Land and Environmental Management Through Forestry Abhishek Raj,Manoj Kumar Jhariya,Arnab Banerjee,Sharad Nema,Kiran Bargali,2023-07-25 LAND AND ENVIRONMENTAL MANAGEMENT THROUGH FORESTRY Written and edited by a group of experts in the field, this groundbreaking reference work sets the standard for engineers, students, and professionals working in forestry, agriculture, ecology, and environmental science, offering the scientific community a way toward combating climate change and land degradation. This outstanding new volume covers the diverse issues of land degradation around the world and its restoration through forestry, agroforestry, and other practices. The editors have integrated many different concepts and applications into a single place from which scientists, research scholars, academicians, and policymakers can benefit. New insights in this area are critical, as our very existence depends on forest sustainability and land restoration management. The work consists of chapters addressing the issues of land degradation, deforestation, intensive agricultural practices, sustainable intensification, soil and forest-related services, land and environmental management, and overall sustainability of the ecosystem. The contributors address current issues and their management through a holistic and integrated approach, presenting the context of land degradation and its problem, identifying the potential areas of research in the field of land restoration, identifying the land-based services and their potential role for ecosystem sustainability, creating awareness so that future policies can be framed for the betterment of human civilization, and addressing sustainable intensification for land and environmental management and service. A standard reference work for the disciplines of forestry, agriculture, ecology, and environmental science, it will also be a way forward for combating climate change. Useful to academics, researchers, ecologists, environmentalists, students, capacity builders, and policymakers, it is a must-have for any library.

Ghana's Economic and Agricultural Transformation Xinshen Diao,Peter Hazell,Shashidhara Kolavalli,Danielle Resnick,2019-08-22 Many African countries have experienced unprecedented rates of economic growth in recent years, yet their economic transformations display features that could constrain their future growth prospects. Patterns of urbanization without industrialization, rapid growth of low productivity jobs in the informal economy, and a neglected agricultural sector with increased need for important foods are all areas for concern as Africa continues to develop. Using Ghana as a case study, Ghana's Economic and Agricultural Transformation: Past Performance and Future Prospects integrates economic and political analysis to explore the challenges and opportunities of Africa's transformation. It examines Ghana's overall economic performance since it went through a major Structural Adjustment Program in the early 1980s, and provides an in-depth empirical analysis of the broader economy and the agricultural sector over the last four decades. It explains why Ghana has not transformed its economy more substantially, why its agriculture sector has not played a greater role beyond cocoa production, and what must be done in the future to achieve a successful transformation. In addressing these puzzles Ghana's Economic and Agricultural Transformation considers what the rest of the world can learn from Ghana's experience.

New Creation Eschatology and the Land Steven L. James, 2017-09-27 What will the final state of the redeemed look like? Throughout the history of the church, conceptions of the final state have tended to minimize the promise of the new heavens and new earth. In contrast to the historical dominance of spiritual, heavenly, non-temporal conceptions of the final state, the last two decades have witnessed a rise in conceptions that include the redemption of material, earthly, and temporal reality. These "new creation" conceptions have included proposals regarding the fulfillment of Old Testament land promises. In *New Creation Eschatology and the Land*, Steven L. James argues that in recent new creation conceptions of the final state there is a logical inconsistency between the use of Old Testament texts to inform a renewed earth and the exclusion of the territory of Israel from that renewed earth. By examining a select group of new creationists, James shows that the exclusion of the territorial restoration of Israel in a new creation conception fails to appreciate the role of the particular territory in Old Testament prophetic texts and results in an inconsistent new creationism.
