Digital Innovation and the Future of Work Hans Schaffers,Matti Vartiainen,Jacques Bus,2022-09-01 The concept of digitalization captures the widespread adoption of digital technologies in our lives, in the structure and functioning of organizations and in the transformation of our economy and society. Digital technologies for data processing and communication underly high-impact innovations including the Internet of Things, wireless multimedia, artificial intelligence, big data, enterprise platforms, social networks and blockchain. These digital innovations not only bring new opportunities for prosperity and wellbeing but also affect our behaviors, activities, and daily lives. They enable and shape new forms of production and new working practices in sectors such as manufacturing, healthcare, logistics and supply chains, energy, and public and business services. Digital innovations are not purely technological but form part of comprehensive systemic innovations of a sociotechnical and networked nature, requiring the alignment of technology, processes, organizations, and humans. Examples are platform-based work, customer driven value creating networks, and urban public service systems. Building on widespread networking, algorithmic decisions and sharing of personal data, these innovations raise intensive societal and ethical debates regarding key issues such as data sovereignty and privacy intrusion, business models based on data surveillance and negative externalization, quality of work and jobs, and market dominance versus regulation. In this context, this book focuses on the implications of digitalization for the domain of work. The book studies the changing nature of work as well as new forms of digitally enabled organizations, work practices and cooperation. The book sheds light on the technological, economic, and political forces shaping the new world of work and on the prospects for human-centric and responsible innovations.

Working with Anger and Young People Nick Luxmoore,2006-07-15 Understanding the roots of anger and encouraging appropriate and acceptable ways of expressing this are essential skills for anyone working with young people. Working with Anger and Young People warns against 'quick fix' solutions to dealing with anger, and draws on the author's experiences of youth counselling and training workshops to propose helpful interventions for addressing anger effectively and moving on from it. From attachment anxieties and feelings of powerlessness, to frustration at difficult family relations, Nick Luxmoore considers the common reasons for young people's anger during this difficult stage of their development. Through accounts of his work with a range of young people, he offers tried-and-tested exercises and talking points to help work through common counterproductive responses to anger such as antisocial behaviour and physical or verbal violence. Crucially, he also recognises the needs of those working with these young people with anger problems and provides advice on working safely, maintaining control and achieving job satisfaction. This sensitive, accessible book will be an informative and engaging resource for anyone working with young people with anger issues.

Innovating Science Teacher Education Mansoor Niaz,2010-09-13 How teachers view the nature of scientific knowledge is crucial to their understanding of science content and how it can be taught. This book presents an overview of the dynamics of scientific progress and its relationship to the history and philosophy of science, and then explores their methodological and educational implications and develops innovative strategies based on actual classroom practice for teaching topics such the nature of science, conceptual change, constructivism, qualitative-quantitative research, and the role of controversies, presuppositions, speculations, hypotheses, and predictions. Field-tested in science education courses, this book is designed to involve readers in critically thinking about the history and philosophy of science and to engage science educators in learning how to progressively introduce various aspects of 'science-in-the-making' in their classrooms, to promote discussions highlighting controversial historical episodes included in the science curriculum, and to expose their students to the controversies and encourage them to support, defend or critique the different interpretations. Innovating Science Teacher Education offers guidelines to go beyond traditional textbooks, curricula, and teaching methods and innovate with respect to science teacher education and classroom teaching.

Escape Routes: Contemporary Perspectives on Life After Punishment Stephen Farrall,Richard Sparks,Shadd Maruna,Mike Hough,2010-12-15 Escape Routes: Contemporary Perspectives on Life After Punishment addresses the reasons why people stop offending, and the processes by which they are rehabilitated or resettled back into the community. Engaging with, and building upon, renewed criminological interest in this area, Escape Routes nevertheless broadens and enlivens the current debate. First, its scope goes beyond a narrowly-defined notion of crime and includes, for example, essays on religious redemption, the lives of ex-war criminals, and the relationship between ethnicity and desistance from crime. Second, contributors to this volume draw upon a number of areas of contemporary research, including urban studies, philosophy, history, religious studies, and ethics, as well as criminology. Examining new theoretical work in the study of desistance and exploring the experiences of a number of groups whose experiences of life after punishment do not usually attract much attention, Escape Routes provides new insights about the processes associated with reform, resettlement and forgiveness. Intended to drive our understanding of life after punishment forward, its rich array of theoretical and substantive papers will be of considerable interest to criminologists, lawyers, and sociologists.

Social and Civic Competencies Against Radicalization in Schools Marcin Sklad,Mona Irrmischer,Eri Park,Inge Versteegt,Jantine Wignand,2021-10-25 This book discusses a range of interventions that can be implemented in schools to prevent radicalization and violent extremism. The book advocates for primary prevention by strengthening social and citizenship competences of youth. It combines perspectives of citizenship education, school psychology, positive psychology, peace psychology and social-emotional learning to highlight the spectrum of approaches that practitioners can consider adopting or advocating for. Mechanisms of radicalization the approaches may relate to are also discussed making it useful not only for practitioners and policy makers developing and implementing preventive interventions at schools, but also for academics studying radicalization and students of education, youth work and educational psychology. The authors discuss relevant concepts such as identity development, perspective taking, political self-efficacy, citizenship

competences and youth empowerment, mindfulness and self-regulation.

Innovative and Agile Contracting for Digital Transformation and Industry 4.0 Shalan, Mohammad Ali,Algarni, Mohammed Ayedh,2020-12-18 Digital transformation is reshaping the business arena as new, successful digital business models are increasing agility and presenting better ways to handle business than the traditional alternatives. Industry 4.0 affects everything in our daily lives and is blurring the line between the physical, the biological, and the digital. This created an environment where technology and humans are so closely integrated that it is impacting every activity within the organizations. Specifically, contracting processes and procedures are challenged to align with the new business dynamics as traditional contracts are no longer fitting today's agile and continuously changing environments. Businesses are required to facilitate faster, more secure, soft, and real-time transactions while protecting stakeholders' rights and obligations. This includes agile contracts which are dynamically handling scope changes, smart contracts that can automate rule-based functions, friction-less contracts that can facilitate different activities, and opportunity contracts that looks toward the future. Innovative and Agile Contracting for Digital Transformation and Industry 4.0 analyzes the consequences, benefits, and possible scenarios of contract transformation under the pressure of new technologies and business dynamics in modern times. The chapters cover the problems, issues, complications, strategies, governance, and risks related to the development and enforcement of digital transformation contracting practices. While highlighting topics in the area of digital transformation and contracting such as artificial intelligence, digital business, emerging technologies, and blockchain, this book is ideally intended for business, engineering, and technology practitioners and policy makers, along with practitioners, stakeholders, researchers, academicians, and students interested in understanding the scope, complexity, and importance of innovative contracts and agile contracting.

Developing Focus Group Research Rosaline Barbour,Jenny Kitzinger,1998-12-29 This book critically examines the potential of, and suggests ways forward in, harnessing a versatile and powerful method of research - focus groups. The book challenges some of the emerging orthodoxies and presents accessible, insightful and reflective discussions about the issues around focus group work. The contributors, an impressive group of experienced researchers from a range of disciplines and traditions, discuss different ways of designing, conducting and analyzing focus group research. They examine sampling strategies; the implications of combining focus groups with other methods; accessing views of `minority' groups; their contribution to participatory or feminist research; use of software packages; discourse analysis; and the epistemological and political underpinnings of research.
