Linear Selection Indices in Modern Plant Breeding J. Jesus Céron-Rojas, José Crossa, 2018-09-26

This open access book focuses on the linear selection index (LSI) theory and its statistical properties. It addresses the single-stage LSI theory by assuming that economic weights are fixed and known - or fixed, but unknown - to predict the net genetic merit in the phenotypic, marker and genomic context. Further, it shows how to combine the LSI theory with the independent culling method to develop the multistage selection index theory. The final two chapters present simulation results and SAS and R codes, respectively, to estimate the parameters and make selections using some of the LSIs described. It is essential reading for plant quantitative geneticists, but is also a valuable resource for animal breeders.

Multivariate Statistical Machine Learning Methods for Genomic Prediction Osval Antonio

Montesinos López, Abelardo Montesinos López, José Crossa, 2022-02-14 This book is open access under a CC BY 4.0 license This open access book brings together the latest genome base prediction models currently being used by statisticians, breeders and data scientists. It provides an accessible way to understand the theory behind each statistical learning tool, the required pre-processing, the basics of model building, how to train statistical learning methods, the basic R scripts needed to implement each statistical learning tool, and the output of each tool. To do so, for each tool the book provides background theory, some elements of the R statistical software for its implementation, the conceptual underpinnings, and at least two illustrative examples with data from real-world genomic selection experiments. Lastly, worked-out examples help readers check their own comprehension. The book will greatly appeal to readers in plant (and animal) breeding, geneticists

and statisticians, as it provides in a very accessible way the necessary theory, the appropriate R code, and illustrative examples for a complete understanding of each statistical learning tool. In addition, it weighs the advantages and disadvantages of each tool.

Generalized Linear Mixed Models with Applications in Agriculture and Biology Josafhat Salinas Ruíz, Osval Antonio Montesinos López, Gabriela Hernández Ramírez, Jose Crossa Hiriart, 2023-08-16
This open access book offers an introduction to mixed generalized linear models with applications to the biological sciences, basically approached from an applications perspective, without neglecting the rigor of the theory. For this reason, the theory that supports each of the studied methods is addressed and later - through examples - its application is illustrated. In addition, some of the assumptions and shortcomings of linear statistical models in general are also discussed. An alternative to analyse non-normal distributed response variables is the use of generalized linear models (GLM) to describe the response data with an exponential family distribution that perfectly fits the real response. Extending this idea to models with random effects allows the use of Generalized Linear Mixed Models (GLMMs). The use of these complex models was not computationally feasible until the recent past, when computational advances and improvements to statistical analysis programs allowed users to easily, quickly, and accurately apply GLMM to data sets. GLMMs have attracted considerable attention in recent years. The word Generalized refers to non-normal distributions for the response variable and the word Mixed refers to random effects, in addition to the fixed effects typical of analysis of variance (or regression). With the development of modern statistical packages such as Statistical Analysis System (SAS), R, ASReml, among others, a wide variety of statistical analyzes are available to a wider audience. However, to be able to handle

and master more sophisticated models requires proper training and great responsibility on the part of the practitioner to understand how these advanced tools work. GMLM is an analysis methodology used in agriculture and biology that can accommodate complex correlation structures and types of response variables.

The Political Economy of Transnational Power and Production James M. Cypher, Mateo Crossa, 2023-08-01 The Political Economy of Transnational Power and Production: Mexico's Metamorphosis 1982-2022 How and why Mexico's socioeconomic structure was transformed through plutocratic preferences, US corporate strategies, and ideology—all powering transnational processes of neoliberalization—are issues examined in this comprehensive, carefully documented publication covering four crucial decades of metamorphosis. The causes and consequences of the creation of a new, regional power bloc—the North American Free Trade Agreement (NAFTA)—are extensively examined. Readers will benefit from the many important demystifications presented here, chronicling the asymmetric Mexico-US production system. The impacts of the new transnational structure for labor on both sides of the border are matters of centrality. Specialists and general readers alike will find an explicit and accessible account of the powerful forces opening access to and profiting from millions of low-wage workers enabling Mexico to become a strategic source of US imports. Portrayed by mainstream economists and major policy makers as a win-win triumph of free trade theory, this book documents the opposing reality imposed by NAFTA and the US-Mexico-Canada Free Trade Agreement on both the US and Mexican working classes. US economists foretold a dramatic narrowing of the income gap—the US would benefit; Mexico would benefit even more. But instead, the yawning gap increased for three decades, bringing devastation for workers while debilitating Mexico's national industrial base.

