The Captive Kingdom (The Ascendance Series, Book 4) Jennifer A. Nielsen, 2020-10-06 Acclaimed author Jennifer A. Nielsen returns to the beloved world of her New York Times bestseller *The False Prince* in a highly anticipated fourth book in the Ascendance Series! In a peaceful Carthya, Jaron leads as the Ascendant King with Imogen beside him -- but the peace he fought so long for is not destined to last. On a routine sea voyage, Jaron's ship is brutally attacked, and he is taken hostage. The mysterious captors and their leader, Jane Strick, accuse Jaron of unthinkable acts. They are also in possession of some shocking items -- including the crown and sword that belonged to Jaron's older brother, Darius. The items unearth a past Jaron thought he had put behind him. Though it seems impossible, Jaron must consider: Could Darius be alive? And what does Strick want from Jaron? Against his will, Jaron will be pulled back into a fight for the throne -- and a battle to save his kingdom. Return to Carthya to uncover new secrets, high-stakes action, and Jennifer A. Nielsen's signature breathtaking twists.

Art of the Cut Steve Hullfish, 2017-02-24 *Art of the Cut* provides an unprecedented look at the art and technique of contemporary film and television editing. It is a fascinating virtual roundtable discussion with more than 50 of the top editors from around the globe. Included in the discussion are the winners of more than a dozen Oscars for Best Editing and the nominees of more than forty, plus numerous Emmy winners and nominees. Together they have over a thousand years of editing experience and have edited more than a thousand movies and TV shows. Hullfish carefully curated over a hundred hours of interviews, organizing them into topics critical to editors everywhere, generating an extended conversation among colleagues. The discussions provide a broad spectrum of opinions that illustrate both similarities and differences in techniques and artistic approaches. Topics include rhythm, pacing, structure, storytelling and collaboration. Interviewees include Margaret Sixel (*Mad Max: Fury Road*), Tom Cross (*Whiplash*, *La La Land*), Pietro Scalia (*The Martian*, *JFK*), Stephen Mirrione (*The Revenant*), Ann Coates (*Lawrence of Arabia*, *Murder on the Orient Express*), Joe Walker (*12 Years a Slave*, *Sicario*), Kelley Dixon (*Breaking Bad*, *The Walking Dead*), and many more. *Art of the Cut* also includes in-line definitions of editing terminology, with a full glossary and five supplemental web chapters hosted online at www.routledge.com/cw/Hullfish. This book is a treasure trove of valuable tradecraft for aspiring editors and a prized resource for high-level working professionals. The book's accessible language and great behind-the-scenes insight makes it a fascinating glimpse into the art of filmmaking for all fans of cinema. Art-Rite Walter Robinson, Edit DeAk, 2019-10-16 This facsimile edition collects all 19 issues of 'Art-Rite' magazine, edited by art critics Walter Robinson and Edit DeAk from 1973 to 1978. Robinson, DeAk and a third editor, Joshua Cohn, met as art history students at Columbia University, and were inspired to found the magazine by their art criticism teacher, Brian O'Doherty. 'Art-Rite', cheaply produced on newsprint, served as an important alternative to the established art magazines of the period. 'Art-Rite' ran for only five years, and published only 19 issues. But in that time the magazine featured contributions from hundreds of artists, a list that now reads like a who's-who of 1970s art: Yvonne Rainer, Gordon Matta-Clark, Alan Vega (Suicide), William Wegman, Nancy Holt, Jack Smith, Dorothea Rockburne, Robert Morris, Adrian Piper, Laurie Anderson, Carolee Schneemann and Carl Andre; critics such as Lucy Lippard contributed writing. Through its single-artist issues and its thematic issues on performance, video and artists' books, 'Art-Rite' championed the new art of its era.

