Exhibitions as Research Peter Bjerregaard, 2019-08-13 Exhibitions as Research contends that museums would be more attractive to both researchers and audiences if we consider exhibitions as knowledge-in-the-making rather than platforms for disseminating already-established insights. Analysing the theoretical underpinnings and practical challenges of such an approach, the book questions whether it is possible to exhibit knowledge that is still in the making, whilst also considering which concepts of knowledge apply to such a format. The book also considers what the role of audience might be if research is extended into the exhibition itself. Providing concrete case studies of projects where museum professionals have approached exhibition making as a knowledge-generating process, the book considers tools of application and the challenges that might emerge from pursuing such an approach. Theoretically, the volume analyses the emergence of exhibitions as research as part of recent developments within materiality theories, object-oriented ontology and participatory approaches to exhibition-making. Exhibitions as Research will be of interest to academics and students engaged in the study of museology, material culture, anthropology and archaeology. It will also appeal to museum professionals with an interest in current trends in exhibition-making.

Biomedical Visualisation Paul M. Rea, 2020-06-02 This edited book explores the use of technology to enable us to visualise the life sciences in a more meaningful and engaging way. It will enable those interested in visualisation techniques to gain a better understanding of the applications that can be used in visualisation, imaging and analysis, education, engagement and training. The reader will be able to explore the utilisation of technologies

from a number of fields to enable an engaging and meaningful visual representation of the biomedical sciences, with a focus in this volume related to anatomy, and clinically applied scenarios. The first eight chapters examine a variety of tools, techniques, methodologies and technologies which can be utilised to visualise and understand biological and medical data. This includes web-based 3D visualisation, ultrasound, virtual and augmented reality as well as functional connectivity magnetic resonance imaging, storyboarding and a variety of stereoscopic and 2D-3D transitions in learning. The final two chapters examine the pedagogy behind digital techniques and tools from social media to online distance learning techniques.

Visio 2003 Developer's Survival Pack Graham Wideman, 2003 This guide and accompanying tools are for developers using Microsoft Visio (R) as a platform for building diagrammatic software applications for business, I.T., science and engineering. Covers structure and behavior of Visio platform, architectures for adding functionality, and an extensive browsable reference section.

Innovative Technologies and Learning Lisbet Rønningsbakk, Ting-Ting Wu, Frode Eika Sandnes, Yueh-Min Huang, 2019-11-25 This book constitutes the refereed proceedings of the Second International Conference on Innovative Technologies and Learning, ICITL 2019, held in Tromsø, Norway, in December 2019. The 85 full papers presented together with 4 short papers were carefully reviewed and selected from 189 submissions. The papers are organized in the following topical sections: application and design of innovative learning software; artificial intelligence and data mining in education; augmented and virtual reality in education; computational thinking in education; design and

framework of learning systems; educational data analytics techniques and adaptive learning applications; evaluation, assessment and test; innovative learning in education; mobile learning; new perspectives in education; online course and web-based environment; pedagogies to innovative technologies; social media learning; technologies enhanced language learning; and technology and engineering education.

TECHNOCRATS OF THE IMAGINATION;ART, TECHNOLOGY, AND THE MILITARY-INDUSTRIAL AVANT-GARDE JOHN BECK; RYAN BISHOP., John Beck, 2020 TECHNOCRATS OF THE IMAGINATION traces the rise of collaborative art and technology labs in the U.S. from WWII to the present. Ryan Bishop and John Beck reveal the intertwined histories of the avant-garde art movement and the military-industrial complex, showing how radical pedagogical practices traveled from Germany's Bauhaus movement to the U.S. art world and interacted with government-funded military research and development in university laboratories. During the 1960s both media labs and studio labs leaned heavily on methods of interdisciplinary collaboration and the power of American modernity to model new modes of social organization. The book's chapters take up MIT's Center for Art, Science, and Technology, Bell Labs's E.A.T. (Experiments in Art and Technology) Salon, and Los Angeles Museum of Art's Art + Technology Program. Their interconnected history illuminates how much of contemporary media culture and aesthetics depends on the historical relationship between military, corporate, and university actors. In light of revived interest in Black Mountain College and other 1960s art and technology labs, this book draws important connections between the contemporary art world and the militarized lab model of research that has dominated the sciences since the 1950s. The authors situate the rise of collaborative art

