Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more.

Red Flower of China Zhai Zhenhua, 2003-07 The Cultural Revolution had transformed me into a devil, writes Zhai. In 1966, at age 15, she led a Red Guard brigade that tortured Chinese citizens branded counterrevolutionaries. She beat innocent people to death and had others exiled; her squad raided homes and murdered people. Now a professor of engineering in British Columbia, Zhai expresses remorse and guilt rather perfunctorily, and her cool confession is tinged with rationalizations. She blames the flourishing of her evil, barbaric side on her blind faith in Chairman Mao. Her fervor gave way to bitter disillusionment when she herself was banished to the countryside in 1969 to do three years of hard labor and be re-educated by peasants. This is a grisly account of how political brainwashing can induce converts to commit monstrous acts.

100 Words To Make You Sound Smart American Heritage Dictionaries, 2006-10-04 Find the right words to make a point, seal the deal, or just keep folks listening! Chosen by the editors of the American Heritage Dictionaries, these words can help anyone who wants to be a more compelling communicator—as a worker, consumer, advocate, friend, dinner companion, or even romantic prospect. The book includes a colorful variety of words,

including handy words of just one syllable (such as glib) and words derived from the names of famous people (such as Freudian slip and Machiavellian). There are expressions from popular culture (Catch-22) and words that date back to classical civilization (spartan and stoic). Each word is clearly defined and shown in context with quotations from magazines, newspapers, broadcast media, movies, and television. For many words, quotations from distinguished authors and speakers are also given and word histories are explained. 100 Words to Make You Sound Smart provides an enjoyable way to communicate more effectively, distinctively, and articulately.

Special Relativity and Motions Faster than Light Moses Fayngold, 2008-09-08 While the theory of special relativity is often associated with the idea of traveling faster than light, this book shows that in all these cases subtle forces of nature conspire to prevent these motions being harnessed to send signals faster than the speed of light. The author tackles these topics both conceptually, with minimal or no mathematics, and quantitatively, making use of numerous illustrations to clarify the discussion. The result is a joy to read for both scientists familiar with the subject and laypeople wishing to understand something of special relativity.

Kumba Africa Sampson Ejike Odum, 2020-11-03 'KUMBA AFRICA', is a compilation of African Short Stories written as fiction by Sampson Ejike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New Yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made

possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven't tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants. They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.

The Stone Age Diet Walter L. Voegtlin, 1975

Aging Options (East King County) Rajiv Nagaich, 2013-05-01 Each day in the United States, 10,000 people become eligible to retire. For these individuals, and the thousands of others already retired, retirement issues loom large. Though visions of retirement for most start out as a joyous anticipation of being engaged in activities we did not have time for when working, re-engaging with friends and family, visiting new and exotic places and the like, these visions can be short-lived for many unprepared retirees. The primary reason? An episode with illness (such as a stroke, heart attack, cancer, or a diagnosis of Alzheimers, Parkinsons) can leave the whole family in chaos and render the ill person a huge burden on loved ones. Unplanned illness can lead to many undesirable outcomes, including: A forced and unwelcome move to an institutional care setting; Loss of assets to cover the high cost of care not covered by Medicare and other health insurance; and, A significant burden being placed on loved ones of the ill person. This reality is quite visible to aging Americans who harbor significant anxieties over these issues. For most, this will be the time when we will realize that Medicare does NOT cover long-term care needs in any meaningful fashion. All this leads to the fact that a bout with illness can quickly render traditional retirement planning ineffective in addressing the most critical retirement concerns aging Americans harbor; however, the good news is with proper planning these concerns can be addressed. So what is proper planning? It is coordinated and comprehensive planning around healthcare, housing, financial, and legal

issues. It is planning that can help you: Avoid institutional care if that is at all possible; Locate the most appropriate housing alternative if aging at home is not possible Protect your assets not only from probate costs and estate taxes, but from uncovered long-term care and medical costs as well; and, Not become a burden on your loved ones in case of incapacity. The AgingOptions Guide is a primer on these issues and how to develop a plan to have a better retirement than might be possible.
