**Madness, Disability and Social Exclusion** Jane Hubert, 2013-12-02 A unique work that brings together a number of specialist disciplines, such as archaeology, anthropology, disability studies and psychiatry to create a new perspective on social and physical exclusion from society. A range of evidence throws light on such things as the causes and consequences of social exclusion stigma, marginality and dangerousness. It is an important text that breaks down traditional academic disciplinary boundaries and brings a much needed comparative approach to the subject.

**Cassell's Dictionary of Slang** Jonathon Green, 2005 With its unparalleled coverage of English slang of all types (from 18th-century cant to contemporary gay slang), and its uncluttered editorial apparatus, Cassell's Dictionary of Slang was warmly received when its first edition appeared in 1998. 'Brilliant.' said Mark Lawson on BBC2's The Late Review; 'This is a terrific piece of work - learned, entertaining, funny, stimulating' said Jonathan Meades in The Evening Standard. But now the world's best single-volume dictionary of English slang is about to get even better. Jonathon Green has spent the last seven years on a vast project: to research in depth the English slang vocabulary and to hunt down and record written instances of

the use of as many slang words as possible. This has entailed trawling through more than 4000 books – plus song lyrics, TV and movie scripts, and many newspapers and magazines – for relevant material. The research has thrown up some fascinating results

**Ordering the City** Nicole Stelle Garnett, 2010-01-01 This work highlights the multiple, often overlooked, and frequently misunderstood connections between land use and development policies and policing practices. Art, Space and the City Malcolm Miles, 2005-08-16 This book examines public art outside the normal confines of art criticism and places it within broader contexts of public space and gender by exploring both the aesthetic and political aspects of the medium.

**Taste** D. S. Murphy, 2018-11-06 Vampire Academy meets Hunger Games. ♥?????♥

YABookWormAn arrogant vampire prince. A scarred rebel. A love that could destroy the kingdom.All I wanted was freedom. Instead, I'm married off to an elite prince; a symbol to unite the two races. It was the perfect system. My body and blood, in exchange for the healing elixir and the purification engines that guard against the poisonous sky. But once I reach the palace citadel, I discover more dangers than beasts outside the gates, and more power than I ever imagined.When a buried secret shatters my identity, I'll do anything to uncover the truth. My immortal husband - the gorgeous prince Damien - is hiding things from me, and when he discovers who I really am, I'm not sure he'll have the power to save me. But if I can unlock my new abilities, I might be strong enough to save us both--as long as his father doesn't kill me first.Live together, die apart. It was a perfect system for nearly a century. Until me.This book slightly reminded me of a mixture of The Selection, The Hunger Games, and Twilight series. Nice sweet combination of everything great. If you like dystopian romances or scientifically-made vampires, get this one.A compelling tale full of raw emotions, tentative romance, beguiling mysteries, dangerous secrets and gut wrenching heartbreak. ★★★★★ This book is better than Twilight/Vampire Novels. It's so addicting that you won't want to put it down. Dark/Ya/Dystopian at its finest. ★★★★★ Fans of Twilight and Hunger Games are devouring this seductive vampire romance, set in a uniquely dystopian kingdom full of poisonous ash and courtly intrigue. If you love Gothic literature like Dracula, dark and brooding mysteries, and just enough gore and romance to keep things interesting, this book will keep you enthralled until the twisted ending.Start reading now

*Bottleneckers* William Mellor, Dick M. Carpenter II, 2016-12-13 Bottleneck (n): a person who advocates for the creation or perpetuation of government regulation, particularly an occupational license, to restrict entry into his or her occupation, thereby accruing an economic advantage without providing a benefit to consumers. The Left, Right, and Center all hate them: powerful special interests that use government power for their own private benefit. In an era when the Left hates "fat cats" and the Right despises "crony capitalists," now there is an artful and memorable one-word pejorative they can both get behind: bottleneckers. A "bottleneck" is anyone who uses government power to limit competition and thereby reap monopoly profits and other benefits. Bottleneckers work with politicians to constrict competition, entrepreneurial innovation, and opportunity. They thereby limit consumer choice; drive up consumer prices; and they support politicians who willingly overstep the constitutional limits of their powers to create, maintain, and expand these anticompetitive bottlenecks. The Institute for Justice's new book *Bottleneckers* coins a new word in the American lexicon, and provides a rich history and well-researched examples of bottleneckers in one occupation after another—from alcohol distributors to taxicab cartels—pointing the way to positive reforms.

**Open World Collision Detection in Computer Games Development (UTeM Press)**

Hamzah Asyrani Sulaiman, Abdullah Bade, 2020-01-09 Open world games have

tremendously become a demanding criterion for computer games development as user be able to freely roam through land and sea virtually. One of the elements involving computer games development is to bring applicable real-time collision detection for each object. Collision detection required sophisticated process of using hierarchical approach of Bounding-Volume Hierarchies (BVH) for detecting procedure. BVH is one of the most challenging issues in collision detection area that critically undergoing multiple splitting process. Splitting process requires an object with their set of triangles to be split into two parts using binary type tree. It is very crucial to make sure that the BVH tree construction is always in balanced as the speed of BVH tree traversal algorithm is dropped for unbalanced tree. In this thesis, we introduced Spatial Object Median Splitting (SOMS) to enhance the capability of BVH construction. Hence, SOMS creates an optimum level of BVH where most leaf nodes that was bounded with AABB contained one triangle compared to Spatial Median technique. From the BVH construction experiments, SOMS managed to perform faster as compared to other common technique. Furthermore, experiment to create one BV one triangle also showed that SOMS produced more nodes. As a conclusion, BVH can easily be constructed using SOMS approach together to create higher level of balanced tree for collision detection.
