Harold G. Crowley

Night Over Water Ken Follett, 2011-06-04 Set during the outbreak of the Second World War, *Night Over Water* is about a perilous journey across the Atlantic to escape Britain, from the number one bestseller and master of the historical thriller, Ken Follett. The Eve of War Britain has just declared war against Nazi Germany. In Southampton, the world's most luxurious airliner, the Pan American Clipper, takes off on its final flight to neutral New York – a haven for those fleeing the conflict. A Disparate Group Flees The passengers aboard the plane each have their own reasons for leaving Britain. Amongst them are an English aristocrat fleeing with his family and a fortune in jewels; a German scientist running away from the Nazis; a murderer returning under FBI escort; a wife escaping her controlling husband; and a devious thief determined to keep his spoils. A Journey into Danger Trapped on the plane, with only their fellow passengers for company, their journey over the Atlantic becomes increasingly fraught. Especially when it becomes apparent a plot is unfolding that may endanger all of their lives . . .

Seaplane Safety Harold G. Crowley, 1946

Ferry Pilot Kerry McCauley, 2022-06-16 Kerry McCauley has the job most pilots only dream of; delivering small used aircraft to locations around the world. In his 30 years an international ferry pilot, Kerry has delivered almost every kind of airplane you can name to almost every location you can think of. In his long career Kerry battled fuel system malfunctions over the Atlantic, a total electrical failure at night over the Sahara, getting lost over Africa and being struck by lightning off the coast of Portugal. Kerry's almost insatiable, reckless quest for danger and adventure also led to putting international smuggler and bank robber on his resume. Kerry found the answer to the question what could possibly go wrong? time and time again. But his skill, ingenuity and luck were what allowed him to survive the countless mishaps, catastrophes and close calls including a nearly fatal plane crash.

While Ferry Pilot is an account of one man's crazy thirst for thrills and adventure, his coming to grips with the dangerous nature of his career and just how much he wants to test the depth of his luck bag. It's also a portrait of the perseverance and bravery of a devoted family man who lost many close friends and his first wife to the dangerous skies.

The Airliner Cabin Environment and the Health of Passengers and Crew National Research Council, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on Air Quality in Passenger Cabins of Commercial Aircraft, 2002-02-03 Although poor air quality is probably not the hazard that is foremost in peoples' minds as they board planes, it has been a concern for years. Passengers have complained about dry eyes, sore throat, dizziness, headaches, and other symptoms. Flight attendants have repeatedly raised questions about the safety of the air that they breathe. The Airliner Cabin Environment and the Health of Passengers and Crew examines in detail the aircraft environmental control systems, the sources of chemical and biological contaminants in aircraft cabins, and the toxicity and health effects associated with these contaminants. The book provides some recommendations for potential approaches for improving cabin air quality and a surveillance and research program.

Sea Flight Hugh Popham, 2010-02-15 Hugh Popham joined the Fleet Air Arm in the summer of 1940 and was soon in training as a pilot at HMS Vincent and then Yeovilton; thereafter his wartime career as a naval pilot took him to the far corners of the world, notably to the Indian Ocean where he had to contend

against the Japanese. His story is one of a naval fighter pilot having to do his best with hopelessly inadequate planes. First the Sea Hurricanes, and then the Supermarine Seafires, proved to be less than brilliant machines, the Seafire proving far too fragile for the rigours of carrier operations. But it is this story, incorporating the kind of detail that is missing from many wartime memoirs, that makes this book so fascinating.

Flying Blind Kenneth L. Chastain Jr., 2011-02-11 *Flying Blind* is a novel of one man's hazardous journey in South Asia during the Second World War. Flight Officer-Service Pilot Roger Caron joined the army air force even though he was too old to be drafted. He simply couldn't pass up the opportunity to fly military aircraft. Like many men his age, he became hooked on aviation by Charles Lindbergh's 1927 solo transatlantic flight. Caron started out flying gliders and pulling weeds for flying lessons. He learned all he could about repairing and piloting airplanes—it was the focus of his life. Through a flying buddy, he met a young girl who worked her way into his heart. She had some health issues and was very young, only sixteen, but they ended up getting married anyway. His passion for aviation often kept them apart while he traveled from place to place, advancing his career. So after he joined the army air force and was sent to war in China, Burma, and India, the separation was just another of many. It was made bearable for Caron because he would be flying—and flying was in his blood. After spending many months enduring the hazards of war, life back home reached across the seas and grabbed him. The story begins with his landing in Calcutta near the end of September 1944. His treacherous assignment was to fly army cargo planes over the towering Himalayas, referred to as the Hump. As a member of the Army Air Force Air Transport Command, he would be supplying war materials and troops to China in support of the Allied effort against the Japanese invaders. Unfortunately, aircraft of that era were poorly suited for the dangerous weather of the cloud-enshrouded mountains, made

