*The Captive Kingdom (The Ascendance Series, Book 4)*

Jennifer A. Nielsen, 2020-10-06 Acclaimed author Jennifer A. Nielsen returns to the beloved world of her New York Times bestseller *The False Prince* in a highly anticipated fourth book in the Ascendance Series! In a peaceful Carthya, Jaron leads as the Ascendant King with Imogen beside him -- but the peace he fought so long for is not destined to last. On a routine sea voyage, Jaron's ship is brutally attacked, and he is taken hostage. The mysterious captors and their leader, Jane Strick, accuse Jaron of unthinkable acts. They are also in possession of some shocking items -- including the crown and sword that belonged to Jaron's older brother, Darius. The items unearth a past Jaron thought he had put behind him. Though it seems impossible, Jaron must consider: Could Darius be alive? And what does Strick want from Jaron? Against his will, Jaron will be pulled back into a fight for the throne -- and a battle to save his kingdom. Return to Carthya to uncover new secrets, high-stakes action, and Jennifer A. Nielsen's signature breathtaking twists.

The Last Elephants Colin Bell, Don Pinnock, 2019-03-01

The Africa-wide Great Elephant Census of 2016 produced

shocking findings: a decimated elephant population whose numbers were continuing to plummet. Elephants are killed, on average, every 15–20 minutes – a situation that will see the final demise of these intelligent, extraordinary animals in less than three decades. They are a species in crisis. This magnificent book offers chapters written by the most prominent people in the realm of conservation and wildlife, among them researchers, conservationists, film makers, criminologists, TV personalities and journalists. Photographs have been selected from among Africa's best wildlife photographers, and the Foreword is provided by Prince William. It is hoped this book will create awareness of the devastating loss of elephant lives in Africa and stem the tide of poaching and hunting; that it will inspire the delegates to CITES to make informed decisions to ensure that all loopholes in the ivory trade are closed; and that countries receiving and using ivory (both legal and poached) – primarily China, Vietnam, Laos and Japan – ban and strenuously police its trade and use within their borders, actively pursuing and arresting syndicate leaders driving the cruel poaching tsunami. This book is also a tribute to the many people who work for the welfare of elephants, particularly those who risk their lives for wildlife each day, often for little or no pay – in particular the field rangers and the anti-poaching teams; and to the many communities around Africa that have elected to work with elephants and not against them. The Last Elephants – is the title prophetic? We hope not, but the signs are worrying.

### **Aesthetic Theory** Theodor W. Adorno

Adorno, 2020-06-09 Perhaps the most important aesthetics of the twentieth century appears here newly translated, in English that is for the first time faithful to the intricately demanding language of the original German. The culmination of a lifetime of aesthetic investigation, *Aesthetic Theory* is Adorno's major work, a defense of modernism that is paradoxical in its defense of illusion. In it, Adorno takes up the problem of art in a day when "it goes without saying that nothing concerning art goes without saying." In the course of his discussion, Adorno revisits such concepts as the sublime, the ugly, and the beautiful, demonstrating that concepts such as these are reservoirs of human experience. These experiences ultimately underlie aesthetics, for in Adorno's formulation "art is the sedimented history of human misery." Robert Hullot-Kentor's translation painstakingly, yet fluently, reproduces the nuances and particularities of the original. Long awaited and significant, *Aesthetic Theory* is the clarifying lens through which the whole of Adorno's work is best viewed, providing a framework within which his other

major writings cohere.

**The Solaris Effect** Steven Dillon, 2010-01-01 What do contemporary American movies and directors have to say about the relationship between nature and art? How do science fiction films like Steven Spielberg's *A.I.* and Darren Aronofsky's  $\pi$  represent the apparent oppositions between nature and culture, wild and tame? Steven Dillon's intriguing new volume surveys American cinema from 1990 to 2002 with substantial descriptions of sixty films, emphasizing small-budget independent American film. Directors studied include Steven Soderbergh, Darren Aronofsky, Todd Haynes, Harmony Korine, and Gus Van Sant, as well as more canonical figures like Martin Scorsese, Robert Altman, David Lynch, and Steven Spielberg. The book takes its title and inspiration from Andrei Tarkovsky's 1972 film *Solaris*, a science fiction

ghost story that relentlessly explores the relationship between the powers of nature and art. The author argues that American film has the best chance of aesthetic success when it acknowledges that a film is actually a film. The best American movies tell an endless ghost story, as they perform the agonizing nearness and distance of the cinematic image. This groundbreaking commentary examines the rarely seen bridge between select American film directors and their typically more adventurous European counterparts. Filmmakers such as Lynch and Soderbergh are cross-cut together with Tarkovsky and the great French director, Jean-Luc Godard, in order to test the limits and possibilities of American film. Both enthusiastically cinephilic and fiercely critical, this book puts a decade of U.S. film in its global place, as part of an ongoing conversation on nature and art.

*Origin of Negative Dialectics* Susan Buck-Morss, 1979-12 Susan Buck-Morss examines and stresses the significance of Critical Theory for young West German intellectuals after World War II. Looking at the differences between German and American situations during this time period, *Origin of Negative Dialectics* convincingly sketches the learning process that ended in antagonism. "[The *Origin of Negative Dialectics*] is by far the best introduction for the American reader to the complex, esoteric, and illusive structure of thought of one of the most seminal Marxian thinkers of the twentieth century. It belongs on the same shelf as Martin Jay's history of the Frankfurt School, *The Dialectical Imagination*." – Lewis A. Coser, State University of New York, Stony Brook
