Advanced Recorder Technique Gudrun Heyens,2020-10-22 This technical volume is addressed to advanced treble recorder players looking for repertoire that is suited for consistent work on the foundations of their instrumental and musical abilities. In accordance with the original literature for the treble recorder, the exercises are mainly tailored to this instrument. Some technical chapters can be practised on both the treble and descant recorder (with transposed fingering). The term 'technical' must not be misunderstood here: ultimately, the exercises aim at artistic expression, emotion, and tonal interpretation.

Bootleg! The Rise And Fall Of The Secret Recording Industry Clinton Heylin,2010-03-04 An absorbing account of the record industry's worst nightmare. In the summer of 1969, Great White Wonder, a collection of unreleased Bob Dylan recordings appeared in Los Angeles. It was the first rock bootleg and it spawned an entire industry dedicated to making unofficial recordings available to true fans. Bootleg! tells the whole fascinating saga, from its underground infancy through the CD 'protection gap' era, when its legal status threatened the major labels' monopoly, to the explosion of trading via Napster and Gnutella on MP-3 files. Clinton Heylin provides a highly readable account of the busts, the defeats and victories in court; the personalities – many interviewed for the first time for this book. This classic history has now been updated and revised to include today's digital era and the emergence of a whole new bootleg culture.

Sound Fragments Noel Loble,2022-04-19 Winner of IASPM Book Prize, given by IASPM, 2023 This book is an ethnographic study of sound archives and the processes of creative decolonization that form alternative modes of archiving and curating in the 21st century. It explores the histories and afterlives of sound collections and practices at the International Library of African Music. Sound Fragments follows what happens when a colonial sound archive is repurposed and reimagined by local artists in post-apartheid South Africa. The narrative speaks to larger issues in sound studies, curatorial practices, and the reciprocity and ethics of listening to and reclaiming culture. Sound Fragments interrogates how Xhosa arts activism contributes to an expanding notion of what a sound or cultural archive could be, and where it may resonate now and in future.

Records Ruin the Landscape David Grubbs,2014-03-03 John Cage's disdain for records was legendary. He repeatedly spoke of the ways in which recorded music was antithetical to his work. In Records Ruin the Landscape, David Grubbs argues that, following Cage, new genres in experimental and avant-garde music in the 1960s were particularly ill suited to be represented in the form of a recording. These activities include indeterminate music, long-duration minimalism, text scores, happenings, live electronic music, free jazz, and free improvisation. How could these proudly evanescent performance practices have been adequately represented on an LP? In their day, few of these works circulated in recorded form. By contrast, contemporary listeners can encounter this music not only through a flood of LP and CD releases of archival recordings but also in even greater volume through Internet file sharing and online resources. Present-day listeners are coming to know that era's experimental music through the recorded artifacts of composers and musicians who largely disavowed recordings. In Records Ruin the Landscape, Grubbs surveys a musical landscape marked by altered listening practices.

Ambisonics Franz Zotter, Matthias Frank, 2019-04-30 This open access book provides a concise explanation of the fundamentals and background of the surround sound recording and playback technology Ambisonics. It equips readers with the psychoacoustical, signal processing, acoustical, and mathematical knowledge needed to understand the inner workings of modern processing utilities, special equipment for recording, manipulation, and reproduction in the higher-order Ambisonic format. The book comes with various practical examples based on free software tools and open scientific data for reproducible research. The book's introductory section offers a perspective on Ambisonics spanning from the origins of coincident recordings in the 1930s to the Ambisonic concepts of the 1970s, as well as classical ways of applying Ambisonics in first-order coincident sound scene recording and reproduction that have been practiced since the 1980s. As, from time to time, the underlying mathematics become quite involved, but should be comprehensive without sacrificing readability, the book includes an extensive mathematical appendix. The book offers readers a deeper understanding of Ambisonic technologies, and will especially benefit scientists, audio-system and audio-recording engineers. In the advanced sections of the book, fundamentals and modern techniques as higher-order Ambisonic decoding, 3D audio effects, and higher-order recording are explained. Those techniques are shown to be suitable to supply audience areas ranging from studio-sized to hundreds of listeners, or headphone-based playback, regardless whether it is live, interactive, or studio-produced 3D audio material.

Recording History Christopher Silver, 2022-06-28 A new history of twentieth-century North Africa, that gives voice to the musicians who defined an era and the vibrant recording industry that carried their popular sounds from the colonial period through decolonization. If twentieth-century stories of Jews and Muslims in North Africa are usually told separately, Recording History demonstrates that we have not been listening to what brought these communities together: Arab music. For decades, thousands of phonograph records flowed across North African borders. The sounds embedded in their grooves were shaped in large part by Jewish musicians, who gave voice to a changing world around them. Their popular songs broadcast on radio, performed in concert, and circulated on disc carried with them the power to delight audiences, stir national sentiments, and frustrate French colonial authorities. With this book, Christopher Silver provides the first history of the music scene and recording industry across Morocco, Algeria, and Tunisia, and offers striking insights into Jewish-Muslim relations through the rhythms that animated them. He traces the path of hit-makers and their hit records, illuminating regional and transnational connections. In asking what North Africa once sounded like, Silver recovers a world of many voices--of pioneering impresarios, daring female stars, cantors turned composers, witnesses and survivors of war, and national and nationalist icons--whose music still resonates well into our present.
