Dungeon Crawler Carl Matt Dinniman,2020-09-21 The apocalypse will be televised! A man. His ex-girlfriend's cat. A sadistic game show unlike anything in the universe: a dungeon crawl where survival depends on killing your prey in the most entertaining way possible. In a flash, every human-erected construction on Earth--from Buckingham Palace to the tiniest of sheds--collapses in a heap, sinking into the ground. The buildings and all the people inside have all been atomized and transformed into the dungeon: an 18-level labyrinth filled with traps, monsters, and loot. A dungeon so enormous, it circles the entire globe. Only a few dare venture inside. But once you're in, you can't get out. And what's worse, each level has a time limit. You have but days to find a staircase to the next level down, or it's game over. In this game, it's not about your strength or your dexterity. It's about your followers, your views. Your clout. It's about building an audience and killing those goblins

with style. You can't just survive here. You gotta survive big. You gotta fight with vigor, with excitement. You gotta make them stand up and cheer. And if you do have that it factor, you may just find yourself with a following. That's the only way to truly survive in this game--with the help of the loot boxes dropped upon you by the generous benefactors watching from across the galaxy. They call it Dungeon Crawler World. But for Carl, it's anything but a game.

David Kimble's Cutaways David Kimble,2015-09-15 For enthusiasts reading magazines such as Motor Trend, Road & Track, and others, David Kimble is no stranger. His brilliant cutaway artwork has been gracing the pages of those publications for years. Whether he illustrated engines, transmissions, full-car chassis, sports cars, race cars, or classics, his cutaway artwork revealed, in excruciating detail, things that a camera lens could never capture. In David Kimble's Cutaways: The Techniques and the Stories Behind the Art, Kimble reveals the secrets, techniques, procedures, and the dedication to craft that is required to produce these amazing illustrations. He covers the step-by-step procedures while producing fresh artwork for this book featuring a McLaren Can-Am car as well as a vintage Harley-Davidson. Although the procedures covered here are unique to Kimble, and pretty much a pipe dream to mere mortals, this title provides an inside look into how he does it. Also included are the stories and tales of how it all started, traveling the world to illustrate cars, behind the scenes with manufacturers, the Corvette years, as well as a gallery of many illustrations. Never before has David Kimble provided a look into his cutaway skunkworks, or shared the procedures for bringing these beautiful technical illustrations to life. This book is a must-have for any automotive or art fan.

Voiture Minimum Antonio Amado,2011-02-11 A colorful account of Le Corbusier's love affair with the automobile, his vision of the ideal vehicle, and his tireless promotion of a design that industry never embraced. Le Corbusier, who famously called a house “a machine for living,” was fascinated—even obsessed—by another kind of machine, the automobile. His writings were strewn with references to autos: “If houses were built industrially, mass-produced like chassis, an aesthetic would be formed with surprising precision,” he wrote in *Toward an Architecture* (1923). In his “white phase” of the twenties and thirties, he insisted that his buildings photographed with a modern automobile in the foreground. Le Corbusier moved beyond the theoretical in 1936, entering (with his cousin Pierre Jeanneret) an automobile design competition, submitting plans for “a minimalist vehicle for maximum functionality,” the *Voiture Minimum*. Despite Le Corbusier's energetic promotion of his design to several important automakers, the *Voiture Minimum* was never mass-produced. This book is the first to tell the full and true story of Le Corbusier's adventure in automobile design. Architect Antonio Amado describes the project in detail, linking it to Le Corbusier's architectural work, to Modernist utopian urban visions, and to the automobile design projects of other architects including Walter Gropius and Frank Lloyd Wright. He provides abundant images, including many pages of Le Corbusier's sketches and plans for the *Voiture Minimum*, and reprints Le Corbusier's letters seeking a manufacturer. Le Corbusier's design is often said to have been the inspiration for Volkswagen's enduringly popular Beetle; the architect himself implied as much, claiming that his design for the 1936 competition originated in 1928, before the Beetle. Amado Lorenzo, after extensive examination of archival and source materials, disproves this; the influence may have gone the other way. Although many critics considered the *Voiture Minimum* a footnote in Le Corbusier's career, Le Corbusier did not. This book, lavishly illustrated and exhaustively documented, restores Le Corbusier's automobile to the main text.