and technology projects in the 1960s within John Dewey's ideology of scientific democracy, showing how leading thinkers from the Bauhaus movement in Germany immigrated to the U.S. and brought with them a Deweyan model for collaborative and interdisciplinary art and technology research. Over the course of the decade, the U.S. government increased funding to scientific research at university and private laboratories. Beck and Bishop investigate how various art and technology projects incorporated the collaborative and innovative interdisciplinarity of the avant-garde art movement with the corporate funding structure driven by the U.S. government's military and technoscientific interests. Finally, the authors consider the legacy of 1960s art and technology projects. During the 1970s and 80s, defense R&D funding was less motivated by a Cold War corporate state, and was instead restructured according to an entrepreneurial and neoliberal model. At the same time, funding in the art world also became increasingly financialized and globalized. Today's art and technology work happens collaboratively not because of an intellectual commitment to interdisciplinarity, but because of the precarity of the contemporary labor market. This book will interest students and scholars in art history and theory, media studies, history of technology, American studies, cultural studies, and critical university studies--

Cognitive Infocommunications (CogInfoCom) Péter Baranyi, Adam Csapo, Gyula Sallai, 2015-11-02 This book describes the theoretical foundations of cognitive infocommunications (CogInfoCom), and provides a survey on state-of-the-art solutions and applications within the field. The book covers aspects of cognitive infocommunications in research fields such as affective computing, BCI, future internet, HCI, HRI, sensory substitution, and

virtual/augmented interactions, and also introduces newly proposed paradigms and initiatives under the field, including CogInfoCom channels, speechability and socio-cognitive ICT. The book focuses on describing the merging between humans and information and communications technology (ICT) at the level of cognitive capabilities with an approach towards developing future cognitive ICT.

Crime and Fear in Public Places Vania Ceccato, Mahesh K. Nalla, 2020-07-15
The Open Access version of this book, available at <https://www.taylorfrancis.com/books/9780429352775> has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. No city environment reflects the meaning of urban life better than a public place. A public place, whatever its nature—a park, a mall, a train platform or a street corner—is where people pass by, meet each other and at times become a victim of crime. With this book, we submit that crime and safety in public places are not issues that can be easily dealt with within the boundaries of a single discipline. The book aims to illustrate the complexity of patterns of crime and fear in public places with examples of studies on these topics contextualized in different cities and countries around the world. This is achieved by tackling five cross-cutting themes: the nature of the city's environment as a backdrop for crime and fear; the dynamics of individuals' daily routines and their transit safety; the safety perceptions experienced by those who are most in fear in public places; the metrics of crime and fear; and, finally, examples of current practices in promoting safety. All these original chapters contribute to our quest for safer, more inclusive, resilient, equitable and sustainable cities and human settlements aligned to the Global 2030 Agenda for Sustainable Development.

Smart Business Networks Peter H.M. Vervest, Eric van Heck, Ken Preiss, Louis-Francois Pau, 2005-12-14 Scientists from management and strategy, information systems, engineering and telecommunications have discussed a novel concept: Smart Business Networks. They see the future as a developing web of people and organizations, bound together in a dynamic and unpredictable way, creating smart outcomes from quickly (re-)configuring links between actors. The question is: What should be done to make the outcomes of such a network 'smart', that is, just a little better than that of your competitor? More agile, with less pain, with more return to all the members of the network, now and over time? The technical answer is to create a 'business operating system' that should run business processes on different organisational platforms. Business processes would become portable: The end-to-end management of processes running across many different organizations in many different forms would become possible. This book presents you the outcomes of an energizing and new direction in management science.

Vernacular Buildings and Urban Social Practice: Wood and People in Early Modern Swedish Society Andrine Nilsen, 2021-01-14 Wooden buildings housed the majority of Swedish urban populations during the early modern era, but many of these buildings have disappeared as the result of fire, demolition, and modernisation. This book reveals the fundamental role played by the wooden house in the formation of urban Sweden and Swedish history.

