To Touch a Wild Dolphin Rachel Smolker, 2001 In 1982, Rachel Smolker turned her lifetime fascination with dolphins into a groundbreaking research project. Frustrated by the limitations of observing dolphins in captivity, she moved to Monkey Mia, a remote beach on the west coast of Australia where tame wild dolphins regularly interact with humans. Gradually, Smolker and a team of fellow scientists extended the human-dolphin community to encompass dolphins that did not come toward the shore. By 1990 they could recognise and chart the behaviour of more than 250 individuals. Smolker's highly engaging chronicle of her time with the dolphins of Monkey Mia unravels much of the mystery surrounding these appealing creatures. It offers an up-close look at their society and the individuals that inhabit it. From the intriguing differences between the sexes to the nature of mother-infant relationships, to the wide repertoire of sounds used for social communication, the author reveals the inner workings of dolphin life. She profiles single dolphins and shows them to have personalities ranging from the playful to the moody to downright silly.

Dolphins Gail Terp, 2017-08-01 Diagrams, graphs, and fun text help readers explore the lives of dolphins and their place in the wild animal kingdom. Take readers beyond the zoo and into the habitats of the world's most intriguing animals. Diagrams, graphs, and other infographics give readers visual literacy practice while also digging into the animals' appearances, daily lives, and homes. This hi/lo series is perfect for cause/effect studies and understanding craft and structure. It truly is a wild animal kingdom out there.

A Year with Swollen Appendices Brian Eno, 2020-11-17 The diary and essays of Brian Eno republished twenty-five years on with a new introduction by the artist in a beautiful hardback edition. 'One of the seminal books about music . . . an invaluable insight into the mind and working practices of one of the industry's undeniable geniuses.' GUARDIAN At the end of 1994, Brian Eno resolved to keep a diary. His plans to go to the cinema, theatre and galleries fell quickly to the wayside. What he did do - and write - however, was astonishing: ruminations on his collaborative work with David Bowie, U2, James and Jah Wobble, interspersed with correspondence and essays dating back to 1978. These 'appendices' covered topics from the generative and ambient music Eno pioneered to what he believed the role of an artist and their art to be, alongside adroit commentary on quotidian tribulations and happenings around the world. This beautiful 25th-anniversary hardcover edition has been redesigned in the same size as the diary that eventually became this book. It features two ribbons, pink paper delineating the appendices (matching the original edition) and a two-tone paper-over-board cover, which pays homage to the original design. An intimate insight into one of the most influential creative artists of our time, *A Year with Swollen Appendices* is an essential classic.

The Nature Fix: Why Nature Makes Us Happier, Healthier, and More Creative Florence Williams, 2017-02-07 Highly informative and remarkably entertaining. —Elle From forest trails in Korea, to islands in Finland, to eucalyptus groves in California, Florence Williams investigates the science behind nature's positive effects on the brain. Delving into brand-new research, she uncovers the powers of the natural world to improve health, promote reflection and innovation, and strengthen our relationships. As

our modern lives shift dramatically indoors, these ideas—and the answers they yield—are more urgent than ever.

Animal Kingdom Randal Ford, 2018-09-25 These arresting studio portraits capture the beauty, power, and even humor of 150 furry and feathered species - a delight for any animal or bird lover. Acclaimed photographer Randal Ford celebrates our fascination with and love of animals through his engaging portraits of the animal kingdom. A young male lion cub seems to sport a rebellious mohawk; a chimpanzee adopts a pensive pose; a curious duckling cocks his head at the camera lens and flaps his wings. The featured animals cover a wide range, from birds such as the African crane, cockatoos, flamingos, and roosters, to big cats such as tigers, cheetahs, and leopards, to Arabian horses, bulls, and Longhorn sheep, among many others. Bird and animal lovers will be drawn to the powerful and emotionally engaging images that seem to reveal the individual character of the other animals that share the Earth with us. Elegantly designed and packaged, this book will be the perfect gift and addition to the home of any lover of animals or fine photography.

Destination Recommendation Systems Daniel R. Fesenmaier, Karl W. Wöber, H. Werthner, 2006-01-01 Bringing together the work of leading researchers, this book provides a clear and accessible overview of current research on destination recommendation systems. These systems guide consumer behaviour by enabling Internet users to quickly and effectively find relevant information about travel destinations, attractions, accommodation and transportation. The chapters in this book cover consumer behaviour,

perceptual factors influencing consumer choice, and the design of destination recommendation systems. The book examines four different types of destination marketing system and concludes by analysing the future of recommendation systems for travellers.

