**Down for the Count** Andrew Gumbel,2015-04-07 The updated edition of *Steal This Vote*—a rollicking history of US voter suppression and fraud from Jacksonian democracy to Citizens United and beyond. In *Down for the Count*, award-winning journalist Andrew Gumbel explores the tawdry history of elections in the United States. From Jim Crow to Tammany Hall to the Bush v. Gore Florida recount, it is a chronicle of votes bought, stolen, suppressed, lost, miscounted, thrown into rivers, and litigated up to the Supreme Court. Gumbel then uses this history to explain why America is now experiencing the biggest backslide in voting rights in more than a century. First published in 2005 as *Steal This Vote*, this thoroughly revised and updated edition reveals why America faces so much trouble running clean, transparent elections. And it demonstrates how the partisan battles now raging over voter IDs, campaign spending, and minority voting rights fit into a long, largely unspoken tradition of hostility to the very notion of representative democracy. Interviewing Democrats, Republicans, and a range of voting rights activists, Gumbel offers an engaging and accessible analysis of how our democratic integrity is so often corrupted by racism, money, and power. In an age of high-stakes electoral combat, billionaire-backed candidacies, and bottom-of-the-barrel campaigning, this book is more important than ever. “In a riveting and frightening account, Gumbel . . . traces election fraud in America from the 18th century to the present . . . [the issues he] so winningly addresses are crucial to the future of democracy.” —Publishers Weekly, on *Steal This Vote*

*Continuous Ambulatory Peritoneal Dialysis* G.R. Catto,2012-12-06 For more than a generation haemodialysis has been the principal method of treating patients with both acute and chronic renal failure. Initially, developments and improvements in the system were highly technical and relevant to only a relatively small number of specialists in nephrology. More recently, as advances in therapy have demonstrated the value of haemofiltration in the intensive therapy unit and haemoperfusion for certain types of poisoning, the basic principles of haemodialysis have been perceived as important in many areas of clinical practice. In this volume, the potential advantages of bicarbonate haemo dialysis are objectively assessed, the technical and clinical aspects of both haemofiltration and haemoperfusion discussed and the continuing problems associated with such extra corporeal circuits analysed. All the chapters have been written by recognized experts in their field. The increasing availability of highly technical facilities for appropriately selected patients should ensure that the information contained in the book is relevant not only to nephrologists but to all practising clinicians. ABOUT THE EDITOR Dr Graeme R. D. Catto is Professor in Medicine and Therapeutics at the University of Aberdeen and Honorary Consultant Physician/Nephrologist to the Grampian Health Board. His current interest in transplant immunology was stimulated as a Harkness Fellow at Harvard Medical School and the Peter Bent Brighton Hospital, Boston, USA. He is a member of many medical societies including the Association of Physicians of Great Britain and Ireland, the Renal Association and the Transplantation Society.

Scar Tissue Anthony Kiedis,Larry Sloman,2004-10-01 In this vivid and inspiring New York Times bestseller (Newsweek), the Red Hot Chili Peppers' lead singer and songwriter shares a searingly honest account of life in the rock scene's fast lane—from the darkness into the light. In 1983, four self-described knuckleheads burst out of the mosh-pitted mosaic of the neo-punk rock scene in L.A. with their own unique brand of cosmic hardcore mayhem funk. Over twenty years later, the Red Hot Chili Peppers, against all odds, have become one of the most successful bands in the world. Though the band has gone through many incarnations, Anthony Kiedis, the group's lyricist and dynamic lead singer, has been there for the whole roller-coaster ride. In *Scar Tissue*, Kiedis delivers a compelling life story from a man in love with everything—the darkness, the death, the disease. Even his descent into drug addiction was a part of that journey, another element transformed into art. Whether he's honoring the influence of the beautiful, strong women who have been his muses or remembering the roaring crowds of Woodstock and the Dalai Lama's humble compound, Kiedis shares a compelling story about the price of success and excess. *Scar Tissue* is a story of dedication and debauchery, of intrigue and integrity, of recklessness and redemption—a story that could only have come out of the world of rock.

