Rob Steen

25 Years of the PDC World Darts Championship Steve Morgan, 2018-12-12

PDC Darts Nigel Boeg, 2021-12-20 The Second Edition of PDC Darts covers the same details as the original book with current details of tournament winners and runners up on the PDC (Professional Darts Corporation) Tour. Besides the tournament results, analysis of the tournament history is provided. Provides details of players that have thrown the perfect leg, the highest average achieved during the history of the tournament, how many times a player has appeared in the final, and how many times a player has won the tournament. Majority of tournaments were cancelled due to the Coronavirus Pandemic in 2020. To keep the tour viable, there were three Home Tour Championships staged until players could attend events in person. The book is to provide the reader and dart enthusiast more information on publications, links to web sites of dart manufacturers, County Darts Organisations, Professional Bodies and Organisations, dart stores, and Country Darts Organisations. This is not a comprehensive list but it begins the work of collating details of darts into one place instead of being scattered around the World Wide Web across many sites and publications. Disclaimer: Links to dart stores is for informational purposes. I have not been contacted by any of the stores to advertise. When I come across a dart store and the link is correct, I have included in list for dart enthusiasts. I hope you enjoy the book.

Fear and Loathing on the Oche King Adz, 2017-12-26 Anyone who's ever seen or attended the PDC World Darts Championships knows that darts is no ordinary sport. Where else would you find world-class superstars, in the midst of a championship match, cultivating tomorrow's banging hangover? Or two separate organisations, with a bitter historical rivalry, taking potshots at each other in a bid to secure players, fans and an all-important TV broadcast contract? And then there's the fans... Darts fans are

unlike any other fans in world sport. They drink the most, they wear the silliest costumes, they sing the loudest and yet they can arguably see the least live action. They feel an immense pride and ownership for the game – its theirs, and they couldn't care less about the sneers from the mainstream. Join King ADZ as he dives headfirst into this tempestuous world, meeting former legends, future stars, dominant Internationals, the owners, the referees and of course the fans. Darts may be a simple game to many, but to most it's absolute mayhem.

The Disney Animation Renaissance Mary E.

Lescher, 2022-11-22 Walt Disney Feature Animation Florida opened in Orlando at the dawn of the Disney Renaissance. As a member of the crew, Mary E. Lescher witnessed the small studio's rise and fall during a transformative era in company and movie history. Her in-depth interviews with fellow artists, administrators, and support personnel reveal the human dimension of a technological revolution: the dramatic shift from hand-drawn cel animation to the digital format that eclipsed it in less than a decade. She also traces the Florida Studio's parallel existence as a part of The Magic of Disney Animation, a living theme park attraction where Lescher and her colleagues worked in full view of Walt Disney World guests

eager to experience the magic of the company's legendary animation process. A ground-level look at the entertainment giant, The Disney Animation Renaissance profiles the people and purpose behind a little-known studio during a historic era.

Social Justice and the Arts LeeAnne Bell, 2017-07-05 This book explores the relationship between social justice practices and the Arts in Education. It argues that social justice practices, at their best, should awaken our senses and the ability to imagine alternatives that can sustain the collective work necessary to challenge entrenched patterns and practices. Chapters display a range of arts-based pedagogies for challenging oppressive practices in schools, community centers and other public sites. The examples provided illustrate both the promise and on-going challenge of enacting arts based social justice practices that can transform consciousness and organize action toward justice and social change. They show the power of arts-based pedagogies to engage the imagination, reveal invisible operations of power and privilege, provoke critical reflection, and spark alternative images and possibilities. They also show the importance of on-going critical reflection for this work with attention to both the specificities of place and the obstacles (internal and external) to maintaining a social justice stance in the face of contemporary

neoliberal discourses. This book was originally published as a special issue of Equity & Excellence in Education.

Quantum Computing in the Arts and Humanities Eduardo

Reck Miranda, 2022-05-05 Computers are essential for the functioning of our society. Despite the incredible power of existing computers, computing technology is progressing beyond today's conventional models. Quantum Computing (QC) is surfacing as a promising disruptive technology. QC is built on the principles of quantum mechanics. QC can run algorithms that are not trivial to run on digital computers. QC systems are being developed for the discovery of new materials and drugs and improved methods for encoding information for secure communication over the Internet. Unprecedented new uses for this technology are bound to emerge from ongoing research. The development of conventional digital computing technology for the arts and humanities has been progressing in tandem with the evolution of computers since the 1950s. Today, computers are absolutely essential for the arts and humanities. Therefore, future developments in QC are most likely to impact on the way in which artists will create and perform, and how research in the humanities will be conducted. This book

presents a comprehensive collection of chapters by pioneers of emerging interdisciplinary research at the crossroads of quantum computing, and the arts and humanities, from philosophy and social sciences to visual arts and music. Prof. Eduardo Reck Miranda is a composer and a professor in Computer Music at Plymouth University, UK, where he is a director of the Interdisciplinary Centre for Computer Music Research (ICCMR). His previous publications include the Springer titles Handbook of Artificial Intelligence for Music, Guide to Unconventional Computing for Music, Guide to Brain-Computer Music Interfacing and Guide to Computing for Expressive Music Performance.
