ZAG Marty Neumeier, 2006-09-20 When everybody zigs, zag, says Marty Neumeier in this fresh view of brand strategy. ZAG follows the ultra-clear whiteboard overview style of the author's first book, *THE BRAND GAP*, but drills deeper into the question of how brands can harness the power of differentiation. The author argues that in an extremely cluttered marketplace, traditional differentiation is no longer enough—today companies need “radical differentiation” to create lasting value for their shareholders and customers. In an entertaining 3-hour read you'll learn: – why me-too brands are doomed to fail – how to read customer feedback on new products and messages – the 17 steps for designing “difference” into your brand – how to turn your brand's “onliness” into a “trueline” to drive synergy – the secrets of naming products, services, and companies – the four deadly dangers faced by brand portfolios – how to “stretch” your brand without breaking it – how to succeed at all three stages of the competition cycle From the back cover: In an age of me-too products and instant communications, keeping up with the competition is no longer a winning strategy. Today you have to out-position, out-maneuver, and out-design the competition. The new rule? When everybody zigs, zag. In his first book, *THE BRAND GAP*, Neumeier showed companies how to bridge the distance between business strategy and design. In ZAG, he illustrates the number-one strategy of high-performance brands—radical differentiation. ZAG is an AIGA Design Press book, published under Peachpit's New Riders imprint in partnership with AIGA. For a quick peek inside ZAG, go to www.zagbook.com.

The Front Office Tom Costello, 2021-02-05 Getting into the Hedge Fund industry is hard, being successful in the hedge fund industry is even harder. But the most successful people in the hedge fund industry all have some ideas in common that often mean the difference between success and failure. The Front Office is a guide to those ideas. It's a manual for learning how to think about markets in the way that's most likely to lead to sustained success in the way that the top Institutions, Investment Banks and Hedge Funds do. Anyone can tell you how to register a corporation or how to connect to a lawyer or broker. This isn't a book about those 'back office' issues. This is a book about the hardest part of running a hedge fund. The part that the vast majority of small hedge funds and trading system developers never learn on their own. The part that the accountants, settlement clerks, and back office staffers don't ever see. It explains why some trading systems never reach profitability, why some can't seem to stay profitable, and what to do about it if that happens to you. This isn't a get rich quick book for your average investor. There are no easy answers in it. If you need someone to explain what a stock option is or what Beta means, you should look somewhere else. But if you think you're ready to reach for the brass ring of a career in the institutional investing world, this is an excellent guide. This book explains what those people see when they look at the markets, and what nearly all of the other investors never do.
