He started the Ginghamburg CyberMinistry back in 1996 as an unpaid servant. Over the years, as the ministry grew, Mark joined the Ginghamburg staff, first part time and then full time. Currently, Ginghamburg Church has one of the largest and most innovative church internet ministries in the world, and the ministry remains unpaid-servant based and "home grown" (no outside companies or consultants have been hired). The website has received national acclaim -- from write-ups in the Wall Street Journal to the Dallas Morning News to Christian Computing Magazine, and television stories by WBNS Channel 10 in Columbus, Ohio and on Fox News. Visionary leaders like Bill Easum and Len Sweet champion it as a must-see website. Mark, the "Church CyberGuy," is also a well-known speaker on CyberMinistry as he conducts presentations and workshops around North America for such organizations as Leadership Network, United Methodist Communications, North American Christian Convention, Brethren in Christ Church of North America, and Miami University of Ohio. Visual Informatics: Bridging Research and Practice Halimah Badioze Zaman, Peter Robinson, Maria Petrou, Patrick Olivier, Heiko Schröder, 2009-11-14 Visual informatics is a field of interest not just among the information technology and computer science community, but also other related fields such as engineering, medical and health informatics and education starting in the early 1990s. Recently, the field is gaining more attention from researchers and industry. It has become a multidisciplinary and transdisciplinary field related to research areas such as computer vision, visualization, information visualization, real-time image processing, medical image processing, image information retrieval, virtual reality, augmented reality, expressive visual mathematics, 3D graphics, multimedia-fusion, visual data mining, visual ontology, as well as services and

visual culture. Various efforts has been - vested in different research, but operationally, many of these systems are not pro- nent in the mass market and thus knowledge and research on these phenomena within the mentioned areas need to be shared and disseminated. It is for this reason that the Visual Informatics Research Group from Universiti - bangsaan Malaysia (UKM) decided to spearhead this initiative to bring together experts in this very diversified but important research area so that more concerted efforts can be undertaken not just within the visual informatics community in Malaysia but from other parts of the world, namely, Asia, Europe, Oceania, and USA. This first International Visual Informatics Conference (IVIC 2009) was conducted collaboratively, by the visual informatics research community from the various public and private institutions of higher learning in Malaysia, and hosted by UKM.

We were proud to welcome participants from more than 40 countries from all over the world to this year's ICCHP.
