A Town Called Solace Mary Lawson,2021-02-16 NATIONAL BESTSELLER LONGLISTED FOR THE 2021 BOOKER PRIZE NAMED A BEST BOOK OF THE YEAR BY THE GLOBE AND MAIL, CBC BOOKS AND THE DAILY TELEGRAPH I've been telling everyone I know about Mary Lawson . . . Each of her novels is just a marvel —Anne Tyler New York Times bestselling author Mary Lawson, acclaimed for digging into the wilderness of the human heart, is back after almost a decade with a fresh and timely novel that is different in subject but just as emotional and atmospheric as her beloved earlier work. *A Town Called Solace*, the brilliant and emotionally radiant new novel from Mary Lawson, her first in nearly a decade, opens on a family in crisis. Sixteen-year-old Rose is missing. Angry and rebellious, she had a row with her mother, stormed out of the house and simply disappeared. Left behind is seven-year-old Clara, Rose's adoring little sister. Isolated by her parents' efforts to protect her from the truth, Clara is bewildered and distraught. Her sole comfort is Moses, the cat next door, whom she is looking after for his elderly owner, Mrs. Orchard, who went into hospital weeks ago and has still not returned. Enter Liam Kane, mid-thirties, newly divorced, newly unemployed, newly arrived in this small northern town, who moves into Mrs. Orchard's house—where, in Clara's view, he emphatically does not belong. Within a matter of hours he receives a visit from the police. It seems he is suspected of a crime. At the end of her life, Elizabeth Orchard is also thinking about a crime, one committed thirty years previously that had tragic consequences for two families, and in particular for one small child. She desperately wants to make amends before she dies. Told through three distinct, compelling points of view, the novel cuts back and forth among these unforgettable characters to uncover the layers of grief, remorse, and love that connect them. *A Town Called Solace* is a masterful, suspenseful, darkly funny and deeply humane novel by one of our great storytellers.

Désiré Collen - Biotech Pioneer Paul Huybrechts,Frieda Van Wijck,2020-08-27 Désiré Collen, Biotech Pioneer relates the fascinating story of scientific discovery in a time when biotechnology was not yet a science. Although the cultivation and cross fertilization of plants were, strictly speaking, biotechnological techniques, modern biotechnology dates from the early 1970s, when pioneers such as biochemist Herbert Boyer from the university of California managed to transfer genetic material into a bacterium. Together with venture capitalist Robert Swanson, Boyer set up Genentech, one of the first genetic engineering companies. Just a few years later, on the other side of the Atlantic, in Leuven, Désiré Collen discovered t-PA, the enzyme responsible for fibrinolysis, or the dissolving of blood clots. Clogged arteries were then still one of the major causes of death. The ensuing cooperation between Collen and Genentech was the beginning of a long-lasting success story, from which not only Collen but also scientific research and the University of Leuven benefitted greatly for many years. According to a Reuters ranking, KU Leuven has been, from 2016 onwards, the most innovative university in Europe. Flanders and Belgium served as the cradle of several highly successful biotech companies. t-PA was a relatively expensive medicine, and Collen went on to develop a much cheaper clot-dissolving remedy to benefit patients in less affluent countries. He failed, however, to find the necessary finances for Phase 3 trials. Meanwhile, he had set up ThromboGenics, a company which later specialized in ophthalmology. Collen continued to stimulate and finance research in other fields, such as the cardiovascular research of Peter Carmeliet. In 2013 he left ThromboGenics, following a difference in views on the company's focus, and in 2015 he set up Fund+, a biotech-oriented investment firm. Fund+ has meanwhile acquired a prominent place among European biotech investment funds and has scored some astonishing early successes. In June 2020, Fund+ had 13 companies in its portfolio, with several more waiting to come on board.

