How to Build a Car Adrian Newey, 2019-03-18 'Adrian has a unique gift for understanding drivers and racing cars. He is ultra competitive but never forgets to have fun. An immensely likeable man.' Damon Hill The world's foremost designer in Formula One, Adrian Newey OBE is arguably one of Britain's greatest engineers and this is his fascinating, powerful memoir. How to Build a Car explores the story of Adrian's unrivalled 35-year career in Formula One through the prism of the cars he has designed, the drivers he has worked alongside and the races in which he's been involved. A true engineering genius, even in adolescence Adrian's thoughts naturally emerged in shape and form - he began sketching his own car designs at the age of 12 and took a welding course in his school summer holidays. From his early career in IndyCar racing and on to his unparalleled success in Formula One, we learn in comprehensive, engaging and highly entertaining detail how a car actually works. Adrian has designed for the likes of Mario Andretti, Nigel Mansell, Alain Prost, Damon Hill, David Coulthard, Mika Hakkinen, Mark Webber and Sebastian Vettel, always with a shark-like purity of purpose: to make the car go faster. And while his career has been marked by unbelievable triumphs, there have also been deep tragedies; most notably Ayrton Senna's death during his time at Williams in 1994. Beautifully illustrated with never-before-seen drawings, How to Build a Car encapsulates, through Adrian's remarkable life story, precisely what makes Formula One so thrilling - its potential for the total synchronicity of man and machine, the perfect combination of style, efficiency and speed.

Formula One: The Pursuit of Speed Maurice Hamilton, 2016-11-01 The adrenaline-fueled, high-octane world of Formula One has created some of the greatest moments in sporting history. From the intense rivalries between teams and drivers, such as Alain Prost and Ayrton Senna and 2015's Rosberg and Hamilton, to the infamous tracks that have created moments of tragedy and triumph -- F1's greatest moments read like a film script. The Cahier Archive has captured the drama from the 1950's to the present day including Lewis Hamilton's 2015 winning season. It is filled with stunning behind-the-scenes shots, from pit stops to personal moments, beautiful portraits of the drivers and atmospheric shots of the racing in action. Structured around three sections: Drivers and Rivalries, Teams and Cars, and Tragedy and Triumph of the Circuits, Formula 1: The Pursuit of Speed captures the intensity and beauty of the sport. Each section is introduced with vivid essays by F1 correspondent Maurice Hamilton, and filled with the Cahier's beautiful and resonating photographs, many unpublished giving a behind-the-scenes look at the world of F1.

Photovoltaic and Photoactive Materials Joseph M. Marshall,Doriana Dimova-Malinovska,2012-12-06 The primary objective of this NATO Advanced Study Institute (ASI) was to present an up-to-date overview of various current areas of interest in the field of photovoltaic and related photoactive materials. This is a wide-ranging subject area, of significant commercial and environmental interest, and involves major contributions from the disciplines of physics, chemistry, materials, electrical and instrumentation engineering, commercial realisation etc. Therefore, we sought to adopt an inter disciplinary approach, bringing together recognised experts in the various fields while retaining a level of treatment accessible to those active in specific individual areas of research and development. The lecture programme commenced with overviews of the present relevance and historical development of the subject area, plus an introduction to various underlying physical principles of importance to the materials and devices to be addressed in later lectures. Building upon this, the ASI then progressed to more detailed aspects of the subject area. We were also fortunately able to obtain a contribution from Thierry Langlois d'Estaintot of the European Commission Directorate, describing present and future EC support for activities in this field. In addition, poster sessions were held throughout the meeting, to allow participants to present and discuss their current activities. These were supported by what proved to be very effective feedback sessions (special thanks to Martin Stutzmann), prior to which groups of participants enthusiastically met (often in the bar) to identify and agree topics of common interest.