If the Universe Is Teeming with Aliens ... WHERE IS EVERYBODY? Stephen Webb, 2002-10-04 In a 1950 conversation at Los Alamos, four world-class scientists generally agreed, given the size of the Universe, that advanced extraterrestrial civilizations must be present. But one of the four, Enrico Fermi, asked, If these civilizations do exist, where is everybody? Given the fact that there are perhaps 400 million stars in our Galaxy alone, and perhaps 400 million galaxies in the Universe, it stands to reason that somewhere out there, in the 14 billion-year-old cosmos, there is or once was a civilization at least as advanced as our own. Webb discusses in detail the 50 most cogent and intriguing solutions to Fermi's famous paradox.

1,000 Places To See Before You Die 2019 Calendar Patricia Schultz, 2018-07-10

The Mitten Jan Brett, 2009-10-05 When Nicki drops his white mitten in the snow, he goes on without realizing that it is missing. One by one, woodland animals find it and crawl in; first, a curious mole, then a rabbit, a badger and others, each one larger than the last. Finally, a big brown bear is followed in by a tiny brown mouse and what happens next makes for a wonderfully funny climax. As the story of the animals in the mitten unfolds, the reader can see Nicki in the borders of each page, walking through the woods unaware of what is going on. Once again Jan Brett has created a dramatic and beautiful picture book in her distinctive style. She brings the animals to life with warmth and humor, and her illustrations are full of

visual delights and details faithful to the Ukrainian tradition from which the story comes.

History of Computer Art Thomas Dreher, 2020 The development of the use of computers and software in art from the Fifties to the present is explained. As general aspects of the history of computer art an interface model and three dominant modes to use computational processes (generative, modular, hypertextual) are presented. The History of Computer Art features examples of early developments in media like cybernetic sculptures, computer graphics and animation (including music videos and demos), video and computer games, reactive installations, virtual reality, evolutionary art and net art. The functions of relevant art works are explained more detailed than usual in such histories.

It Must Be Art Michael Fishel, Nigel Suckling, 2018-07-28 Throughout the 1960s and 70s, London-based Big O Posters helped define the new and democratic art medium of the psychedelic poster, a vehicle for rebellion against the old order that went hand in hand with the music, literature, and film of the time. This is a comprehensive collection of works published by Big O artists, astonishingly creative folks whose artistry developed almost completely outside the influence of the art establishment. Included in more than 300 images are works by 19 artists, including Martin Sharp, Roger Dean, H.R. Giger, Robert Venosa, and Vali Myers whose signature styles include sci-fi, fantasy, visionary, botanical, and surrealism. In addition to hundreds of original works, this book digs below the surface to offer insights and anecdotes about the era, the artistic process, and reveals connections to artists from the past (Aubrey Beardsley, Alphonse Mucha, Kay Nielsen) whose spirit chimed with the age of Big O Posters.

Fashion Photography Now Catherine Chermayeff, 2000-10 A compilation of fashion photography at the

turn of the 21st century. Photographs by established and up-and-coming photographers are included, including work by Peter Lindbergh, Paolo Roversi, Ellen von Unworth, Kent Baker, Jeff Minton and Cermen Freudenthal.

Ambient Media Paul Roquet, 2016-02-01 *Ambient Media* examines music, video art, film, and literature as tools of atmospheric design in contemporary Japan, and what it means to use media as a resource for personal mood regulation. Paul Roquet traces the emergence of ambient styles from the environmental music and Erik Satie boom of the 1960s and 1970s to the more recent therapeutic emphasis on healing and relaxation. Focusing on how an atmosphere works to reshape those dwelling within it, Roquet shows how ambient aesthetics can provide affordances for reflective drift, rhythmic attunement, embodied security, and urban coexistence. Musicians, video artists, filmmakers, and novelists in Japan have expanded on Brian Eno's notion of the ambient as a style generating "calm, and a space to think," exploring what it means to cultivate an ambivalent tranquility set against the uncertain horizons of an ever-shifting social landscape. Offering a new way of understanding the emphasis on "reading the air" in Japanese culture, *Ambient Media* documents both the adaptive and the alarming sides of the increasing deployment of mediated moods. Arguing against critiques of mood regulation that see it primarily as a form of social pacification, Roquet makes a case for understanding ambient media as a neoliberal response to older modes of collective attunement—one that enables the indirect shaping of social behavior while also allowing individuals to feel like they are the ones ultimately in control.

