Ice Shane Johnson,2002-07-16 In the late 1960s, NASA proposed hardware and mission parameters for an extended Apollo program that never materialized. Decades later, the existence of ice beds at the lunar south pole was discovered by NASA's space probe Clementine and confirmed by the lunar satellite Lunar Prospector. Now, author and Apollo missions historian Shane Johnson explores the fantastic possibilities of what might have transpired, had the more ambitious version of the Apollo program gone forward as originally planned. It is February, 1975. Apollo 19, the last of the manned lunar missions, has successfully landed. Exhilarated and confident, Commander Gary Lucas and Lunar Module pilot Charlie Shepherd set out to explore a vast, mysterious depression at the lunar south pole. There, in the icy darkness—where temperatures reach 334 degrees below zero—the astronauts search for the fragments of crystalline bedrock the scientists back home had hoped for. But when tragedy strikes, the men are driven deeper into the lethal realm, where they find much more than they bargained for, including a strange machine that seemingly transports Lucas back to a pre-flood Earth, and startling evidence that could transform mankind's perspective on all creation and its Creator— if only the men could miraculously make their way back home to earth to reveal it.

Horror Films of 2000-2009 John Kenneth Muir,2022-10-12 Horror films have always reflected their audiences' fears and anxieties. In the United States, the 2000s were a decade full of change in response to the 9/11 terrorist attacks, the contested presidential election of 2000, and the wars in Iraq and Afghanistan. These social and political changes, as well as the influences of Japanese horror and New French extremism, had a profound effect on American horror filmmaking during the 2000s. This filmography covers more than 300 horror films released in America from 2000 through 2009, including such popular forms as found footage, torture porn, and remakes. Each entry covers a single film and includes credits, a synopsis, and a lengthy critical commentary. The appendices include common horror conventions, a performer hall of fame, and memorable ad lines.

God, Technology, and the Christian Life Tony Reinke,2021-12-09 What Does God Think about Technology? From smartphones to self-driving cars to space travel, new technologies can inspire us. But the breakneck pace of change can also frighten us. So how do Christians walk by faith through the innovations of Silicon Valley? And how does God relate to our most powerful innovators? To build a biblical theology of technology, journalist and tech optimist Tony Reinke examines nine key texts from Scripture to show how the world's discoveries are divinely orchestrated. Ultimately, what we believe about God determines how we respond to human invention. With the help of several theologians and inventors throughout history, Reinke dispels twelve common myths in the church and offers fourteen ethical convictions to help Christians live by faith in the age of big tech. Biblical, Informed Look at Technology: Written by the author of 12 Ways Your Phone Is Changing You and Competing Spectacles: Treasuring Christ in the Media Age Gathers Ideas from Industry Experts and Theologians: Interacts with Christian and non-Christian sources on technology and theology including John Calvin, Herman Bavinck, Wendell Berry, and Elon Musk Educational: Discusses the history and philosophy behind major technological innovations

In 2066, a Caltech intern notices an anomaly from a space telescope—something is approaching Saturn, and decelerating. Space objects don't decelerate. Spaceships do... The race is on, and a remarkable adventure begins. Soon a hastily thrown-together crew finds its strength and wits tested against adversaries of this earth and beyond. Road Rage Ruth Rendell,2011-09-14 Winner of multiple Edgar and Gold Dagger awards including the most prestigious Edgar of them all, the Grand Master, Ruth Rendell returns with a novel that pits Chief Inspector Wexford against a quite personal foe: the environmental terrorists who kidnap and threaten the lives of five hostages--including Wexford's own wife. As Road Rage begins, Chief Inspector Wexford is walking through Framhurst Great Wood, just outside his beloved town of Kingsmarkham, for what he tells himself will be the last time. He can no longer bear to look at the natural beauty that will soon be despoiled by the construction of a new highway. Wexford rather despairs of the project; his more sanguine wife, Dora, is active on a committee to save the threatened land. Others are more desperate to achieve their end, and their means include the taking of hostages, including Dora, and the threat to begin murdering them. How Wexford and his dedicated team of police officers race against time to learn the identity of the kidnappers and discover the whereabouts of the hostages will rivet readers who delight in following the intricate details of an intensive police investigation. But, as in every Ruth Rendell novel, the mortal drama raises political and moral questions that are not resolved with the closing of the case, and that apply far beyond the limits of Kingsmarkham.

V-S Day Allen Steele,2014-02-04 With a gift for visionary fiction that “would make Robert A. Heinlein proud” (Entertainment Weekly) three-time Hugo Award-winning author Allen Steele now imagines an alternate history rooted in an actual historical possibility: what if the race to space had occurred in the early days of WWII? It's 1941, and Wernher von Braun is ordered by his Fuehrer to abandon the V2 rocket and turn German resources in a daring new direction: construction of a manned orbital spacecraft capable of attacking the U.S. Work on the rocket—called Silbervogel—begins at Peenemunde. Though it is top secret, British intelligence discovers the plan, and brings word to Franklin Roosevelt. The American President determines that there is only one logical response: the U.S. must build a spacecraft capable of intercepting Silbervogel and destroying it. Robert Goddard, inventor of the liquid-fuel rocket, agrees to head the classified project. So begins a race against time—between two secret military programs and two brilliant scientists whose high-stakes competition will spiral into a deadly game of political intrigue and unforeseen catastrophes played to the death in the brutal skies above America.