International Perspectives on the Theory and Practice of Environmental Education: A Reader Giuliano Reis,Jeff Scott,2017-11-15 The present book shares critical perspectives on the conceptualization, implementation, discourses, policies, and alternative practices of environmental education (EE) for diverse and unique groups of learners in a variety of international educational settings. Each contribution offers insights on the authors’ own processes of re-imagining an education in/about/for the environment that are realized through their teaching, research and other ways of “doing” EE. Overall, environmental education has been aimed at giving people a wider appreciation of the diversity of cultural and environmental systems around them as well as the urge to overcome existing problems. In this context, universities, schools, and community-based organizations struggle to promote sustainable environmental education practices geared toward the development of ecologically literate citizens in light of surmountable challenges of hyperconsumerism, environmental depletion and socioeconomic inequality. The extent that individuals within educational systems are expected to effectively respond to—as well as benefit from—a “greener” and more just world becomes paramount with the vision and analysis of different successes and challenges embodied by EE efforts worldwide. This book fosters conversations amongst researchers, teacher educators, schoolteachers, and community leaders in order to promote new international collaborations around current and potential forms of environmental education. This book reflects many successful international projects and perspectives on the theory and praxis of environmental education. An eclectic mix of international scholars challenge environmental educators to engage issues of reconciliation of correspondences and difference across regions. In their own ways, authors stimulate critical conversations that seem pivotal for necessary re-imaginings of research and pedagogy across the grain of cultural and ecological realities, systematic barriers and reconceptualizations of environmental education. The book is most encouraging in that it works to expand the creative commons for progress in teaching, researching and doing environmental education in desperate times. — Paul Hart, Professor of Science and Environmental Education at the University of Regina (Canada), Melanson Award for outstanding contributions to environmental and outdoor education (Saskatchewan Outdoor and Environmental Education Association) and North American Association for Environmental Education (NAAEE)’s Jeske Award for Leadership and Service to the Field of EE and Outstanding Contributions to Research in EE. In an attempt to overcome simplistic and fragmented views of doing Environmental Education in both formal and informal settings, the collected authors from several countries/continents present a wealth of cultural, social, political, artistic, pedagogical, and ethical perspectives that enrich our vision on the theoretical and practical foundations of the field. A remarkable book that I suggest all environmental educators, teacher educators, policy and curricular writers read and present to their students in order to foster dialogue around innovative ways of experiencing an education about/in/for the environment. — Rute Monteiro, Professor of Science Education, Universidade do Algarve/ University of Algarve (Portugal).

The Voice of El-Lil Robert E. Howard,2015-02-12 This early work by Robert E. Howard was originally published in 1930 and we are now republishing it with a brand new introductory biography. 'The Voice of El-Lil' is one of Howard's short stories in the fantasy genre and a must read for fans of the Author. Robert Ervin Howard was born in Peaster, Texas in 1906. During his youth, his family moved between a variety of Texan boomtowns, and Howard - a bookish and somewhat introverted child - was steeped in the violent myths and legends of the Old South. At fifteen Howard began to read the pulp magazines of the day, and to write more seriously. The December 1922 issue of his high school newspaper featured two of his stories, 'Golden Hope Christmas' and 'West is West'. In 1924 he sold his first piece - a short caveman tale titled 'Spear and Fang' - for \$16 to the not-yet-famous Weird Tales magazine. Howard's most famous character, Conan the Cimmerian, was a barbarian-turned-King during the Hyborian Age, a mythical period of some 12,000 years ago. Conan featured in seventeen Weird Tales stories between 1933 and 1936 which is why Howard is now regarded as having spawned the 'sword and sorcery' genre. The Conan stories have since been adapted many times, most famously in the series of films starring Arnold Schwarzenegger.

*This Is Not Florida* Jay Weiner,2014-02-20 On July 7, 2009, Al Franken was sworn in as Minnesota's junior U.S. senator-eight months after Election Night. In the chill of November 2008, Republican incumbent Norm Coleman led by a slim 215 votes, a margin that triggered an automatic statewide recount of more than 2.9 million ballots. Minnesota's ensuing recount, and the contentious legal and public relations battle that would play out between the Franken and Coleman lawyers and staff, simultaneously fascinated and frustrated Minnesotans and the nation-all while a filibuster-proof Senate hung in the balance. This Is Not Florida is the behind-the-scenes saga of the largest, longest, and most expensive election recount in American history. Reporter Jay Weiner covered the entire recount process-for which he was honored with Minnesota's most prestigious journalism award-following every bizarre twist and turn and its many colorful personalities. Based on daily reporting as well as interviews with more than forty campaign staffers and other participants in the recount, This Is Not Florida dives into the motivations of key players in the drama, including the exploits of Franken's lead attorney Marc Elias, some of the mistakes made by Coleman advisers, and how the Franken team's devotion to data collection helped Franken win the recount by a mere 312 votes. In a fascinating, blow-by-blow account of the historic recount that captivated people nationwide, Jay Weiner gets inside campaign war rooms and judges' chambers and takes the reader from the uncertainties of Election Night 2008, through the controversial State Canvassing Board and a grueling eight-week trial, to an appeal to Minnesota's Supreme Court, and finally to Al Franken's long-awaited and emotional swearing-in. This Is Not Florida presents an important and unforgettable moment in political history that proved that it's never really over until it's actually over

*Contested Sudan* Ibrahim Elnur,2009-01-13 Since gaining independence in 1956, Sudan has endured a troubled history, including the longest civil war in African history in Southern Sudan and more recent conflicts such as the humanitarian crisis in Darfur. This book explores this history of ensuing conflict, examining why Sudan failed to sustain a successful modern post-colonial state. The book goes on to consider in detail the various attempts to end Sudan's conflicts and initiate political and economic reconstruction, including the failure which followed the Addis Ababa agreement of 1982 and the more recent efforts following the Nivasha agreement of 2005 which ended the civil war in the south. It critically examines how reconstruction has been envisioned and the role of the various major players in the process: including donors, NGOs, ex-combatants and the central state authority. It argues that reconstruction can only be successful if it takes into account the fundamental and irreversible transformations of society engendered by war and conflict, which in the case of Sudan includes the massive rural to urban population flows experienced during the years of warfare. It compares possible future scenarios for Sudan, and considers how the obstacles to successful post-conflict reconstruction might best be overcome. Overall, this book will not only be of interest to scholars of Sudan and regional specialists, but to all social scientists interested in the dynamics of post-conflict reconstruction and state-building.
