The John Zink Combustion Handbook Jr., Charles E. Baukal, 2001-03-27 Despite the length of time it has been around, its importance, and vast amounts of research, combustion is still far from being completely understood. Industrial applications of combustion add environmental, cost, and fuel consumption issues to its fundamental complexity, and the process and power generation industries in particular present their o

Carbon Dioxide Capture for Storage in Deep Geologic Formations - Results from the CO₂ Capture Project David C Thomas, Sally M Benson, 2005-01-06 Over the past decade, the prospect of climate change resulting from anthropogenic CO₂ has become a matter of growing public concern. Not only is the reduction of CO₂ emissions extremely important, but keeping the cost at a manageable level is a prime priority for companies and the public, alike. The CO₂ capture project (CCP) came together with a common goal in mind: find a technological process to capture CO₂ emissions that is relatively low-cost and able to be expanded to industrial applications. The Carbon Dioxide Capture and Storage Project outlines the research and findings of all the participating companies and associations involved in the CCP. The final results of thousands of hours of research are outlined in the book, showing a successful achievement of the CCP's goals for lower cost CO₂ capture technology and furthering the safe, reliable option of geological storage. The Carbon Dioxide

Capture and Storage Project is a valuable reference for any scientists, industrialists, government agencies, and companies interested in a safer, more cost-efficient response to the CO2 crisis. *Succeeds in tackling the most important issues at the heart of the CO2 crisis: lower-cost and safer solutions, and making the technology available at an industrial level. *Contains technical papers and findings of all researchers involved in the CO2 capture and storage project (CCP) *Consolidates thousands of hours of research into a concise and valuable reference work, providing up-to-the minute information on CO2 capture and underground storage alternatives.

Nehemiah LLC Michael J. Findley, Joan Cohen's people

have thrived beneath Mars' turbulent surface by turning sandblasted caverns into cozy living areas, parkways and farms. The Nehemiah LLC group is both a strongly-knit, deeply faith-driven community and a team of life support experts. Anthony Lewis is a quirky engineer, an outsider with a million questions about schedules, deadlines, and why Joan does what she does. Can they overcome their differences long enough to save their Space Empire from a crippling shortage of resources? The gas-collecting balloon ship Sojourner lies dead in space, its life support inexplicably frozen. One lost repair ship means searching a vast maze of tubing. A single failed component planetside can halt dozens of projects and jeopardize the countdown to a critical launch window. No light sabres. No warp drive. It's more like the real thing -- an Apollo mission plus floating farms plus Martian underground parks. It won't fail because of me takes on a whole new meaning.

Atomic Absorption Spectrometry J.E. Cantle,1986-01-01

The topic is treated here in a very practical manner. The bulk of the book is concerned with real-life analyses for practising instrumentalists and differs from the literature supplied by manufacturers of atomic absorption instruments in that the methods described can be interpreted using all sorts of hardware, and in that far more chemistry and sample preparation are included.

Empire Saga Michael J. Findley, Look at the future of persecution. One day soon the only refuge for the faithful

may be Space. Follow a desperate couple fighting isolation and equipment malfunction to pilot a gas-collecting balloon ship to the outer planets. Michael, crown prince of the Space Empire hopes to save his people from external attack with an internal rebellion and a battle cruiser like no other. His plans are shaken by a forbidden romance, political turmoil, and the discovery of Earth's Fourth Empire. Michael and his best friend Randolph might save or shatter the Space Empire's last hope for the future.

Re-Creating Primordial Time Gabrielle Vail,Christine Hernández,2013-06-15 *Re-Creating Primordial Time* offers a new perspective on the Maya codices, documenting the extensive use of creation mythology and foundational rituals in the hieroglyphic texts and iconography of these important manuscripts. Focusing on both pre-Columbian codices and early colonial creation accounts, Vail and Hernández show that in spite of significant cultural change during the Postclassic and Colonial periods, the mythological traditions reveal significant continuity, beginning as far back as the Classic period. Remarkable similarities exist within the Maya tradition, even as new mythologies were introduced through contact with the Gulf Coast region and highland central Mexico. Vail and Hernández analyze the extant Maya codices within the context of later literary sources such as the Books of Chilam Balam, the Popol Vuh, and the Códice Chimalpopoca to present numerous examples highlighting the relationship among creation mythology, rituals, and lore. Compiling and comparing Maya creation mythology with that of the Borgias

codices from highland central Mexico, *Re-Creating Primordial Time* is a significant contribution to the field of Mesoamerican studies and will be of interest to scholars of archaeology, linguistics, epigraphy, and comparative religions alike.