Nine Ways to Cross a River Akiko Busch, 2008-12-10 From Thoreau to Edward Abbey to Annie Dillard, American writers have looked at nature and described the sublime and transcendent. Now comes Akiko Busch, who finds multitudes of meaning in the practice of swimming across rivers. The notion that rivers divide us is old and venerated, but they also limn our identities and mark the passage of time; they anchor communities and connect one to another. And, in the hands of writer and swimmer Akiko Busch, they are living archives of human behavior and natural changes. After a transformative swim across the Hudson just before September 11, Busch undertook to explore eight of America's great waterways: the Hudson (twice), the Delaware, the Connecticut, the Susquehanna, the Monongahela, the Mississippi, the Ohio, and the Current. She observes each river's goings-on and reflects on its history (human and natural) and possible futures. Some of the rivers have rebounded from past industrial misuse; others still struggle with pollution and waste. The swims are also opportunities to muse on the ordinary passages faced by most of us-the death of a parent, raising children, becoming older-and the ways in which the rhythms and patterns of the natural world can offer reassurance, ballast and inspiration. A deeply moving exploration of the themes of renewal and reclamation at midlife, *Nine Ways to Cross a River* is a book to be treasured and given to friends.

Cross a Far River Lewis W. Heniford,2018-09-28 Daniel, a black man who is well educated and free, supervises Foundhaven, a rice plantation on the upper reaches of the Pee Dee River in South Carolina in 1776. Pox has decimated his Negro workforce, compelling the purchase of a rebellious lot from Barbados. He and his overseer leave for Charles Town to get them just as a South Carolina provincial congress delegation arrives to engage Foundhaven's owner in the Sons of Liberty conference in the state capital about a united front against George III's tyrannies. The master and mistress of the plantation are feting the military men when word arrives about a battle in Lexington, Massachusetts, and the harsh British punishment. As the delegation departs for their conference, Daniel buys the lot from Barbados and marries the black woman with them. The purchased men enable the rice harvest, and he turns to his plan to lead Foundhaven slaves and others from the Carolinas to freedom beyond the Mississippi. He calls representatives of Indian nations and slaves at other plantations. The nearer the meeting comes, the more doubts Daniel has about his role. The Barbados woman he has married forces him to decide his role. When he declines to lead the exodus, she has the blacks kill him.

The True Cross: a Narrative ... Translated [by C. S.] from the French César Henri Abraham MALAN, 1834

The Way of the Holy Cross: A Method of Performing the Devotion Arthur Martin, 2020-09-28 The Way of the Cross means that space of ground which was travelled over by our Blessed Saviour, from the Governor's Hall, where he was condemned, to the top of Mount Calvary, where he finally expired upon that instrument of martyrdom; and the exercise of the way of the Cross consists in following this Divine Model along the traces which His blood has left, and meditating, meanwhile, upon the sufferings which his love caused Him to undergo there for our sake. According to a very credible tradition, this pious practice may be traced back to the earliest period of the Church, and the august Mother of God is said to have been the first to set the example. During her latter years, says St. Andrew, of Crete, she used to frequent incessantly those places where her Divine Son had been loaded with contumely and nailed to the cross. But why seek for written testimony? Doomed to sojourn as an exile upon the earth, away from Him, in whom she loved at once her Son and her God,

how could her affectionate heart have been satisfied if she had not visited again and again the spots consecrated by the most memorable events in the life of her Beloved?—and Calvary, above all, where, standing by His side, she had sustained those inward sufferings which have caused her to be styled the Queen of Martyrs? How often must she have been seen, in the evening of her days, musing, with weeping eyes, along the road where her Son had passed, bearing the load of His cross!—and standing, overwhelmed with grief, on the heights where He expired! Fond and inconsolable Parent, she saw Him yet hanging by His wounded hands, His head crowned with thorns, His body mangled, pale, agonizing and dying, and in His agony casting a look from His dying eyes on her. It was here that she caught His last sigh—here, that she had seen the lance enter His heart—here, that she had received into her arms, and clasped to her bosom, His sacred body weltering in its blood. How could she do otherwise than recur often to such scenes, kissing, a thousand times, the earth which had been reddened with His blood, and watering it incessantly with her tears?
