F-22 Model Glenn Hoover,2018-05-13 This book contains detailed instructions on building the F-22 Raptor 1/48 scale model aircraft from Hasegawa. A spiral bound version is available at glennhoovermodels.com You really need this book to successfully build this model. This model has over 600 kit and aftermarket parts with hundreds of decals. Can any sane modeler keep track of this build? The likelihood of you missing a part or doing a step out of order where you can't go back and fix because it's too late are high. In addition to the kit's instructions, there are 6 aftermarket kits each with their own instruction. Can you imagine merging all of these instructions? Well, I've done that for you and more. I take the model kit instructions from Hasegawa and break them up into individual steps. I reorder the steps so that the small pieces (antennas, etc.) are assembled last which reduces the risk of damage when building the model. The steps are organized to insert the paint and decal steps in the best spot. I also incorporate Eduard's Photo Etch sets 48619, 48669, 49514, and 49534 along with Hasegawa's QG39 PE set and Wolfpack's Nozzle Set in with Hasegawa's instructions. As most modelers know, it can be tricky to go back and forth between the model kit instructions and the aftermarket kit instructions. I took out the guess work and did that for you. The aftermarket steps are color coded making them easy to skip if you just have the basic model. This book provides a little history of the Raptor, photos of the model kit contents including the aftermarket kits, a detailed list of tools that I used to build this model, along with a list of paints. The actual instruction section contains 1208 steps and 140 plus figures over 194 pages that tell you what to dry fit, glue, and/or paint for each individual piece. Each step instruction shows the source (i.e., either Hasegawa or aftermarket instruction) along with a block to mark that you completed the step. The major instruction sequence for this model is 1. Cockpit 2. Main Weapon Bay 3. Sub-weapon Bay 4. Nose Landing Gear Wheel Well 5. Main Landing Gear Wheel Well 6. Engine Exhausts 7. Engine Intake 8. Join Upper & Lower Fuselage Sections 9. Flaps and Stabilizer Dry Fit 10. Paint Prep with Canopy 11. Camo Paint 12. Decals 13. Exhaust Nozzles 14. Landing Gear 15. Weapons Bay Doors 16. Canopy 17. Pilot 18. Engine Covers 19. Ladder I provide an index of the individual sprue parts that show where in the book the part is mentioned. This index was a great way to make sure that no pieces were overlooked. Finally, there are several pages of in-process photos with assembly tips and the final photos of my build for reference. This book is a great checklist to make your build go smoothly. Of course, you can feel free to use different tools, paint, weathering, etc. or even add your own diorama. I did a lot of research and didn't see anything this detailed about a model build. Most articles or videos concentrate on parts of their build or just give a summary review. I wanted to go down to the piece level and take you thru the whole build. Anyway, I hope you find this book useful. See a 16-page sample along with photos of finished models and other books at glennhoovermodels.com.

Crewel Creatures H. Blomkamp,2018 Beautiful bird and animal designs, inspired by the African world, in crewel and Jacobean embroidery. Following the success of Crewel Intentions and Crewel Twists, which introduced embroiderers to using needle-lace and loom-weaving techniques, comes Crewel Creatures, the third title in this series by renowned embroiderer Hazel Blomkamp. Animals and birds are popular subjects in crewel embroidery, and here Hazel introduces needleworkers to the beautiful, exotic creatures found in the African wild. Following the Jacobean embroidery style for which Hazel is well known, and incorporating the subtle influence of the fractal designs found in zentangle art, Hazel brings beads and other three-dimensional elements into her designs, capturing the stunning and colourful art that is traditionally associated with Africa. Those new to Hazel's work will find a useful guide to the essential crewel stitches, needle-lace and needle-weaving techniques in an easy-to-follow how-to section and stitch gallery, and all embroiderers will be impressed by the wealth of design ideas and inspiration this book has to offer. With every project, step-by-step instructions and gorgeous photographs are included, along with a template of the design. All the projects are stitched and embellished on natural coloured linen, making them not only perfect for framing for display but also wonderfully economical for embroiderers to work on.

The Fourth Industrial Revolution Klaus Schwab,2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.