Image Objects Jacob Gaboury, 2021-08-03 How computer graphics transformed the computer from a calculating machine into an interactive medium, as seen through the histories of five technical objects. Most of us think of computer graphics as a relatively recent invention, enabling the spectacular visual effects and lifelike simulations we see in current films, television shows,

and digital games. In fact, computer graphics have been around as long as the modern computer itself, and played a fundamental role in the development of our contemporary culture of computing. In *Image Objects*, Jacob Gaboury offers a prehistory of computer graphics through an examination of five technical objects--an algorithm, an interface, an object standard, a programming paradigm, and a hardware platform--arguing that computer graphics transformed the computer from a calculating machine into an interactive medium. Gaboury explores early efforts to produce an algorithmic solution for the calculation of object visibility; considers the history of the computer screen and the random-access memory that first made interactive images possible; examines the standardization of graphical objects through the Utah teapot, the most famous graphical model in the history of the field; reviews the graphical origins of the object-oriented programming paradigm; and, finally, considers the development of the graphics processing unit as the catalyst that enabled an explosion in graphical computing at the end of the twentieth century. The development of computer graphics, Gaboury argues, signals a change not only in the way we make images but also in the way we mediate our world through the computer--and how we have come to reimagine that world as computational.

Wake Adam Jeppesen, 2008 Danish documentary filmmaker and photographer Adam Jeppesen's *Wake* was assembled over a period of several months in the backwoods of Finland. Rather than fall prey to Nordic melancholy while in seclusion, Jeppesen constructed a poetic, dreamlike sequence from his archive of past images that, in its arrangement, reflects the emotional and aesthetic clarity afforded by solitude. Composed of personal work made while traveling on assignment for the past seven years, this monograph is a personal psychological study. As the title suggests, the images in this volume inhabit

the liminal space between darkness and twilight, the torpid state between sleeping and waking. The specificity of people, places and things gives way to light, color and texture. This series is infused with a quiet drama, an impression that something just out of reach lies below the surface of each image.

Making Futures Pelle Ehn,Elisabet M. Nilsson,Richard Topgaard,2014-10-31 This book describes experiments in innovation, design, and democracy, undertaken largely by grassroots organizations, non-governmental

organizations, and multi-ethnic working-class neighborhoods. These stories challenge the dominant perception of what constitutes successful innovations. They recount efforts at social innovation, opening the production process, challenging the creative class, and expanding the public sphere. The cases considered include a collective of immigrant women who perform collaborative services, the development of an open-hardware movement, grassroots journalism, and hip-hop performances on city buses. They point to the possibility of democratized innovation that goes beyond solo entrepreneurship and crowdsourcing in the service of corporations to include multiple futures imagined and made locally by often-marginalized publics.

Extramural English in Teaching and Learning Pia Sundqvist, Liss Kerstin Sylvén, 2016-11-09 This book is unique in bringing together theory, research, and practice about English encountered outside the classroom – extramural English – and how it affects teaching and learning. The book investigates ways in which learners successfully develop their language skills through extramural English and provides tools for teachers to make use of free time activities in primary and secondary education. The authors demonstrate that learning from involvement in extramural English activities tends to be incidental and is currently underutilized in classroom work. A distinctive strength is that this volume is grounded in theory, builds on results from empirical studies, and manages to link theory and research with practice in a reader-friendly way. Teacher-educators, teachers and researchers of English as a foreign language and teachers of English as a second language across the globe will find this book useful in developing their use of extramural

English activities as tools for language learning.

Cultural policy in the Nordic welfare states: aims and functions of public funding for culture Sokka, Sakarias, Berge, Ola K., Bille, Trine, Johannisson, Jenny, Kaaber, Erna, Lindqvist, Katja, Lundgren, Per, 2022-01-18 Available online: <https://pub.norden.org/nordiskkulturakta2022-01/> In this research anthology on public subsidy systems for culture in the Nordic region, researchers from each Nordic country contribute with a chapter on the status and challenges of public subsidy systems for culture in their particular country. In addition, a former civil servant with the Nordic Council of Ministers provides descriptions of Nordic co-operation grants for culture, as well as grants in the Faroe Islands, Greenland, and Åland. While the authors have chosen which issues to focus on in their respective chapters, all in one way or another concern themselves with the question of how Nordic welfare policies are reflected in Nordic cultural policies. The research anthology has been produced by Kulturanalys Norden and edited by Sakarias Sokka, senior researcher at CUPORE.
