Whiskey Women Fred Minnick,2013-10-01 Shortly after graduating from University of Glasgow in 1934, Elizabeth “Bessie” Williamson began working as a temporary secretary at the Laphroaig Distillery on the Scottish island Islay. Williamson quickly found herself joining the boys in the tasting room, studying the distillation process, and winning them over with her knowledge of Scottish whisky. After the owner of Laphroaig passed away, Williamson took over the prestigious company and became the American spokesperson for the entire Scotch whisky industry. Impressing clients and showing her passion as the Scotch Whisky Association’s trade ambassador, she soon gained fame within the industry, becoming known as the greatest female distiller. Whiskey Women tells the tales of women who have created this industry, from Mesopotamia’s first beer brewers and distillers to America’s rough-and-tough bootleggers during Prohibition. Women have long distilled, marketed, and owned significant shares in spirits companies. Williamson’s story is one of many among the influential women who changed the Scotch whisky industry as well as influenced the American bourbon whiskey and Irish whiskey markets. Until now their stories have remained untold.

Peat Smoke and Spirit Andrew Jefford,2005-06-06 Those who discover malt whisky quickly learn that the malts made on the Isle of Islay are some of the wildest and most characterful in the malt-whisky spectrum. In PEAT SMOKE AND SPIRIT, Islay's fascinating story is uncovered: from its history and stories of the many shipwrecks which litter its shores, to intimate descriptions of the beautiful wildlife, landscape and topography of the island. Interwoven through these different narrative strands comes the story of the whiskies themselves, traced from a distant past of bothies and illegal stills to present-day legality and prosperity. The flavour of each spirit is analysed and the differences between them teased out, as are the stories of the notable men and women who have played such a integral part in their creation. PEAT SMOKE AND SPIRIT is the last word on Islay and its whiskies.

Rifle Marksmanship U. S. Marine Corps,2005-01-01 All Marines share a common warfighting belief: Every Marine a rifleman. This simple credo reinforces the belief that all Marines are forged from a common experience, share a common set of values, and are trained as members of an expeditionary force in readiness. As such, there are no rear area Marines, and no one is very far from the fighting during expeditionary operations. The Marine rifleman of the next conflict will be as in past conflicts: among the first to confront the enemy and the last to hang his weapon in the rack after the conflict is won. Rifle Marksmanship, a Marine Corps Reference Publication, provides techniques and procedures for Marine Corps rifle marksmanship. Every Marine is first and foremost a rifleman. Rifle Marksmanship reflects this ethos and the Marine Corps' warfighting philosophy. This publication discusses the individual skills required for effective rifle marksmanship and standardizes the techniques and procedures used throughout the Marine Corps. It constitutes the doctrinal basis for all entry-level and sustainment-level rifle marksmanship training.

Principles of Quantum Mechanics Donald D. Fitts,1999-08-26 This text presents a rigorous mathematical account of the principles of quantum mechanics, in particular as applied to chemistry and chemical physics. Applications are used as illustrations of the basic theory. The first two chapters serve as an introduction to quantum theory, although it is assumed that the reader has been exposed to elementary quantum mechanics as part of an undergraduate physical chemistry or atomic physics course. Following a discussion of wave motion leading to Schrödinger's wave mechanics, the postulates of quantum mechanics are presented along with essential mathematical concepts and techniques. The postulates are rigorously applied to the harmonic oscillator, angular momentum, the hydrogen atom, the variation method, perturbation theory, and nuclear motion. Modern theoretical concepts such as hermitian operators, Hilbert space, Dirac notation, and ladder operators are introduced and used throughout. This text is appropriate for beginning graduate students in chemistry, chemical physics, molecular physics and materials science.

Robotic Knitting Pat Treusch,2020-12-31 As a reaction to typically dead-end debates on future human and robot collaboration that tend to be either dismissive or overly welcoming towards »cobot« technologies, this book provides a technofeminist intervention. Pat Treusch not only shows how both the fields of technofeminism and robotics can engage in a practical exchange through knitting, but also contributes a tangible example of coboting dynamics. Robotic Knitting re-negotiates the boundaries between formalisation and embodiment, craft and high-tech as well as useful and dysfunctional machines. It re-crafts the nature of collaboration between human and robot. This finally entails an alternative mode of relating - a mode that enables an account of careful coboting.