ArtTalk, Student Edition McGraw-Hill Education, 1999-05-06 The perfect blend of art criticism, art history, aesthetics, and studio production *ArtTalk* is the most comprehensive multilevel art education program available. It has expanded its coverage of art history, strengthened its technology integration features, and placed more emphasis on the performing arts--all while maintaining its focus on a media approach to the elements and principles of art. Students learn to look at, appreciate, and criticize art through more than 200 artworks that represent a variety of cultures, styles, and media. At the same time, they develop their creativity and studio skills by participating in a multitude of hands-on experiences.

The Modern Wing James B. Cuno, Paul Goldberger, Joseph Rosa, Judith Turner, 2009 This volume celebrates the construction of the largest expansion in the history of the Art Institute of Chicago. Designed by Renzo Piano, principal of the Renzo Piano Building Workshop, with offices in Paris and Genoa, the Modern Wing adds a bold new Modernist structure to Chicago's downtown lakefront area, directly across the street from the successful Millennium Park and its major feature, the Jay Pritzker Pavilion designed by Frank Gehry. The story of the Modern Wing - from its commissioning in 1999, to its groundbreaking in 2005, to its dedication in May 2009 - is told in this volume by the Art Institute's president and director, James Cuno. In addition, well-known architecture critic Paul Goldberger places the Modern Wing in the context of the Art Institute's existing buildings and its many additions through the years. Throughout this book, the many remarkable features of the Modern Wing - its galleries and grand spaces, its flying carpet and its enclosed garden - are celebrated in the photographs of Paul Warchol. --Book Jacket.

Database Design and Implementation Edward Sciore, 2020-02-27 This textbook examines database systems from the viewpoint of a software developer. This perspective makes it possible to investigate why database systems are the way they are. It is of course important to be able to write queries, but it is equally important to know how they are processed. We e.g. don't want to just use JDBC; we also want to know why the API contains the classes and methods that it does. We need a sense of how hard is it to write a disk cache or logging facility. And what exactly is a database driver, anyway? The first two chapters provide a brief overview of database systems and their use. Chapter 1 discusses the purpose and features of a database system and introduces the Derby and SimpleDB systems. Chapter 2 explains how to write a database application using Java. It presents the basics of JDBC, which is the fundamental API for Java programs that interact with a database. In turn, Chapters 3-11 examine the internals of a typical database engine. Each chapter covers a different database component, starting with the lowest level of abstraction (the disk and file manager) and ending with the highest (the JDBC client interface); further, the respective chapter explains the main issues concerning the component, and considers possible design decisions. As a result, the reader can see exactly what services each component provides and how it interacts with the other components in the system. By the end of this part, s/he will have witnessed the gradual development of a simple but completely functional system. The remaining four chapters then focus on efficient query processing, and focus on the sophisticated techniques and algorithms that can replace the simple design choices described earlier. Topics include indexing, sorting, intelligent buffer usage, and query optimization. This text is intended for upper-level undergraduate or beginning graduate courses in Computer Science. It assumes that the reader is comfortable with basic Java programming; advanced Java concepts (such as RMI and JDBC) are fully explained in the text. The respective chapters are complemented by "end-of-chapter readings" that discuss interesting

ideas and research directions that went unmentioned in the text, and provide references to relevant web pages, research articles, reference manuals, and books. Conceptual and programming exercises are also included at the end of each chapter. Students can apply their conceptual knowledge by examining the SimpleDB (a simple but fully functional database system created by the author and provided online) code and modifying it.

Andy Warhol: Liz ,2012-04-17 Andy Warhol's iconic portraits of Elizabeth Taylor are images that have lost none of their explosive power in the decades that separate the present from the moment of their making. Frequently hailed as the greatest movie star of all time, Elizabeth Taylor was a friend of Andy Warhol in the 1970s and 1980s. The personification of charisma, whose highly public life was charged with drama, tragedy, and romance, this iconic muse was a perfect vehicle for Warhol's vivid silk-screen portraiture derived from press clippings, publicity shots, and film stills. Warhol made over fifty portraits of Taylor in all her incarnations—from the ethereally beautiful child actress in National Velvet to the commanding, voluptuous screen goddess of Cleopatra. Andy Warhol: Liz sheds light on the relationship between Warhol and one of his most notorious muses.

