Ramachandran, Christopher O. Justice, Michael J. Abrams, 2010-12-14 *Land Remote Sensing and Global Environmental Change: The Science of ASTER and MODIS* is an edited compendium of contributions dealing with ASTER and MODIS satellite sensors aboard NASA's Terra and Aqua platforms launched as part of the Earth Observing System fleet in 1999 and 2002 respectively. ### **Remote Sensing Time Series** Claudia Kuenzer, Stefan Dech, Wolfgang

Wagner, 2015-04-28 This volume comprises an outstanding variety of chapters on Earth Observation based time series analyses, undertaken to reveal past and current land surface dynamics for large areas. What exactly are time series of Earth Observation data? Which sensors are available to generate real time series? How can they be processed to reveal their valuable hidden information? Which challenges are encountered on the way and which pre-processing is needed? And last but not least: which processes can be observed? How are large regions of our planet changing over time and which dynamics and trends are

visible? These and many other questions are answered within this book “Remote Sensing Time Series Analyses – Revealing Land Surface Dynamics”. Internationally renowned experts from Europe, the USA and China present their exciting findings based on the exploitation of satellite data archives from well-known sensors such as AVHRR, MODIS, Landsat, ENVISAT, ERS and METOP amongst others. Selected review and methods chapters provide a good overview over time series processing and the recent advances in the optical and radar domain. A fine selection of application chapters addresses multi-class land cover and land use change at national to continental scale, the derivation of patterns of vegetation phenology, biomass assessments, investigations on snow cover duration and recent dynamics, as well as urban sprawl observed over time.

*Hacking Kubernetes* Andrew Martin, Michael Hausenblas, 2021-10-13 Want to run your Kubernetes workloads safely and securely? This practical book provides a threat-based guide to Kubernetes security. You'll examine an abstract threat model of a distributed system running arbitrary workloads, and then progress to a detailed assessment of each component of a secure Kubernetes system. Understand where your Kubernetes system is vulnerable with threat modelling techniques Focus on pods, from configurations to attacks and defenses Secure your cluster and workload traffic Define and enforce policy with RBAC, OPA, and Kyverno Dive deep into sandboxing and isolation techniques Learn how to detect and mitigate supply chain attacks Explore filesystems, volumes, and sensitive information at rest Discover what can go wrong when running multitenant workloads in a cluster Learn what you can do if someone breaks in despite you having controls in place

**Towards Asia's Sustainable Development** Organisation for Economic Co-operation and Development, 2002 The Asian financial crisis and its social aftermath triggered a fundamental reappraisal of the role of social protection in Asia. Existing social protection programmes in many Asian countries were found to be insufficient and not well designed. It is now widely agreed that considerable effort is required to set up and further develop appropriate social protection mechanisms in the region. This book provides the proceedings of two meetings organised by the OECD to discuss the issue of developing social protection. It brings together perspectives of experts from Indonesia, Malaysia, the Philippines and Thailand, as well as contributions from Korea and Australia, plus the views of the Asian Development Bank, the International Labour Organisation and the World Bank. The book focuses on practical ways of developing programmes that can contribute positively to Asian social development. This book was edited by Peter Whiteford. This book is part of the OECD's on-going co-operation with non-Member economies around the world.
