📖 **PROBABILITY AND STATISTICS** Michael J. Evans,Jeffrey S. Rosenthal,2004 Unlike traditional introductory math/stat textbooks, Probability and Statistics: The Science of Uncertainty brings a modern flavor based on incorporating the computer to the course and an integrated approach to inference. From the start the book integrates simulations into its theoretical coverage, and emphasizes the use of computer-powered computation throughout.* Math and science majors with just one year of calculus can use this text and experience a refreshing blend of applications and theory that goes beyond merely mastering the technicalities. They’ll get a thorough grounding in probability theory, and go beyond that to the theory of statistical inference and its applications. An integrated approach to inference is presented that includes the frequency approach as well as Bayesian methodology. Bayesian inference is developed as a logical extension of likelihood methods. A separate chapter is devoted to the important topic of model checking and this is applied in the context of the standard applied statistical techniques. Examples of data analyses using real-world data are presented throughout the text. A final chapter introduces a number of the most important stochastic process models using elementary methods. *Note: An appendix in the book contains Minitab code for more involved computations. The code can be used by students as templates for their own calculations. If a software package like Minitab is used with the course then no programming is required by the students.

📖 **TALES FROM THE SLOT FLOOR, VOLUME 1: CASINO SLOT MANAGERS IN THEIR OWN WORDS** David G. Schwartz,2018-06-22 Slot machines are the backbone of most casinos. They earn the most money and determine the physical layout of the casino floor. The management of slot machines, which includes overseeing employees, selecting machines, designing the playing space, resolving customer disputes, and conducting analyses to improve operations, is a challenging field whose complexity has grown as the machines themselves have become more sophisticated. To better document the current issues in slot management--and the change the field has seen over the past four decades--the University of Nevada, Las Vegas Center for Gaming Research conducted an oral history project. Those interviewed were at all stages of their careers. Drawn from these interviews, Tales from the Slot Floor features slot managers discussing several of the most important issues in today’s casino world, including: the optimal layout of a slot floor; the qualities demonstrated by both good and bad managers; what customers want from their visits to the casino; the vendor/casino relationship; appealing to millennials; and what the future holds. In addition, those with long careers share their views on the changes they have seen, and all subjects offer their advice to those embarking on a career in slot management. For those interested in becoming slot managers, or those just curious about how casinos work, Tales from the Slot Floor gives you the inside story of slot operations, from those who do it.

📖 **THE ENDURING CHALLENGE OF CONCENTRATED POVERTY IN AMERICA** David Erickson,2008 This report--a joint effort of the Federal Reserve’s Community Affairs Function and the Brookings Institution’s Metropolitan Policy Program--examines the issue of concentrated poverty and profiles 16 high-poverty communities from across the country, including immigrant gateway, Native American, urban, and rural communities. Through these case studies, the report contributes to our understanding of the dynamics of poor people living in poor communities, and the policies that will be needed to bring both into the economic mainstream. It is not the intention of this publication to explain poverty causation. Instead, the goal is to add texture to our understanding of where and how concentrated poverty exists, by studying new areas and by interviewing local stakeholders, including residents, community leaders, and government representatives, to understand how concentrated poverty affects both individuals and communities. The report begins with Concentrated Poverty in America: An Overview (Alan Berube) and Introduction to the Case Studies (Carolina Reid). It then presents the following 16 case studies: (1) Fresno, California: the West Fresno neighborhood (Naomi Cytron); (2) Cleveland, Ohio: the Central neighborhood (Lisa Nelson); (3) Miami, Florida: the Little Haiti neighborhood (Ana Cruz-Taura and Jessica LeVeen Farr); (4) Martin County, Kentucky (Jeff Gatica); (5) Blackfeet Reservation, Montana (Sandy Gerber, Michael Grover, and Sue Woodrow); (6) Greenville, North Carolina: the West Greenville neighborhood (Carl Neel); (7) Atlantic City, New Jersey: the Bungalow Park/Marina District area (Harriet Newburger, John Wackes, Keith Rolland, and Anita Sands); (8) Austin, Texas: the East Austin neighborhood (Elizabeth Sobel); (9) McKinley County, New Mexico: Crownpoint (Steven Shepelwich and Roger Zalneraitis); (10) McDowell County, West Virginia (Courtney Anderson Mailey); (11) Albany, Georgia: the East Albany neighborhood (Jessica LeVeen Farr and Sibyl Slade); (12) El Paso, Texas: the Chamizal neighborhood (Roy Lopez); (13) Springfield, Massachusetts: Old Hill, Six Corners, and the South End neighborhoods (DeAnna Green); (14) Rochester, New York: the Northern Crescent neighborhoods (Alexandra Forter Sirota and Yazmin Osaki); (15) Holmes County, Mississippi (Ellen Eubank); and (16) Milwaukee, Wisconsin: the Northwest neighborhood (Jeremiah Boyle). Following these case studies is Learning from Concentrated Poverty in America: A Synthesis of Themes from the Case Studies (Alan Berube, David Erickson, and Carolina Reid). Appended to this report are: (A) References for Comparison Statistics Tables; (B) Literature Review: Federal Reserve System Poverty-Related Research; (C) References for Overview in Alphabetical Order (by first author); and (D) Photo Credits. (Individual case studies contain tables, figures, and footnotes.).
