**Ambient Media** Paul Roquet,2016-02-01 Ambient Media examines music, video art, film, and literature as tools of atmospheric design in contemporary Japan, and what it means to use media as a resource for personal mood regulation. Paul Roquet traces the emergence of ambient styles from the environmental music and Erik Satie boom of the 1960s and 1970s to the more recent therapeutic emphasis on healing and relaxation. Focusing on how an atmosphere works to reshape those dwelling within it, Roquet shows how ambient aesthetics can provide affordances for reflective drift, rhythmic attunement, embodied security, and urban coexistence. Musicians, video artists, filmmakers, and novelists in Japan have expanded on Brian Eno's notion of the ambient as a style generating "calm, and a space to think," exploring what it means to cultivate an ambivalent tranquility set against the uncertain horizons of an ever-shifting social landscape. Offering a new way of understanding the emphasis on "reading the air" in Japanese culture, Ambient Media documents both the adaptive and the alarming sides of the increasing deployment of mediated moods. Arguing against critiques of mood regulation that see it primarily as a form of social pacification, Roquet makes a case for understanding ambient media as a neoliberal response to older modes of collective attunement—one that enables the indirect shaping of social behavior while also allowing individuals to feel like they are the ones ultimately in control.

Capturing Light Michael Freeman,2014-06-20 In almost all photography it's the quality of light that makes or breaks the shot. For professional photographers, chasing the light, waiting for it, sometimes helping it, and finally capturing it is a constant preoccupation – and for some an obsession. Drawing on four decades of doing just this, Michael Freeman takes a simple but practical approach to reacting to, and capturing photography's most important commodity. There are just three sections titled Waiting, Chasing, and Helping: Waiting explains the kinds of lighting that photographers can anticipate and plan for, while Chasing explores the transient, serendipitous light that photographers have to work quickly to exploit. Helping, the final and most technical section, focuses on the skills and techniques for enhancing, reducing, or otherwise controlling light, covering everything from in-the-field shooting choices to technical transformations to post-production.

**If the Universe Is Teeming with Aliens ... WHERE IS EVERYBODY?** Stephen Webb,2002-10-04 In a 1950 conversation at Los Alamos, four world-class scientists generally agreed, given the size of the Universe, that advanced extraterrestrial civilizations must be present. But one of the four, Enrico Fermi, asked, If these civilizations do exist, where is everybody? Given the fact that there are perhaps 400 million stars in our Galaxy alone, and perhaps 400 million galaxies in the Universe, it stands to reason that somewhere out there, in the 14 billion-year-old cosmos, there is or once was a civilization at least as advanced as our own. Webb discusses in detail the 50 most cogent and intriguing solutions to Fermi's famous paradox.

**The Cactus Eaters** Dan White,2009-10-13 "In the well-written, laugh-out-loud, self-deprecating spirit of Bill Bryson's A Walk In the Woods and Nora Ephron's When Harry Met Sally, Dan White takes us along for a walk on the wild side of adventure and love. I couldn't put it down." –Eric Blehm, National Outdoor Book Award-winning author of The Last Season When Dan White and his girlfriend Melissa set out to hike the Pacific Crest Trail, which stretches from Mexico to Canada through boiling desert and snowcapped mountain passes, his parents wondered how two people who had never shared an apartment could survive in a tent in the desert. But when Dan and Melissa, dubbed "The Lois and Clark Expedition" by a fellow hiker, quit their doldrum jobs to set out into the wilderness, the hardships of the trail provided these addled adventurers with a crystalline view of the American wilderness, themselves, and each other. In his wickedly funny memoir, Dan White also shares the story of Warren Rogers, who risked ruin to chart the trail during the Great Depression. As he walks in Rogers' footsteps, he starts to wonder if he's assumed the man's bravery—or his insanity. Both hilarious and harrowing, this account of a young couple's hike along the 2,650-mile Pacific Crest Trail is a testament to the power of nature to change us and the power of love to get us through the uphill climbs.

The 99th Monkey Eliezer Sobel,2008-02-01 Suffused with a unique brand of irreverent humor, this account recalls the autobiographical explorations of the most significant alternative communities, ashrams, gurus, shamans, and consciousness-raising seminars of the past 40 years. Serving as a human guinea pig for many of the most popular cutting-edge New Age, human potential, and spiritual experiments, Eliezer Sobel recounts intercontinental adventures in India, Israel, Brazil, and Haiti. From Primal Therapy to the Dalai Lama, this perceptively witty analysis includes brushes with cults, wild experiments with sex and psychedelics, and encounters with visionary gurus and contemporary madmen.

**Designing Disney** John Hench,2009-01-06 Designing Disney sets into history and puts into context the extraordinary contributions of the late John Hench, who, at the age of 94, still came into his office at Imagineering each day. His principles of theme park design, character design, and use of color made him a legendary figure, not only for Disney fans but also for students and aficionados of architecture, engineering, and design. Designing Disney reveals the magic behind John's great discoveries and documents his groundbreaking in several key areas: "Design Philosophy" examines the values, attitudes, aesthetics, and logic that went into the original concepts for Disney theme parks. In "The Art of the Show" and "The Art of Color," Hench reveals the essence of what makes the parks work so well. And in "The Art of Character," he lets the reader in on the how and why of the Disney characters' inherent popularity—their timeless human traits, archetypal shape and gestures

that suggest these qualities graphically, and their emotional resonance in our lives.

But a covenant was made by the Archangel Maeádael to the Adepts of Magick that as the people of the world evolved to a higher light the knowledge and power of angels would come again to the earth during the time of the Generation of Promise. That time is now. We are the Generation of Promise that has been foretold of for millennium. And all that was lost has been restored.It doesn't matter what religion or path of enlightenment and empowerment that you travel: Wicca, Christianity, Pagan, Jewish, Buddhist, Occult, Muslim, Kabbalah, Vedic, something else or none at all. Nor does your preferred system of magick from Enochian, Thelemic, Gardnerian, Hermetic, to Tantric matter. **The Middle Matter. Sound as Interstice** ,2019 The Middle Matter is a reader which brings together thoughts on the nature of sound; its substance, specific qualities, and potential ? with a specific curiosity to its propensity to occupy the spaces in-between, the interstitial gaps between different spaces, times, cultures, and world views, between the interior body and the exterior space.00Through a number of artistic and theoretical contributions, observations are made around the notion of ?audience? and the attendant questions of format, on the effects of old and new technologies, of communal working processes, and the complexity of language, the contributors reveal sound to be a material particularly apt at negotiating these zones of and between contact.00It is a large field of in-betweenness, sound travels, hops borders, passes through walls, its messages for a large part being transported involuntarily and even unconsciously. In this sense sound is extensively participative, entangled in the complicated gaps between bodies, minds and objects through and against which it resonates.
