A large portion of the workload on IBM® z/OS® systems is processed in batch mode. Although several IBM Redbooks® publications discuss application modernization on the IBM z/OS platform, this book specifically addresses batch processing in detail. Many different technologies are available in a batch environment on z/OS systems. This book demonstrates these technologies and shows how the z/OS system offers a sophisticated environment for batch. In this practical book, we discuss a variety of themes that are of importance for batch workloads on z/OS systems and offer examples that you can try on your own system. The audience for this book includes IT architects and application developers, with a focus on batch processing on the z/OS platform.

Salesforce Handbook Wes Nolte,Jeff Douglas,2011-03-01 This book is not intended to be a deep-dive on security, programming, reporting, configuration, etc. but more of a high-level overview on salesforce.com, Force.com development, tools, methodology and other resources. We will not cover all aspects of salesforce.com. We wrote this book to (hopefully) become an invaluable resource for anyone new or inexperienced with the Force.com platform. For new administrators and developers coming on to the platform, we see a gaping hole in existing reference books. This book is not intended for end users or advanced developers. This book is for people somewhere in the middle; let's say a business analyst or a new Java or .NET developer. We would like this to be the first book you pick up after your boss walks in and says, Let's take a look at salesforce.com and see if we can build some applications in the cloud.This book contains the information that we wish we had when we started developing applications on Force.com.

One Freak Day Edward Pavlik,2006-06-01 Molecular biologist Evan Pannick encounters complete powerlessness in the midst of a personal medical crisis that his doctors do not understand, when he and his girls soccer team are held hostage by an inmate at the Federal Correctional Institute in Lexington, Kentucky. Modern medicine is supposed to have all the answers. Inmates in Federal Prisons are not supposed to be able to take hostages outside prison walls. Molecular biologist Evan Pannick is just supposed to get his biomedical grant out on time, coach soccer and enjoy his quietly subdued academic life. On One Freak Day everything changes and Evan Pannick finds himself unwillingly transferred from his peaceful academic world to the center of a deepening dilemma fraught with multiple challenges in an escalating situation that threatens him, his daughter and the girls he coaches. Centered in Lexington, Kentucky, the story shuttles between hometown quirkiness and the Federal Prison on the outskirts of town.