Up From the Sea Leza Lowitz, 2016-01-12 A powerful novel-in-verse about how one teen boy survives

the March 2011 tsunami that devastates his coastal Japanese village. “Successfully captures the raw emotions of loss, grief, and what it means to move forward.” —BuzzFeed On the day the tsunami strikes, Kai loses nearly everyone and everything he cares about. But a trip to New York to meet kids whose lives were changed by 9/11 gives him new hope and the chance to look for his estranged American father. Visiting Ground Zero on its tenth anniversary, Kai learns that the only way to make something good come out of disaster is to return and rebuild. Heartrending yet hopeful, *Up from the Sea* is a story about loss, survival, and starting anew. Fans of Jewell Parker Rhodes’s *Ninth Ward* and Karen Hesse’s *Out of the Dust* will embrace this moving story. An author’s note includes numerous sources detailing actual events portrayed in the story. A BOOKRIOT 100 MUST-READ YA BOOKS WRITTEN IN VERSE A NEW YORK PUBLIC LIBRARY BEST BOOK FOR TEENS, 2016 “*Up From the Sea* touched me deeply with its beautiful message of hope and the resilience of humanity. Bravo.” —Ellen Oh, author of the *Prophecy* series “It is a moving story of the rebirth of hope in a teen who has lost almost everything. . . . Kai will resonate with teens on a simple human level, just as 3/11 resonates with 9/11.” —VOYA

The 99th Monkey Eliezer Sobel, 2008-02-01 Suffused with a unique brand of irreverent humor, this account recalls the autobiographical explorations of the most significant alternative communities, ashrams, gurus, shamans, and consciousness-raising seminars of the past 40 years. Serving as a human guinea pig for many of the most popular cutting-edge New Age, human potential, and spiritual experiments, Eliezer Sobel recounts intercontinental adventures in India, Israel, Brazil, and Haiti. From Primal Therapy to the Dalai Lama, this perceptively witty analysis includes brushes with cults, wild experiments with sex and

psychedelics, and encounters with visionary gurus and contemporary madmen.

Environmental Enrichment for Captive Animals Robert J. Young, 2013-05-07 Environmental enrichment is a simple and effective means of improving animal welfare in any species – companion, farm, laboratory and zoo. For many years, it has been a popular area of research, and has attracted the attention and concerns of animal keepers and carers, animal industry professionals, academics, students and pet owners all over the world. This book is the first to integrate scientific knowledge and principles to show how environmental enrichment can be used on different types of animal. Filling a major gap, it considers the history of animal keeping, legal issues and ethics, right through to a detailed exploration of whether environmental enrichment actually works, the methods involved, and how to design and manage programmes. The first book in a major new animal welfare series Draws together a large amount of research on different animals Provides detailed examples and case studies An invaluable reference tool for all those who work with or study animals in captivity This book is part of the UFAW/Wiley-Blackwell Animal Welfare Book Series. This major series of books produced in collaboration between UFAW (The Universities Federation for Animal Welfare), and Wiley-Blackwell provides an authoritative source of information on worldwide developments, current thinking and best practice in the field of animal welfare science and technology. The Art of Finding Nemo Mark Cotta Vaz, 2015-11-10 Pixar Animation Studios, the Academy Award-

winning creators of Toy Story, Toy Story 2, A Bug's Life, and Monsters, Inc., are bringing a new animated movie, Finding Nemo, to the screen this summer. This visually stunning underwater adventure follows eventful and comic journeys of two fish-a father and his son Nemo-who become separated in the Great Barrier Reef. The underwater world for the film was conceptualized and developed by the creative team of artists, illustrators, and designers at Pixar, resulting in a lush landscape rich with detail. The Art of Finding Nemo celebrates their talent, featuring concept and character sketches, storyboards, and lighting studies in a huge spectrum of media, from five-second sketches to intricate color pastels. This behind-the-scenes odyssey invites the reader into the elaborate creative process of animation films through interviews with all the key players at Pixar. There will be children's books related to Finding Nemo, but no adult titles other than this definitive volume. Revealing, insightful, and awesomely creative, The Art of Finding Nemo will delight film-goers, artists, and animation fans alike.
