Refugee Roulette Jaya Ramji-Nogales, Andrew I.
Schoenholtz, Philip G. Schrag, 2011-04-29 Through
the Refugee Act of 1980, the United States offers
the prospect of safety to people who flee to
America to escape rape, torture, and even death in
their native countries. In order to be granted
asylum, however, an applicant must prove to an
asylum officer or immigration judge that she has a
well-founded fear of persecution in her homeland.
The chance of winning asylum should have little if
anything to do with the personality of the
official to whom a case is randomly assigned, but
in a ground-breaking and shocking study, Jaya
Ramji-Nogales, Andrew I. Schoenholtz, and Philip
G. Schrag learned that life-or-death asylum
decisions are too frequently influenced by random
factors relating to the decision makers. In many
cases, the most important moment in an asylum case
is the instant in which a clerk randomly assigns
the application to an adjudicator. The system, in
its current state, is like a game of chance.
Refugee Roulette is the first analysis of
decisions at all four levels of the asylum

adjudication process: the Department of Homeland Security, the immigration courts, the Board of Immigration Appeals, and the United States Courts of Appeals. The data reveal tremendous disparities in asylum approval rates, even when different adjudicators in the same office each considered large numbers of applications from nationals of the same country. After providing a thorough empirical analysis, the authors make recommendations for future reform. Original essays by eight scholars and policy makers then discuss the authors' research and recommendations

No Way Home Wayne Winegarden, Joseph Tartakovsky, Kerry Jackson, Christopher F. Rufo, 2021-03-16 In San Diego, not far from the gates of the fantasy world of Disneyland, tent cities lining the freeways remind us of an ugly reality. Homeless individuals are slowing rail traffic between Sacramento and the Bay Area and swarming subway trains in Los Angeles in search of a place to sleep when they're not languishing on Skid Row. Drug use among the homeless is plaguing communities, with discarded needles threatening children playing at public parks. And every day

across California, thousands of homeless youth who lack safe and stable housing struggle to stay in school, to perform well academically, and to form meaningful connections with their teachers and peers. Since the 1980s, countless research studies have been published on the topic of homelessness in America. Too often, however, social science research on homelessness is narrow in scope, mired in politics, and reliant on questionable assumptions about the root causes of the problem. The severity of the homeless crises afflicting cities requires innovative solutions backed by credible data and objective research. This book examines the causes of homelessness with a focus on unaffordable housing, poverty, mental illness, substance addiction, and legal reform. It examines the state and local policy environment to determine ways in which housing policy, social service programs, and employment opportunities interact to exacerbate, perpetuate, or reduce homelessness. The book also evaluates different strategies being used at the state, county, and local levels to prevent or reduce homelessness. Finally, the authors provide a mix of long-term policy solutions based on their findings that have the greatest potential to reduce homelessness.