worse by the region's lack of sophisticated navigational aids. An equally threatening hazard was the occasional, but lethal Japanese fighter out hunting for unarmed Allied transports. Caron would need skill, tenacity, and a healthy dose of luck to survive his coming ordeal. After a quick turnaround in Calcutta, he found himself a passenger on a C-47 transport on his way to his first duty station in Myitkyina, Burma. This remote outpost had just recently been retaken from the Japanese at great cost by General Stilwell's army. While landing in Myitkyina, Caron's plane was strafed by a Japanese Zero and crash-landed. He and the rest of those onboard survived the ordeal, but it was an ominous welcome to his first duty station in the China-Burma-India (CBI) Theater of Operations. On his first flight over the Hump, Caron was copilot on a war-weary olive drab C-47 piloted by one of his tent mates, Bill Lackey, whom he had first met in Myitkyina. Like Caron, Lackey was from Los Angeles, and they'd quickly become friends. Their volatile cargo was high-octane gasoline carried in fifty-five-gallon drums. On this passage through the towering mountains, ice formed on the wings, hailstones hammered the fuselage, and the plane lost altitude. When the crew was nearly ready to bail out, an updraft shot them up and over the dangerous peaks to safety. This trip foretold what most would be like—flying blind through the clouds, on instruments only. On what later became known as Black Friday, Caron and his crew experienced a harrowing ride over the Hump. Upon arrival in Kunming, China, the plane captain tried to delay the return flight to Burma because of the extreme weather and the multitude of maydays called in from other aircraft. Permission was denied, but they were able to stall until the Hump was declared closed. Many planes and crews were lost in the killer storm, and his tent mate and friend, Bill Lackey, was one of those missing. Caron's luck ran out following a promotion to plane captain. Sitting in the left-hand seat of the cockpit, he and his crew flew mules to China where, just before landing, one of the mules stuck its head

through a window. Despite concern of the effect on the plane's stability under minimum weather conditions, Caron successfully landed the plane. However, on the return leg of the

Flying Over the Waves M. L. Buchman, 2017-04-14 -a Night Stalkers 5E romance story- No one gets shot down during a training mission. Except Chief Warrant Officers Debbie Rosenthal and Silvan Exeter. Their Little Bird helicopter plummets toward the North Sea during a Force 9 severe gale. With no hope in sight, they must struggle together to survive Flying Over the Waves.

Tiger in the Sea Eric Lindner, 2021-05-14 September 1962: On a moonless night over the raging Atlantic Ocean, a thousand miles from land, the engines of Flying Tiger flight 923 to Germany burst into flames, one by one. Pilot John Murray didn't have long before the plane crashed headlong into the 20-foot waves at 120 mph. As the four flight attendants donned life vests, collected sharp objects, and explained how to brace for the ferocious impact, 68 passengers clung to their seats: elementary schoolchildren from Hawaii, a teenage newlywed from Germany, a disabled Normandy vet from Cape Cod, an immigrant from Mexico, and 30 recent graduates of the 82nd Airborne's Jump School. They all expected to die. Murray radioed out "Mayday" as he attempted to fly down through gale-force winds into the rough water, hoping the plane didn't break apart when it hit the sea. Only a handful of ships could pick up the distress call so far from land. The closest was a Swiss freighter 13 hours away. Dozens of other ships and planes from 9 countries abruptly changed course or scrambled from Canada, Iceland, Ireland, Scotland, and Cornwall, all racing to the rescue—but they would take hours, or days, to arrive. From the cockpit, the blackness of the Atlantic grew ever closer. Could Murray do what no pilot had ever done—"land" a commercial airliner at night in a violent sea without everyone dying? And if he did, would rescuers find any survivors before they drowned or died from hypothermia in the

icy water? The fate of Flying Tiger 923 riveted the world. Bulletins interrupted radio and TV programs. Headlines shouted off newspapers from London to LA. Frantic family members overwhelmed telephone switchboards. President Kennedy took a break from the brewing crises in Cuba and Mississippi to ask for hourly updates. *Tiger in the Sea* is a gripping tale of triumph, tragedy, unparalleled airmanship, and incredibly brave people from all walks of life. The author has pieced together the story—long hidden because of murky Cold War politics—through exhaustive research and reconstructed a true and inspiring tribute to the virtues of outside-the-box-thinking, teamwork, and hope.

