*Talk and Log* Jeremy Wilson,1998 For more than three decades, the fate of British Columbia's old-growth forests has been a major source of political strife. While more than 5 million hectares of wood were being clearcut, the BC wilderness movement and forest industry supporters clashed, as they continue to do, both pressing their arguments in a variety of forums, ranging from television studios and logging road blockades to royal commission hearings and cabinet ministers' offices. The resulting record of conflict confirms American historian Paul Hirt's characterization of forest policy as party an ideological issue, partly biological, partly economic, partly technical, and wholly political. *Talk and Log* is a comprehensive account of the rise and impact of the BC wilderness movement between 1965 and 1996. Jeremy Wilson examines the evolution of the movement's approaches, evaluates the forest industry's counterstrategies, and

analyzes the patterns and trends underlying shifts in provincial government forest, environment, and parks policies. He describes the war in the woods triggered by environmentalists' efforts to preserve areas such as South Moresby and the Carmanah Valley, and considers the complex forces that pushed the government to expand the protected areas system. Wilson's perceptive analysis of Social Credit's failed policies of the 1980s is followed by an assessment of the Harcourt NDP government's reform initiatives, including the Commission on Resources and Environment (CORE) and the Forest Practices Code. Talk and Log is based on a variety of sources, including government documents, environmental group briefs, and interviews with several dozen politicians, government officials, environmentalists, and forest industry leaders. This book deftly illuminates the forces behind controversies that have divided British Columbians and drawn the attention of people around the world. It is also a thought-provoking examination of issues likely to dominate political debates in BC for decades to come.

**Supporting Children and Their Families Facing Health Inequities in Canada** Miriam J.

Stewart,2021-07-30 Supporting Children and Their

Families Facing Health Inequities in Canada fills an urgent national need to analyze disparities among vulnerable populations, where socio-economic and cultural factors compromise health and create barriers. Offering solutions and strategies to the prevalent health inequities faced by children, youth, and families in Canada, this book investigates timely issues of social, economic, and cultural significance. Chapters cover a diverse range of socio-economic and cultural factors that contribute to health inequality among the country's most vulnerable youth populations, including mental health challenges, low income, and refugee status. This book shares scientific evidence from thousands of interviews, questionnaires, surveys, and client consultations, while also providing professional insights that offer key information for at-risk families experiencing health inequities. Timely and transformative, this book will serve as an informed and compassionate guide to promote the health and resiliency of vulnerable children, youth, and families across Canada.

**Clearcutting the Pacific Rain Forest** Richard A. Rajala,2011-11-01 This book integrates class, environmental, and political analysis to uncover the history of clearcutting in the Douglas fir

forests of B.C., Washington, and Oregon between 1880 and 1965. Part I focuses on the mode of production, analyzing the technological and managerial structures of worker and resource exploitation from the perspective of current trends in labour process research. Rajala argues that operators sought to neutralize the variable forest environment by emulating the factory model of work organization. The introduction of steam-powered overhead logging methods provided industry with a rudimentary factory regime by 1930, accompanied by productivity gains and diminished workplace autonomy for loggers. After a Depression-inspired turn to selective logging with caterpillar tractors timber capital continued its refinement of clearcutting technologies in the post-war period, achieving complete mechanization of yarding with the automatic grapple. Driving this process of innovation was a concept of industrial efficiency that responded to changing environmental conditions, product and labour markets, but sought to advance operators' class interests by routinizing production. The managerial component of the factory regime took shape in accordance with the principles of the early 20th century scientific management movement. Requiring expertise in the organization of an expanded, technologically sophisticated exploitation process, operators presided over the establishment of logging engineering programs in the region's universities. Graduates introduced rational planning procedures to coastal logging, contributing to a rate of deforestation that generated a corporate call for technical forestry

expertise after 1930. Industrial foresters then emerged from the universities to provide firms with data needed for long-range investment decisions in land acquisition and management. Part II constitutes an environmental and political history of clearcutting. This reconstructs the process of scientific research concerning the factory regime's impact on the ecology of the Douglas fir forest, assessing how knowledge was utilized in the regulation of cutting practices. Analysis of business-government relations in British Columbia, Washington and Oregon suggests that the reliance of those client states on revenues generated by timber capital encouraged a pattern of regulation that served corporate rather than social and ecological ends.

*In Search of Sustainability* Benjamin Cashore, 2011-11-01 In recent years, the forests of British Columbia have become a battleground for sustainable resource development. The conflicts are ever present, usually pitting environmentalists against the forest industry and forestry workers and communities. In an effort to broker peace in the woods, British Columbia's NDP government launched a number of promising new forest policy initiatives in the 1990s. *In Search of Sustainability* brings together a group of political scientists to examine this extraordinary burst of policy activism. Focusing on how much change has occurred and why, the authors examine seven components of BC forest policy: land use, forest practices, tenure, Aboriginal issues, timber supply, pricing, and jobs.

European Yearbook of International Economic Law

2012 Christoph Herrmann, Jörg Philipp Terhechte, 2011-12-20 The third volume of the European Yearbook of International Economic law focuses on two major topics of current academic and political interest. Firstly, it addresses the 10th anniversary of China's accession to the WTO and its implications; secondly, it deals with different legal aspects of global energy markets.
