**Every War Must End** Fred Charles Iklé,2005 Every War Must End analyzes the many critical obstacles to ending a war -- an aspect of military strategy that is frequently and tragically overlooked. Ikli considers a variety of examples from twentieth-century history and examines specific strategies that effectively won the peace. In the new preface, Ikli explains how U.S. political decisions and military strategy and tactics in Iraq have delayed, and indeed jeopardized, a successful end to hostilities.

Somalia: State Collapse and the Threat of Terrorism Ken Menkhaus,2013-11-05 This work explores Somalia's state collapse and the security threats posed by Somalia's prolonged crisis. Communities are reduced to lawlessness, and the interests of commercial elites have shifted towards rule of law, but not a revived central state. Terrorists have found Somalia inhospitable, using it mainly for short-term transshipment.

**The First Farmers of Central Europe** Penny Bickle,Alasdair Whittle,2013-07-09 From about 5500 cal BC to soon after 5000 cal BC, the lifeways of the first farmers of central Europe, the LBK culture (Linearbandkeramik), are seen in distinctive practices of longhouse use, settlement forms, landscape choice, subsistence, material culture and mortuary rites. Within the five or more centuries of LBK existence a dynamic sequence of changes can be seen in, for instance, the expansion and increasing density of settlement, progressive regionalisation in pottery decoration, and at the end some signs of stress or even localised crisis. Although showing many features in common across its very broad distribution, however, the LBK phenomenon was not everywhere the same, and there is a complicated mixture of uniformity and diversity. This major study takes a strikingly large regional sample, from northern Hungary westwards along the Danube to Alsace in the upper Rhine valley, and addresses the question of the extent of diversity in the lifeways of developed and late LBK communities, through a wide-ranging study of diet, lifetime mobility, health and physical condition, the presentation of the bodies of the deceased in mortuary ritual. It uses an innovative combination of isotopic (principally carbon, nitrogen and strontium, with some oxygen), osteological and archaeological analysis to address difference and change across the LBK, and to reflect on cultural change in general.

**Born of Wind** J. B. Lesel,2022-06-29 When the elements collide, the truth ignites Meleena never quite fitted in among her fellow aquatic Meruyans, always skipping school to hide out and marvel at the natural world around her. So when she wins a place on the coveted Council Apprenticeship team, no one is more surprised than she is. As she embarks on a tour of the nations, Meleena's curiosity catches the attention of the Warix, a race born with the power to control wind. But she is unprepared for the secrets she uncovers as she explores this new land. The Warix are locked in a deadly civil war, and her own people are being oppressed and exploited with no way out. Desperate to resolve this tangled conflict, Meleena sets out to locate an ancient weapon sought by both sides. Can she unite these warring peoples in time to save her own? The debut novel from J.B. Lesel throws you headlong into a diverse world where the elements take physical form to shape the lives of all. Perfect for fans of James Cameron's Avatar, and The Last Airbender.

Field and Galois Theory Patrick Morandi,2012-12-06 In the fall of 1990, I taught Math 581 at New Mexico State University for the first time. This course on field theory is the first semester of the year-long graduate algebra course here at NMSU. In the back of my mind, I thought it would be nice someday to write a book on field theory, one of my favorite mathematical subjects, and I wrote a crude form of lecture notes that semester. Those notes sat undisturbed for three years until late in 1993 when I finally made the decision to turn the notes into a book. The notes were greatly expanded and rewritten, and they were in a form sufficient to be used as the text for Math 581 when I taught it again in the fall of 1994. Part of my desire to write a textbook was due to the nonstandard format of our graduate algebra sequence. The first semester of our sequence is field theory. Our graduate students generally pick up group and ring theory in a senior-level course prior to taking field theory. Since we start with field theory, we would have to jump into the middle of most graduate algebra textbooks. This can make reading the text difficult by not knowing what the author did before the field theory chapters. Therefore, a book devoted to field theory is desirable for us as a text. While there are a number of field theory books around, most of these were less complete than I wanted.
