Expanding Boundaries: Systems Thinking in the Built Environment Guillaume Habert,Arno Schlueter,2016-08-15 Consuming over 40% of total primary energy, the built environment is in the centre of worldwide strategies and measures towards a more sustainable future. To provide resilient solutions, a simple optimisation of individual technologies will not be sufficient. In contrast, whole system thinking reveals and exploits connections between parts. Each system interacts with others on different scales (materials, components, buildings, cities) and domains (ecology, economy and social). Whole-system designers optimize the performance of such systems by understanding interconnections and identifying synergies. The more complete the design integration, the better the result. In this book, the reader will find the proceedings of the 2016 Sustainable Built Environment (SBE) Regional Conference in Zurich. Papers have been written by academics and practitioners from all continents to bring forth the latest understanding on systems thinking in the built environment.

Street Gang Michael Davis,2008-12-26 Now an acclaimed documentary from Screen Media, the New York Times bestselling account of the story behind one of the most influential, durable, and beloved shows in the history of television: Sesame Street. “Davis tracks down every Sesame anecdote and every Sesame personality in his book . . . Finally, we get to touch Big Bird's feathers.” —The New York Times Book Review Sesame Street is the longest-running-and arguably most beloved- children's television program ever created. Today, it reaches some six million preschoolers weekly in the United States and countless others in 140 countries around the world. Street Gang is the compelling, comical, and inspiring story of a media masterpiece and pop-culture landmark. Television reporter and columnist Michael Davis-with the complete participation of Joan Ganz Cooney, one of the show's founders-unveils the idealistic personalities, decades of social and cultural change, stories of compassion and personal sacrifice, and miraculous efforts of writers, producers, directors, and puppeteers that together transformed an empty soundstage into the most recognizable block of real estate in television history.
