**Loose Wire** Jeremy Wagstaff,2006-09 EVER GET THE FEELING that technology is taking over your life and not asking you first? When you've mislaid that important file or can't connect your new camera, do you just want to hurl your computer out of the window? When your kids/friends/grandparents start talking about blogging, podcasting and RSS feeds do you nod as wisely as you can while wrestling with the urge to throw them out of the window too? The bad news is that technology isn't going away. The good news is that, by picking up this book, you're halfway to making it work for you - not against you. Loose Wire is a compilation of Jeremy Wagstaff's most popular weekly columns on personal technology from The Wall Street Journal Asia and the Far Eastern Economic Review. An ordinary person's primer on technology, Loose Wire explains - in jargon-free language and real sentences - what has happened over the past few years, from the rise of the mobile phone to phishing, to where we are heading, as well as hands-on, practical advice about how to enjoy the ride. ABOUT THE AUTHOR Jeremy Wagstaff has worked as a journalist since 1986 - for the BBC, Reuters, The Wall Street Journal and the Far Eastern Economic Review. Most of that time has been spent in Asia, covering uprisings, wars, colonial retreats and the odd (sometimes very odd) press conference. No techie, his interest in technology grew out of a realization that it was changing the way journalists - and the world - work, and that following it would probably be a better idea than fighting it. Since 2000 he has been writing a technology column and has since 2004 appeared regularly on the BBC World Service. He also keeps a blog at [www.loosewireblog.com](http://www.loosewireblog.com).

**Digital Knowledge Maps in Education** Dirk Ifenthaler,Ria Hanewald,2013-11-01 Digital knowledge maps are 'at a glance' visual representations that enable enriching, imaginative and transformative ways for teaching and learning, with the potential to enhance positive educational outcomes. The use of such maps has generated much attention and interest among tertiary education practitioners and researchers over the last few years as higher education institutions around the world begin to invest heavily into new technologies designed to provide online spaces within which to build resources and conduct activities. The key elements of this edited volume will comprise original and innovative contributions to existing scholarship in this field, with examples of pedagogical possibilities as they are currently practiced across a range of contexts. It will contain chapters that address, theory, research and practical issues related to the use of digital knowledge maps in all aspects of tertiary education and draws predominantly on international perspectives with a diverse group of invited contributors. Reports on empirical studies as well as theoretical/conceptual chapters that engage deeply with pertinent questions and issues raised from a pedagogical, social, cultural, philosophical, and/or ethical standpoint are included. Systematic literature reviews dealing with digital knowledge mapping in education are also an integral part of the volume.

**Idea Mapping** Jamie Nast,2012-06-15 Praise for Idea Mapping Nast's work in Idea Mapping enables those with creative minds to clearly lay out their thinking process and those who are more process-minded to become creative. If your organization is looking for a pragmatic, step-by-step guide to idea mapping, this is it. --Chris Brown, Executive Vice President, DTE Energy Resources I have used idea maps for thirty years and have taught MBA students, employees, and my children how to harness their power. I strongly recommend this book and believe you will feel it to be one of the best investments you have ever made in your own growth. --Stephen C. Lundin, coauthor, FISH! This is a book that everyone should read. It's an interactive, thought-provoking book about the brain and learning that will expand your mind. Nast, an accomplished and well-respected instructor, has guided me into a new realm of learning experiences and possibilities. I'm sure you will feel the same upon reading her insightful work. --Simon Tai, CEO, Buzan Centre Taiwan and S&J Media Intergration Co. Ltd., Host of News Discovery on NEWS 98 Taiwan Nast shows you a revolutionary method to capture your thinking processes. Don't underestimate the simplicity of idea mapping because therein lies its genius. --Scott Hagwood, four-time USA Memory Champion, author, Memory Power The ability to visually capture and organize thoughts and ideas has enabled millions of people around the world to do their work with greater creativity and productivity, run their businesses more strategically, and manage complex projects more efficiently--even map out a sales process or new product roll-out. Nast's very practical, readable book will get you quickly up to speed on one of the simplest but most powerful ways to organize your ideas, your work, and yourself. --Mike Jetter, cofounder and CTO, Mindjet Corporation, coauthor, The Cancer Code The principles Nast writes about in Idea Mapping have become a staple for me over the past fourteen years. I was turned onto the concept of idea mapping in 1992 and have been a student and practitioner ever since. This has absolutely transformed the way I learn, design learning, and prepare for public speaking. I have never been more confident in my recall, knowing the content is nicely tucked away in my brain as it was designed to be. Get ready for a life-changing experience for yourself and those you influence. --Will Flora, Senior Manager, Chick-Fil-A University, Atlanta, GA

'The Future of Knowledge' strips away traditional business thinking to reveal the new patterns of management thought and

practice essential for success in a more complex world. With a gift for making the complex simple and practical, Allee weaves together diverse threads such as business webs, communities of practice, knowledge technologies, intangibles, network analysis, and biology to show why organizations must be supported as living systems before their natural networked pattern of organization can emerge. Embodying Allee's visionary approach, 'The Future of Knowledge' brings forward a practical view of new theories, frameworks, tools, and methods offering businesses a guide to managing the increasing levels of complexity within their organizations and in society at large. 'The Future of Knowledge' works on many levels: \* At the strategic level, the new tools are intangible scorecards and understanding value networks \* At the tactical level, the knowledge management tools for exchanging and applying knowledge are knowledge networks and communities of practice \* At the operational level, a wealth of new technologies is supporting the codification, storage and delivery of the knowledge people need to complete their routine tasks.

**Systematic Reviews in the Social Sciences** Mark Petticrew, Helen Roberts, 2008-04-15 Such diverse thinkers as Lao-Tze, Confucius, and U.S. Defense Secretary Donald Rumsfeld have all pointed out that we need to be able to tell the difference between real and assumed knowledge. The systematic review is a scientific tool that can help with this difficult task. It can help, for example, with appraising, summarising, and communicating the results and implications of otherwise unmanageable quantities of data. This book, written by two highly-respected social scientists, provides an overview of systematic literature review methods: Outlining the rationale and methods of systematic reviews; Giving worked examples from social science and other fields; Applying the practice to all social science disciplines; It requires no previous knowledge, but takes the reader through the process stage by stage; Drawing on examples from such diverse fields as psychology, criminology, education, transport, social welfare, public health, and housing and urban policy, among others. Including detailed sections on assessing the quality of both quantitative, and qualitative research; searching for evidence in the social sciences; meta-analytic and other methods of evidence synthesis; publication bias; heterogeneity; and approaches to dissemination.