Star Power Alain Bécoulet,2022-03-01 A concise and accessible explanation of the science and technology behind the domestication of nuclear fusion energy. Nuclear fusion research tells us that the Sun uses one gram of hydrogen to make as much energy as can be obtained by burning eight tons of petroleum. If nuclear fusion—the process that makes the stars shine—could be domesticated for commercial energy production, the world would gain an inexhaustible source of energy that neither depletes natural resources nor produces greenhouse gases. In *Star Power*, Alan Bécoulet offers a concise and accessible primer on fusion energy, explaining the science and technology of nuclear fusion and describing the massive international scientific effort to achieve commercially viable fusion energy. Bécoulet draws on his work as Head of Engineering at ITER (International Thermonuclear Experimental Reactor) to explain how scientists are trying to “put the sun in a box.” He surveys the history of nuclear power, beginning with post-World War II efforts to use atoms for peaceful purposes and describes how energy is derived from fusion, explaining that the essential principle of fusion is based on the capacity of nucleons (protons and neutrons) to assemble and form structures (atomic nuclei) in spite of electrical repulsion between protons, which all have a positive charge. He traces the evolution of fusion research and development, mapping the generation of electric current through fusion. The ITER project marks a giant step in the development of fusion energy, with the potential to demonstrate the feasibility of a nuclear fusion reactor. *Star Power* offers an introduction to what may be the future of energy production.

The Pilgrimage to Santiago Edwin Mullins,2001 The Long Road to Heaven, the annual pilgrimage to the Galician city of Santiago de Compostela has taken place for over a thousand years. In the great cathedral of Santiago are said to lie the bones of St. James of the Great, cousin to Christ, an original disciple and later resurrected as the legendary slayer of the Moors. From the Middle Ages onwards, this most evocative of Christian shrines has attracted pilgrims to the Spanish city from all over Europe and further afield. A network of routes, lined with statues and other symbols, leads to Santiago, but the most celebrated is that from Paris, across the Pyrenees and through the arid uplands of northern Spain.

Bringing Fusion to the U.S. Grid National Academies of Sciences Engineering and Medicine,National Academy of Engineering,Division on Earth and Life Studies,Division on Engineering and Physical Sciences,Nuclear and Radiation Studies Board,Board on Energy and Environmental Systems,Board on Physics and Astronomy,Committee on the Key Goals and Innovation Needed for a U S Fusion Pilot Plant,2021-11-17 Fusion energy offers the prospect of addressing the nation's energy needs and contributing to the transition to a low-carbon emission electrical generation infrastructure. Technology and research results from U.S. investments in the major fusion burning plasma experiment known as ITER, coupled with a strong foundation of research funded by the Department of Energy (DOE), position the United States to begin planning for its first fusion pilot plant. Strong interest from the private sector is an additional motivating factor, as the process of decarbonizing and modernizing the nation's electric infrastructure accelerates and companies seek to lead the way. At the request of DOE, *Bringing Fusion to the U.S. Grid* builds upon the work of the 2019 report *Final Report of the Committee on a Strategic Plan for U.S. Burning Plasma Research* to identify the key goals and innovations - independent of confinement concept - that are needed to support the development of a U.S. fusion pilot plant that can serve as a model for producing electricity at the lowest possible capital cost.

The Soul of Enterprise Ronald J Baker,Ed Kless,2015-02-26 The world's economy has been transformed from a twentieth-century materials-based economy to the Age of the Knowledge-Based Economy - and the currency of this realm is ideas, imagination, creativity, and knowledge. According The World Bank, 80% of the developed world's wealth now resides in human capital. Perhaps President Ronald Reagan said it best in his address to Moscow State University on May 31, 1988: Like a chrysalis, we're emerging from the economy of the Industrial Revolution - an economy confined and limited by the Earth's physical resources - into, as one economist titled his book, the economy in mind, in which there are no bounds on human imagination and the freedom to create is the most precious natural resource. Written by Ronald Baker and Ed Kless, hosts of The Soul of Enterprise: Business in the Knowledge Economy, the popular radio show on Voice America's Business Channel, The Soul of Enterprise: Dialogues on Business in the Knowledge Economy sounds the clarion call that organizations can no longer ignore this seismic shift that has occurred in the economy since 1959. The Soul of Enterprise introduces the three components of Intellectual Capital - human capital, social capital, and structural capital - and how to leverage them to create wealth in today's economy, by revealing: The physical fallacy - why wealth no longer consists of tangible things, but of ideas, imagination and knowledge from human minds The best learning tool ever invented: After Action Reviews Why Frederick Taylor and the Scientific Management movement was a fraud and the wrong focus for knowledge workers The fact that effectiveness always and everywhere trumps efficiency The First Law of Pricing: All value is subjective The Second Law of Pricing: All prices are contextual The Morality of Markets: Doing well and doing good Why your organization - and you - need to be driven by a higher purpose than profit The Soul of Enterprise will inspire and challenge readers to unlock the enormous financial and competitive power hidden in the intellectual capital of their organizations and knowledge workers.
