimally. Topics include: Introduction to MPLS and Software-Defined Networking (SDN) The four MPLS Builders (LDP, RSVP-TE, IGP SPRING, and BGP) Layer 3 unicast and multicast MPLS services, Layer 2 VPN, VPLS, and Ethernet VPN Inter-domain MPLS Services Underlay and overlay architectures: data centers, NVO, and NFV Centralized Traffic Engineering and TE bandwidth reservations Scaling MPLS transport and services Transit fast restoration based on the IGP and RSVP-TE FIB optimization and egress service for fast restoration

Math Tools, Grades 3–12 Harvey F. Silver,John R. Brunsting,Terry Walsh,Edward J. Thomas,2012-08-29 Teach to the Common Core, differentiate instruction, and keep students engaged—all at the same time! With new Common Core–aligned tools and strategies, this second edition of a bestseller is an all-in-one math classroom management resource. Covering everything from lesson design to math-specific learning styles, the book's 60+ tools will enable you to: Work in smarter, more efficient ways with all of your students, no matter the class size or make up Create standards-based lesson plans, tests, and formative assessments Reach every learner regardless of understanding level or learning style Integrate technology into class time for more engaging math lessons

Algorithmic Learning Theory Yoav Freund,2008-09-29 This book constitutes the refereed proceedings of the 19th International Conference on Algorithmic Learning Theory, ALT 2008, held in Budapest, Hungary, in October 2008, co-located with the 11th International Conference on Discovery Science, DS 2008. The 31 revised full papers presented together with the abstracts of 5 invited talks were carefully reviewed and selected from 46 submissions. The papers are dedicated to the theoretical foundations of machine learning; they address topics such as statistical learning; probability and stochastic processes; boosting and experts; active and query learning; and inductive inference.

The Internet and Its Protocols Adrian Farrel,2004-06-02 The view presented in The Internet and Its Protocols is at once broad and deep. It covers all the common protocols and how they combine to create the Internet in its totality. More importantly, it describes each one completely, examining the requirements it addresses and the exact means by which it does its job. These descriptions include message flows, full message formats, and message exchanges for normal and error operation. They are supported by numerous diagrams and tables. This book's comparative approach gives you something more valuable: insight into the decisions you face as you build and maintain your network, network device, or network application. Author Adrian Farrel's experience and advice will dramatically smooth your path as you work to offer improved performance and a wider range of services. * Provides comprehensive, in-depth, and comparative coverage of the Internet Protocol (both IPv4 and IPv6) and its many related technologies. * Written for developers, operators, and managers, and designed to be used as both an

overview and a reference. * Discusses major concepts in traffic engineering, providing detailed looks at MPLS and GMPLS and how they control both IP and non-IP traffic. * Covers protocols for governing routing and transport, and for managing switches, components, and the network as a whole, along with higher-level application protocols. * Offers thoughtful guidance on choosing between protocols, selecting features within a protocol, and other service- and performance-related decisions.

  Regulators of G Protein Signaling ,2004-11-25 Regulators of G Protein Signaling, Part A is an in-depth treatment of G-Protein Signaling, and will cover general methods of analysis of RGS protein analysis, including Expression and post-translational modification, Assays of GAP activity and allosteric control, Electrophysiological methods and RGS-insensitive Ga subunits, Mouse models of RGS protein action, Methods of RGS protein inhibition, and G-protein regulators of model organisms.   Craft Beverages and Tourism, Volume 2 Susan L. Slocum,Carol Kline,Christina T. Cavaliere,2017-07-31 This volume applies a mix of qualitative and quantitative research and case studies to analyze the role that the craft beverage industry plays within society at large. It targets important themes such as environmental conservation and social responsibility, as well as the psychology of the craft beer drinker and their impact on tourism marketing. This volume advances marketing, hospitality, and leisure studies research for academics, industry experts, and emerging entrepreneurs.

  Text, Speech and Dialogue Petr Sojka,Ivan Kopecek,Karel Pala,2006-09-08 Here are the refereed proceedings of the 9th International Conference on Text, Speech and Dialogue, TSD 2006. The book presents 87 revised full papers together with 2 invited papers reviewing state-of-the-art research in the field of natural language processing. Coverage ranges from theoretical and methodological issues to applications with special focus on corpora, texts and transcription, speech analysis, recognition and synthesis, as well as their intertwining within NL dialogue systems.

  The Philosophical Writings of Descartes: René Descartes,1985-06-20 These two volumes provide a translation of the philosophical works of Descartes, based on the best available Latin and French texts. They are intended to replace the only reasonably comprehensive selection of his works in English, by Haldane and Ross, first published in 1911. All the works included in that edition are translated here, together with a number of additional texts crucial for an understanding of Cartesian philosophy, including important material from Descartes' scientific

writings. The result should meet the widespread demand for an accurate and authoritative edition of Descartes' philosophical writings in clear and readable modern English.

