Hereafter Tara Hudson,2011-06-07 Can there truly be love after death? Drifting in the dark waters of a mysterious river, the only thing Amelia knows for sure is that she's dead. With no recollection of her past life—or her actual death—she's trapped alone in a nightmarish existence. All of this changes when she tries to rescue a boy, Joshua, from drowning in her river. As a ghost, she can do nothing but will him to live. Yet in an unforgettable moment of connection, she helps him survive. Amelia and Joshua grow ever closer as they begin to uncover the strange circumstances of her death and the secrets of the dark river that held her captive for so long. But even while they struggle to keep their bond hidden from the living world, a frightening spirit named Eli is doing everything in his power to destroy their newfound happiness and drag Amelia back into the ghost world . . . forever. Thrilling and evocative, with moments of pure pleasure, Hereafter is a sensation you won't want to miss.

What the Face Reveals Paul Ekman,Erika L. Rosenberg,2005-04-14 While we have known for centuries that facial expressions can reveal what people are thinking and feeling, it is only recently that the face has been studied scientifically for what it can tell us about internal states, social behavior, and psychopathology. Today's widely available, sophisticated measuring systems have allowed us to conduct a wealth of new research on facial behavior that has contributed enormously to our understanding of the relationship between facial expression and human psychology. The chapters in this volume present the state-of-the-art in this research. They address key topics and questions, such as the dynamic and morphological differences between voluntary and involuntary expressions, the relationship between what people show on their faces and what they say they feel, whether it is possible to use facial behavior to draw distinctions among psychiatric populations, and how far research on automating facial measurement has progressed. The book also includes follow-up commentary on all of the original research presented and a concluding integration and critique of all the contributions made by Paul Ekman. As an essential reference for all those working in the area of facial analysis and expression, this volume will be indispensable for a wide range of professionals and students in the fields of psychology, psychiatry, and behavioral medicine.

Foot and mouth disease 2007 Great Britain: Department for Environment, Food and Rural Affairs,2008-03-11 The 2001 outbreak of Foot and Mouth was set out in a report published in 2002, providing an analysis of what happened with recommendations (HCP 888, session 2001-02, ISBN 9780102976243). Another FMD outbreak occurred in the Summer of 2007 and the Government again asked Dr Iain Anderson to conduct a review and find out if the lessons of 2001 had been learned and whether new recommendations are needed. This report is built around the findings of 2001, with a particular look at the Pirbright facility, the source of the virus incriminated in this recent outbreak. Dr Anderson's states that he found much to applaud in the handling of the 2007 outbreak along with some deficiencies, but states the positive outweighs the negative. The report commends the strong leadership of the Prime Minister, as well as the contingency planning and better integration of scientific advice and the capabilities at the centre of disease control strategies. External communication was also greatly improved. Less encouraging were the inadequate infrastructure and governance of the Pirbright facility where the Institute for Animal Health is located and the poor regulatory regime in place to licence work with dangerous animal pathogens. Defra's information systems too were found wanting. The report also recommends that the Institute of Animal Health should become the new National Institute of Infectious Diseases, supported by multiple sources of funding from government and elsewhere. Also recommended is the creation of an Independent Advisory Committee on Animal and Emerging Infectious Diseases, combining a high level group of experts along with other stakeholders with a mission to provide independent advice to government and link closely with the Government's and departmental Chief Scientific Advisors and include the Chief Veterinary Office and Chief Medical Officer amongst its members. The publication is divided into five sections: Section 1: Foreword; Section 2: Summary and recommendations; Section 3: Lessons learned, the lessons are - Lesson 1: Maintain vigilance; Lesson 2: Be prepared; Lesson 3: React with speed and certainty; Lesson 4: Explain policies, plans and practices; Lesson 5: Respect local knowledge; Lesson 6: Apply risk assessment and cost benefit analysis; Lesson 7: Use data and information management systems; Lesson 8: Have a legislative framework; Lesson 9: Base policy decisions on the best available science; Section 4: Pirbright; Section 5: Appendices.
