Ubiquitous Computing Systems Hitomi Murakami, Hideyuki Nakashima, Hideyuki Tokuda, Michiaki Yasumura, 2005-08-29 This book is a collection of papers presented at UCS 2004, held on November 8–9 in Tokyo. UCS is a series of international symposia sponsored by the special interest group Ubiquitous Computing Systems of the Information Processing Society of Japan. The first UCS was held on November 17, 2003 in Kyoto. It was held as an invitation-based symposium. UCS 2004 was the second of the series, and the first submission-based conference. UCS focuses on the emerging research area of ubiquitous computing systems. This emergence is an outcome of the rapid evolution in smart appliances and devices, as well as tremendous advances in wireless networks and mobile computing. In the last few years, various applications of information technology have been changing our everyday life rapidly and to a large extent. The best example is the use of mobile phones. By getting new sensing devices, cameras, their application field is no longer limited to communication but covers data communications including Internet access, and data and program up-/downloading, and so on. The symposium offered the opportunity for in-depth exploration of the most recent research and development findings in the field of ubiquitous computing. The submitted papers presented at UCS 2004 suggest such a direction to future technologies, including mobile ad hoc networks, sensor networks and context-aware technologies.

Evolution from Cellular to Social Scales Arne T. Skjeltorp, Alexander V. Belushkin, 2008-09-30 Evolution is a critical challenge for many areas of science, technology and development of society. The book reviews general evolutionary facts such as origin of life and evolution of the genome and clues to evolution through simple systems. Emerging areas of science such as systems biology and bio-complexity are founded on the idea that phenomena need to be understood in the context of highly interactive processes operating at different levels and on different scales. This is where physics meets complexity in nature, and where we must begin to learn about complexity if we are to understand it. Similarly, there is an increasingly urgent need to understand and predict the evolutionary behavior of highly interacting man-made systems, in areas such as communications and transport, which permeate the modern world. The same applies to the evolution of human networks such as social, political and financial systems, where technology has tended to vastly increase both the complexity and speed of interaction, which is sometimes effectively instantaneous. The book contains reviews on such diverse areas as evolution experiments with microorganisms, the origin and evolution of viruses, evolutionary dynamics of genes and environment in cancer development, aging as an evolution-facilitating program, evolution of vision and evolution of financial markets.

Sports Cardiology Casebook Antonio Pelliccia, 2009-07-21 Comparatively little is known about the risk of sudden death associated with exercise in young competitive athletes, and whether the benefits of sports activity outweigh the hazards of exercise-related fatal events is a clinical dilemma. This is only a small part of the story, however, as there are considerable effects of exercise whether it be at a competitive level or on a 'leisure' level on patients of all ages. This in itself is of massive importance to the cardiac patient population as exercise is a key component of effective recovery and recommended as central in the prevention of much cardiac disease.

The Web Files Margie Palatini, 2001-05-01 6:32 a.m. This is the farm. My partner, Bill, and I were working the barnyard shift. It was peaceful. Quiet. Then we got the call. Much of this fowl-filled homage to Dragnet (DUM DE DUM DUM!) will be lost on kids--and a few grownups, for that matter. But that doesn't make this straight-faced send-up of that famous crime-partner show--and a dozen-odd fairytales thrown in for good measure--any less funny. So you're saying you were robbed, is that right, ma'am? What exactly is missing from the nest, ma'am? Eggs, ma'am? Chicks, ma'am? But it turns out that it's peppers that have gone missing--a peck of perfect purple, almost-pickled peppers. But nobody was talking: We had Horner in the corner and were trying to make Little Boy Blue quack. Then our intrepid pair of web-footed investigators gets a break in the case when a tub of tartest tasty tomahto turns up missing. DUM DE DUM DUM! It's just more wit from the wonderful Margie Palatini, who brought us Piggie Pie and Zoom Broom, backed up on this assignment by the spirited illustrations of Richard Egelski. (Ages 4 to 8)--Paul Hughes

Unexpected Risk Desiree Holt, 2020-12-14 Her so-called gift put her in perilous situations... Janet Rodman barely controlled her psi ability as an empath to teach school and hang with a few friends. She never knew when a wave of unsuitable emotions from others would assault her. She had learned to build walls to live her life but evil could break them down. A job as a private tutor kept her safe from assault...or so she thought. He wasn't looking for a woman in his life... Former SEAL and top tier attorney J. T. Fitzpatrick wasn't interested in bringing a woman into his house. A bitter divorce took care of that. But when his friends at The Phoenix Agency called on his help to rescue a woman in danger, how could he say no? He's unprepared for the instant attraction to Janet Rodman, but he's not looking for a relationship and this is supposed to be a strictly business deal. The Darkman isn't about to let some woman interrupt his mission in life... His plan is working perfectly, and the bodies are piling up. He can't let Janet Rodman screw them up. But when she disappears, he pulls out all stops to find and eliminate her. And he'll kill anyone who gets in the way. With the chemistry exploding between them, can the former SEAL keep Janet safe and destroy the killer before he destroys them?
