**American Watercolor in the Age of Homer and Sargent** Kathleen A. Foster,Philadelphia Museum of Art,2017-01-01 The fascinating story of the transformation of American watercolor practice between 1866 and 1925 The formation of the American Watercolor Society in 1866 by a small, dedicated group of painters transformed the perception of what had long been considered a marginal medium. Artists of all ages, styles, and backgrounds took up watercolor in the 1870s, inspiring younger generations of impressionists and modernists. By the 1920s many would claim it as the American medium. This engaging and comprehensive book tells the definitive story of the metamorphosis of American watercolor practice between 1866 and 1925, identifying the artist constituencies and social forces that drove the new popularity of the medium. The major artists of the movement - Winslow Homer, John Singer Sargent, William Trost Richards, Thomas Moran, Thomas Eakins, Charles Prendergast, Childe Hassam, Edward Hopper, Charles Demuth, and many others - are represented with lavish color illustrations. The result is a fresh and beautiful look at watercolor's central place in American art and culture.

Aquarelle means water. In these paints, the colors are made of pigments mixed in water based liquid. Water color painting had bloomed in England, somewhere in eighteenth century. Basically water colors history goes as far as cave men. The cave men were actually the first people who used colors that were water based to paint their ritual paintings in caves. They used their hands and fingers to paint different animals on cave walls. The ancient Egyptians also used water based paints to tell their stories. They painted stories of power, drought, and blessings on their walls. The Egyptians also painted on paper that was made of papyrus with water based colors. The Chinese and Japanese also used water colors for their works. These artists worked on fabric and used silk as their work surface to paint literature and calligraphy. Chinese calligraphy is renowned throughout the world and many Chinese artists still use water based inks. After that, from China the tradition was taken to western world. The Indians and Persians used water based paints in their works of decoration, and the Muslims used them to show their religious history. Paper, off course, played its role in flourishing of our beloved water colors. We can give the credit to Chinese. Chinese were very good at creating paper. They had handmade papers of best qualities. In the eighth century, the Arabs came to know their ways of making papers. Europeans imported paper for a long time until they managed to open their own mill in Italy. In early ages paper was considered a great luxury as it was very expensive. This was one of the major reasons why the water color paintings did not flourish for a long time. When paper became available to people the great artists like Leonardo de Vinci started using it for their drawings. Albrecht Durer, a German artist, is known to be the first master of water colors. Among his many paintings, the Owl is worth seeing and worth studying. The depth of the eyes and the softness of the bird are very evident. Water color is a type of medium that is very unpredictable. A water colorist, in most of the cases and techniques has to be fast. This comes with time and experience. The more you paint, the more you learn. Trial and error does count. In water color all the colors are water based. Be it water color tubes or cakes. It depends on individual artist what he/she is comfortable with; otherwise, the pan and the tube colors work the same. There isn't much difference as far as you are using good quality brands. For a beginner it is better to use affordable beginner's paints. Usually it is mentioned on the box as 'Beginners Quality.'

All of them are beautiful. Some are easy and some are difficult to control. But with practice, you can get hold of every technique. Most of the techniques give a tie and dye effect. If you can control these effects, you can make beautiful backgrounds and even create beautiful art work through these techniques. These techniques can be used in many different places to give different effects for example making a water stream with the help of salt. I am going to teach you different techniques and how you can create beautiful paintings through them. This book contains activities by which you will learn to control your color, brush strokes, and many other things. Here I hope I will be able to transfer as much knowledge as I can in a possibly detailed manner. If you were in a class, I would be open to questions. But that is not the case in our situation, so I want to make sure that by the time you finish this book, you won't have any questions left. I am keeping the struggles in my mind, that I made just to learn this technique and how I wished I could get one person or a single book that could be my fairy god mother and teach me everything I needed to know in a wave of a wand. That didn't happen of course. But I did learn and now that I know, I want to transfer

my knowledge to you. You will get a chance to play with colors and many different materials. In the end you will be amazed by how we can merge these techniques and turn them into awesome paintings. Even a beginner can learn from this book and turn these techniques into paintings by following the steps.

*Fall-out Shelters for the Human Spirit* Michael L. Krenn,2005 During the Cold War, when the United States believed that it was locked in a life-or-death struggle with the Soviet Union for the hearts and minds of people throughout the world, culture became another weapon in the battle against communism. Part of that effort in cultural diplomacy included a program to arrange the exhibition of hundreds of American paintings overseas. Michael L. Krenn studies the successes, failures, contradictions, and controversies that arose when the U.S. government and the American art establishment sought to work together to make an international art program a reality between the 1940s and the 1970s.
