Online Arbitration Faye Fangfei Wang, 2017-08-14 Innovative initiatives for online arbitration are needed to aid in resolving cross-border commercial and consumer disputes in the EU, UK, US and China. This book provides a comparative study of online dispute resolution (ODR) systems and a model of best practices, taking into consideration the features and characteristics of various practical experiences/examples of ODR services and technological development for ODR systems and platforms. The book begins with a theoretical approach, looking into the challenges in the use of online arbitration in commercial transactions and analysing the potential adoption of technology-assisted arbitration (e.g. Basic ODR systems and Intelligent/Advanced ODR systems) in resolving certain types of international commercial and consumer disputes. It then investigates the legal obstacles to adopting ODR by examining the compatibility of technology with current legislation and regulatory development. Finally, it suggests appropriate legal and technological measures to

promote the recognition of ODR, in particular online arbitration, for cross-border commercial and consumer disputes. By exploring both the theoretical framework and the practical considerations of online arbitration, this book will be a vital reference for lawyers, policy-makers, government officials, industry professionals and academics who are involved with online arbitration.

Customization 4.0 Stephan Hankammer, Kjeld Nielsen, Frank T. Piller, Günther Schuh, Ning Wang, 2018-06-20 This proceedings volume presents the latest research from the worldwide mass customization & personalization (MCP) community bringing together new thoughts and results from various disciplines within the field. The chapters are based on papers from the MCPC 2017. The book showcases research and practice from authors that see MCP as an opportunity to extend or even revolutionize current business models. The current trends of Industrie 4.0, digital manufacturing, and the rise of smart products allow for a fresh perspective on MCP: Customization 4.0. The book places a new set of values in the centre of the debate: a world with finite resources, global population growth, and exacerbating climate change needs smart thinking to engage the most effective capabilities and resources. It discusses how Customization 4.0 fosters sustainable development and creates shared value for companies, customers, consumers, and the society as a whole. The chapters of this book are contributed by a wide range of specialists, offering cutting-edge research, as well as insightful advances in industrial practice in key areas. The MCPC 2017 has a strong focus on real life MCP applications, and this proceedings volume reflects this. MCP strategies aim to profit from the fact that people are different. Their objective is to turn customer heterogeneities into opportunities, hence addressing “long tail” business models. The objective of MCP is to provide goods and services that best serve individual customers’ needs with near mass production efficiency. This proceedings volume highlights the interdisciplinary work of thought leaders, technology developers, and researchers with corporate entrepreneurs putting these strategies into practice.