I Want My Book Back Viviane Elbee,2022-06-28 A splendid story about the satisfaction that comes from sharing joy (and dinosaurs) with others.--Booklist Emotions run high in this volume about a child's deep attachment giving way to sharing... Elbee's take on the emotional attachment that readers form with books feels apt, and a final portrait of Daryl discovering that books can be shared pays ample tribute to libraries. -- Publishers Weekly The book's fun illustrations emphasize Daryl's big and scary emotions, including distress, grumpiness, rage, and despair; solace is to be found only somewhere unexpected: in sharing.--Foreward Reviews Daryl loves the dinosaur book he checked out from the library; it takes him on roaring, stomping dinosaur adventures! So Daryl is unhappy when he has to return it, and he'll do anything to get his book back! Daryl loves to play with his favorite library book about dinosaurs. His imagination takes him to prehistoric places, and he pretends to be a triceratops, microraptor, and even a T. rex! But Daryl does not want to share his book, so when he has to return it to the library, Daryl goes wild. Using all of his dinosaur skills, Daryl tries his best to get his book back! But when a clever librarian notices Daryl's passion, she encourages him to share his favorite book and make some new friends along the way. This playful, silly, funny, tale about reading, books, and sharing is sure to be a hit with any child.

Regulation of Genome Editing in Plant Biotechnology Hans-Georg Dederer,David Hamburger,2019-08-16 This book provides in-depth insights into the regulatory frameworks of five countries and the EU concerning the regulation of genome edited plants. The country reports form the basis for a comparative analysis of the various national regulations governing genetically modified organisms (GMOs) in general and genome edited plants in particular, as well as the underlying regulatory approaches.The reports, which focus on the regulatory status quo of genome edited plants in Argentina, Australia, Canada, the EU, Japan and the USA, were written by distinguished experts following a uniform structure. On this basis, the legal frameworks are compared in order to foster a rational assessment of which approaches could be drawn upon to adjust, or to completely realign, the current EU regime for GMOs. In addition, a separate chapter identifies potential best practices for the regulation of plants derived from genome editing.

An Evening with JonBenet Ramsey Walter A Davis,2004-02-01 An Evening With JonBenét Ramsey begins with a full-length play, Cowboy's Sweetheart, which imagines the life of a sexually abused and murdered child as it might have evolved had she lived. The play is followed by two essays which consider the JonBenét Ramsey case from a number of perspectives. The result is an incisive critique of the media and a compelling study of the psychological consequences of what is a national epidemic: the sexual abuse of children. Email: davis.65@osu.edu

Basic Data Elements for Elementary and Secondary Education Information Systems ,1997 Since the creation of the National Cooperative Educational Statistics System in 1988, states have joined with the National Center for Education Statistics to produce and maintain comparable and uniform education statistics. Through the National Forum on Education Statistics, states have met to develop and propose a set of basic data elements for voluntary use. Using these data elements will provide more comparable and reliable education information for any educational system adopting the common terminology. The basic data elements will not meet every education information purpose, but a set of basic data elements should help answer the most frequently asked questions about the administration, status, quality, operation, and performance of schools and school systems. This report presents a process for selecting and including new data elements in an information system and the student and staff elements that can be used to create information for conducting the day-to-day administration of schools and school districts; completing federal and state reports, and creating indicators that address questions about the success and functioning of education systems. The basic data elements selected for student information systems are grouped into categories of: (1) personal information; (2) enrollment; (3) school participation and activities; (4) assessment; (5) transportation; (6) health conditions, special program participation, and student support services; and (7) discipline. Similar elements defined for staff information systems include personal information, educational background, qualification information, current employment, assignments, and information on career development and separation from employment. An appendix contains discussions of policy questions, indicators, and basic data elements. (SLD)
