Mobile Theater Fernando Quesada, 2021-07-13 Taking as a starting point a design for a mobile theater made at the Architectural Association of London between 1970 and 1971 by Spanish architect Javier Navarro de Zuñiga (born 1942), this book traces the architectural counterculture of that time and the relations with the alternative performing arts. Architect Javier Navarro de Zuñiga (1942) graduated in 1968 at Madrid School of Architecture. During the academic year 1970-1971 he travelled from Madrid to London thanks to a grant of the British Council to complete his postgraduate training at the Architectural Association. There he designed a building called Mobile Theater. It was a theatrical device composed of several 8 x 2,5 meters trucks carefully designed, which contained all the building elements needed to shape a space for the performing arts or other collective uses. The assembly time —estimated for four workers— was six and a half hours. This project was internationally showed and published between 1971 and 1975, but was never built. This book intends to release this project, largely ignored by canonical historiography, and to culturally place it in time and space: the agitated city of London in 1971. After the convulsions of May 1968, architectural counterculture reappeared on very different fronts, from the disciplinary rally to the guerilla positions. This architectural design accounts for these events, since it had a temporal development that goes beyond its mere conception as an artifact. The long and frustrated process for construction —1969 to 1976— calls for a particular intra-history, which this book will tell.

You Gonna Finish That Dragon? Barry Parham, 2013-08-13 Praise for You Gonna Finish That Dragon? Parham is at the very top echelon of American humorists, equal to Dave Barry or David Sedaris on their best day. Linton Robinson (award-winning author of *Bailin'*) In his seventh critically-acclaimed collection, humorist Barry Parham points his Pardon Me?-ometer at American culture, science, men & women, ferret owners, and why Paul Revere was a lousy dentist.

Performance and Community, 2013-12-19 Performance practice in community settings is an established part of the cultural landscape. However, this practice is frequently viewed as functional: an intervention that seeks to solve, educate or heal. Performance and Community presents an alternative vision, focussing, instead, on the aesthetic and political ambitions of artists, organisations and cultural producers committed to this area. Through case studies, this edited collection gives unprecedented access to some of the leading organisations in the field, examining their creative processes and placing them in their historical context. In parallel, a series of interviews with individual artists explores their approaches and how they are re-shaped by the communities that they encounter. Case studies include: the Grassmarket Project, the Lawnmowers Independent Theatre Company, London Bubble, Magic Me and the partnership between the artist, Mark Storor and producer, Anna Ledgard; while interviews in this collection include: Mojisola Adebayo, Bobby Baker, Sue Emma, Tony Fegan, Paul Heritage, Rosemary Lee and Lois Weaver. An invaluable resource for students of applied, social, community and contemporary theatre practices, Performance and Community provides vivid evidence of the complex negotiations between artist and community that lie at the heart of this delicate work.

**Bubbles, Booms, and Busts** Donald Rapp, 2009-06-12 This book provides a thorough explanation of the nature and history of booms, bubbles and busts in financial markets. The first part of the book deals with financial booms and bubbles and how they emerge, develop and collapse. It describes the distribution of wealth, inflation, rationality of bankers, monetary and fiscal policy, the role of central banks, tax policies, social security, US federal, state, municipal and personal debt, and valuation of common stocks. The book describes historical boom/bust cycles including bubbles of the 1720s, the Florida land boom and the stock market in the 1920s, the depression of the 1930s, the S&L scandal of the 1980s, the great bull market of 1982-1995, the crash of 1987, the dot.com mania of 1995-2000, corporate swindles of the 1990s and 2000s, the sub-prime fiasco of the 2000s, and Japan in the late 20th century. Most of the recent wealth generation has derived from increased debt and appreciation of paper assets. The architects of the new economics were Ronald Reagan and Arthur Greenspan. Inevitably, the US Government's cure for excessive spending and inadequate revenues is to increase spending and cut revenues. American voters must choose between "tax and

spend” Democrats and “spend and borrow” Republicans. The theme of American finance was uttered by VP Cheney: “Deficits don’t matter”.

**The Acoustic Bubble** T Leighton,2012-12-02 The Acoustic Bubble describes the interaction of acoustic fields with bubbles in liquid. The book consists of five chapters. Chapter 1 provides a basic introduction to acoustics, including some of the more esoteric phenomena that can be seen when high-frequency high-intensity underwater sound is employed. Chapter 2 discusses the nucleation of cavitation and basic fluid dynamics, while Chapter 3 draws together the acoustics and bubble dynamics to discuss the free oscillation of a bubble and acoustic emissions from such activity. The acoustic probes that are often applied to study the behavior of a bubble when an externally-applied acoustic field drives it into oscillation is deliberated in Chapter 4. The last chapter outlines a variety of effects associated with acoustically-induced bubble activity. The bubble detection, sonoluminescence, sonochemistry, and pulse enhancement are also covered. This publication is a good reference for physics and engineering students and researchers intending to acquire knowledge of the acoustic interactions of acoustic fields with bubbles.

**Dictionary of Marketing Communications** Norman A. P. **Actor-Musicianship** Jeremy Harrison,2016-02-25 Actor-musicianship is a permanent feature of the musical theatre landscape. Actor-musician shows can be seen from Bradford to Broadway, from village halls to international arena tours. However, with the exception of a couple of academic papers, there has been nothing written about this fascinating area of theatre practice. Jeremy Harrison's book addresses this deficit, operating as both a record of the development of the actor-musician movement and as a practical guide for students, educators, performers and practitioners. It explores the history of actor-musicianship, examining its origins, as well as investigating – and offering guidance on – how this specialist form of music theatre is created. It, in turn, acts as a means of defining an art form that has to date been left to lurk in the shadows of musical theatre; a subset with its own distinctive culture of performer, maker and audience, but as yet no formal recognition as a specialism in its own right. The actor-musician show is multifarious and as such this book targets those interested in mainstream commercial work, as well as alternative and avant-garde theatre practice. The book draws together expertise from a range of disciplines with contributions from many of the leading figures in this field, including performers, directors, teachers, MDs, producers and writers. It also features a foreword by theatre director John Doyle.

**Unsolved Problems of the Milky Way** Leo Blitz,Peter Teuben,2013-11-11 Although the Milky Way is the most studied and best understood galactic system, there are many fundamental questions about our Galaxy that remain unanswered. This book concentrates on those questions which have the widest applicability in all of astrophysics, and for which answers are most likely to be forthcoming in the next few years. Is the Milky Way a barred spiral, and if so, what are its

properties? Is the disk of the Milky Way axisymmetric and what does the answer tell us about its dynamical history? Is there a black hole at the center of the Galaxy? How far does the Galaxy extend? How much dark matter is there in the Milky Way system? And more.

Packham, 2013-09-10 This book explores the contributions that research, with refugees and with faith-based organizations for example, makes to strengthen community development and consequently promote active citizenship and social justice.

*Blowing Bubbles in the Cosmos* T. W. Hartquist, John Edward Dyson, D. P. Ruffle, 2004 Many astrophysical bodies produce winds, jets or explosions, which blow bubbles. From a nonmathematical perspective, based on the understanding of bubbles, this book addresses various topics in astrophysics including supernovae, the production of structure in the Early Universe, the environments of supermassive black holes and gamma-ray bursts.
