New York Magazine ,1992-10-12 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

Tourism and Innovation C. Michael Hall,Allan M. Williams,2019-11-25 This ground-breaking volume on the relationships between tourism and innovation provides an overview of relevant innovation theories and related literatures on entrepreneurship, productivity, regional development and competitiveness, and their significance to contemporary tourism practices. Innovation is a key concept in business and entrepreneurial studies and the broader social sciences. Yet, despite its policy and academic importance, historically little attention has been given to the role of innovation in tourism and the corresponding contribution of tourism-related human mobility to regional, firm, and product innovation. This book emphasises that innovation in tourism is much more than a series of technological innovations, as important as they are, and instead needs to be understood in an economic, social, and political context, with particular stress being placed on the extent to which innovations are shaped by the framework of governance and regulation, as well as by institutional factors and activities of individual actors and entrepreneurs. It is structured so as to introduce the reader to the overall significance of innovation at various levels and the role that innovation plays in firm and place competition. Supported with case studies throughout, this book is essential reading for all tourism students.

Fortune's Formula William Poundstone,2010-06-01 In 1956, two Bell Labs scientists discovered the scientific formula for getting rich. One was mathematician Claude Shannon, neurotic father of our digital age, whose genius is ranked with Einstein's. The other was John L. Kelly Jr., a Texas-born, gun-toting physicist. Together they applied the science of information theory—the basis of

computers and the Internet—to the problem of making as much money as possible, as fast as possible. Shannon and MIT mathematician Edward O. Thorp took the Kelly formula to Las Vegas. It worked. They realized that there was even more money to be made in the stock market. Thorp used the Kelly system with his phenomenally successful hedge fund, Princeton-Newport Partners. Shannon became a successful investor, too, topping even Warren Buffett's rate of return. Fortune's Formula traces how the Kelly formula sparked controversy even as it made fortunes at racetracks, casinos, and trading desks. It reveals the dark side of this alluring scheme, which is founded on exploiting an insider's edge. Shannon believed it was possible for a smart investor to beat the market—and William Poundstone's Fortune's Formula will convince you that he was right.

Divining Victory: Airpower in the 2006 Israel-Hezbollah War William M. Arkin,2011-09-16 This is the story of an airpower-dominated campaign, one that was deeply flawed in its design yet impressive in its efficiency. This quick-look study is based upon visits to damaged sites, villages, towns, and cities; discussions with government and military officials; and experience of having evaluated airpower and its effects in Afghanistan, Iraq, and the former Yugoslavia (and previously in Lebanon). Months of follow-up research included exchanges with Israeli, Lebanese, Hezbollah, and US experts. The intent was to develop a timely airpower narrative to enhance professional military education and planning. About the author: William M. Arkin is an independent military analyst, journalist, and author. He writes the "Early Warning" column for washingtonpost.com (where he previously wrote the "DOT.MIL" column from 1998 to 2003) and is a longtime NBC News military analyst.(Originally published by Air University Press)