Educational and Psychological Measurement W. Holmes Finch,Brian F. French,2018-10-12 This new text provides the most current coverage of measurement and psychometrics in a single volume. Authors W. Holmes Finch and Brian F. French first review the basics of psychometrics and measurement, before moving on to more complex topics such as equating and scaling, item response theory, standard setting, and computer adaptive testing. Also included are discussions of cutting-edge topics utilized by practitioners in the field, such as automated test development, game-based assessment, and automated test scoring. This book is ideal for use as a primary text for graduate-level psychometrics/measurement courses, as well as for researchers in need of a broad resource for understanding test theory. Features: How it Works and Psychometrics in the Real World boxes break down important concepts through worked examples, and show how theory can be applied to practice. End-of-chapter exercises allow students to test their comprehension of the material, while suggested readings and website links provide resources for further investigation. A collection of free online resources include the full output from R, SPSS, and Excel for each of the analyses conducted in the book, as well as additional exercises, sample homework assignments, answer keys, and PowerPoint lecture slides.

The Complete Book of Dreams Pamela Ball,2017-07-11 The most authoritative and comprehensive book available on dreams and dreaming. Enter the fascinating world of dreams, their mysteries, their meanings: to dream of a bird flying freely represents hopes and aspirations; to dream of winter means a time in life that is not fruitful; to be visited by someone in a dream can mean that there is information, warmth, or love available; to be searching in a dream is an attempt to find an answer to a problem. These are just a few of the 10,000 dream images and interpretations contained in this volume, a book that can bring insight, clarification, and guidance.

Descartes and the Puzzle of Sensory Representation Raffaella De Rosa,2010-01-07 While much has been written on Descartes' theory of mind and ideas, no systematic study of his theory of sensory representation and misrepresentation is currently available in the literature. Descartes and the Puzzle of Sensory Misrepresentation is an ambitious attempt to fill this gap. It argues against the established view that Cartesian sensations are mere qualia by defending the view that they are representational; it offers a descriptivist-causal account of their representationality that is critical of, and differs from, all other extant accounts (such as, for example, causal, teleofunctional and purely internalist accounts); and it has the advantage of providing an adequate solution to the problem of sensory misrepresentation within Descartes' internalist theory of ideas. In sum, the book offers a novel account of the representationality of Cartesian sensations; provides a panoramic overview, and critical assessment, of the scholarly literature on this issue; and places Descartes' theory of sensation in the central position it deserves among the philosophical and scientific investigations of the workings of the human mind.

Structural, Syntactic, and Statistical Pattern Recognition Antonio Robles-Kelly,Marco Loog,Battista

Biggio,Francisco Escolano,Richard Wilson,2016-11-04 This book constitutes the proceedings of the Joint IAPR International Workshop on Structural Syntactic, and Statistical Pattern Recognition, S+SSPR 2016, consisting of the International Workshop on Structural and Syntactic Pattern Recognition SSPR, and the International Workshop on Statistical Techniques in Pattern Recognition, SPR. The 51 full papers presented were carefully reviewed and selected from 68 submissions. They are organized in the following topical sections: dimensionality reduction, manifold learning and embedding methods; dissimilarity representations; graph-theoretic methods; model selection, classification and clustering; semi and fully supervised learning methods; shape analysis; spatio-temporal pattern recognition; structural matching; text and document analysis.

Visual Database Systems 3 Stefano Spaccapietra,Ramesh Jain,2013-06-05 Both the way we look at data, through a DBMS, and the nature of data we ask a DBMS to manage have drastically evolved over the last decade, moving from text to images (and to sound to a lesser extent). Visual representations are used extensively within new user interfaces. Powerful visual approaches are being experimented for data manipulation, including the investigation of three dimensional display techniques. Similarly, sophisticated data visualization techniques are dramatically improving the understanding of the information extracted from a database. On the other hand, more and more applications use images as basic data or to enhance the quality and richness of data manipulation services. Image management has opened a wide area of new research topics in image understanding and analysis. The IFIP 2.6 Working Group on Databases strongly believes that a significant mutual enrichment is possible by confronting ideas, concepts and techniques supporting the work of researcher and practitioners in the two areas of visual interfaces to DBMS and DBMS management of visual data. For this reason, IFIP 2.6 has launched a series of conferences on Visual Database Systems. The first one has been held in Tokyo, 1989. VDB-2 was held in Budapest, 1991. This conference is the third in the series. As the preceding editions, the conference addresses researchers and practitioners active or interested in user interfaces, human-computer communication, knowledge representation and management, image processing and understanding, multimedia database techniques and computer vision.