Flucht Übers Meer - Flight Across the Sea Erik

Lindner, 2019-06 *Flucht übers Meer* - das ist ein stetes Ereignis in der Menschheitsgeschichte. Weltweit retten sich Menschen aufs Wasser, um in eine bessere Welt zu gelangen, seit Jahrtausenden schon. Sie lassen dabei ihre Habe und Angehörige zurück. Häufig riskieren sie ihr Leben. Ihre Motive sind akute Gefahr, wirtschaftliche Not, religiöse und ethnische Diskriminierung, Entkommen aus der Diktatur. Sie hoffen auf Freiheit und persönliches Glück. Viele kommen im Land ihrer Sehnsucht an und finden Hilfe und Raum zur Entfaltung. Doch Abertausende werden aufgehalten oder sterben gar auf See, sei es im Krieg oder im Frieden. Dramatische Ereignisse, große menschliche Leistungen und schreckliche Tragödien - all das ist mit der Flucht übers Meer verbunden. Die gegenwärtigen Fluchtbewegungen, übers Wasser und über Land, werden unsere Gesellschaft weiter in Atem halten. Wie begegnen wir dem Geschehen? Für welche Flüchtende hegen wir Empathie und welchen begegnen wir mit Distanz?

Kiss the Pilot Patrick Lennon, 2005 In 1912, Tony Jannus, a handsome 22 year-old pilot attempts to set a record for the longest flight over water, following the Missouri and Mississippi Rivers. Even though he suffers from an acute appendicitis, he

doggedly continues the record-breaking flight. Along the way to New Orleans, he meets attractive young women who fall in love with him and further complicate his life. Later, he becomes chief pilot of the first scheduled airline, operating between Tampa and St. Petersburg, Florida. The airline only operates during the tourist season and is highly successful. When the airline closes, Tony and his brother spend the summer flying exhibitions and passengers at Cedar Point on Lake Erie to raise money for an airplane manufacturing plant they intend to open in Baltimore. They build a quality airplane, but their business venture fails because they cannot compete with major airplane manufacturers such as the Wright Brothers and Glenn Curtiss. When they close the plant, Tony goes to work for Glenn Curtiss who sends him to Sevastopol, Russia to train the Czar's naval pilots how to fly seaplanes before the United States enters World War I. While training pilots for the Russian Navy, he is drawn into combat against German submarines, which are sinking Russian warships in the Black Sea. War tests his courage and changes his happy-go-lucky outlook on life. He returns to the United States and finds the woman he wants to marry, but the romance is stormy and they break off the relationship. He goes back to Russia to train pilots in a more advanced airplane. He is despondent in Russia until his former sweetheart writes him and says she loves him. They set a date to marry. Important aviation milestones in this historical novel actually happened. The author has embellished personal relationships and events.

Hero of the Air William F Trimble, 2010-05-15 This book focuses on the role of Glenn H. Curtiss in the origins of aviation in the United States Navy. A self-taught mechanic and inventor, Curtiss was a key figure in the development of the airplane during the early part of the century. His contributions are generally well known, among them a control system using the aileron instead of the Wrights' wing-warping, the first successful hydro-airplane and flying boat, among other developments. Curtiss's links to the

Navy came as result of advocates of aviation in the Navy, chief among them Captain Washington I. Chambers, who recognized that the navy had special requirements for airplanes and their operations, and for aviators and their training. In a partnership with the navy, Curtiss helped meet the special requirements of the service for aircraft, particularly those with the potential for operating with naval vessels at sea or in conducting long-distance flights over water. He also was instrumental in training the first naval aviators. Curtiss and the navy continued their collaboration through World War I, reaching a climax in 1919 with the first transatlantic flight by the famed Navy-Curtiss NC flying boats. The book addresses the broader implications of the Curtiss-Navy collaboration in the context of the long-standing trend of government-private cooperation in the introduction and development of new technologies. It also explores the interactive dynamics of weapons procurement and technological change within a large and entrenched bureaucracy and helps lay to rest the persistent myth that the navy resisted the introduction of aviation. The pioneering work of Curtiss and his close ties with Chambers and others helped the navy to define the role of aviation in the years up to and through World War I. The book will relies heavily on primary source materials from a variety of archival collections, including the Library of Congress, National Archives, National Air and Space Museum, and the Glenn H. Curtiss Museum.

Principles and Practice of Aviation Medicine Claus Curdt-Christiansen, 2009 With a prologue by Melchor J AntuA ano (Civil Aerospace Medical Institute, Oklahoma City, USA) The book provides an up-to-date overview of the history of aviation medicine and the development of medical requirements for licensing. Also the physiological foundation for flight, the physiology of the sensory organs, exposure to cosmic radiation, the preventative aspects of aviation medicine, the role of medical factors in accident investigation, and passenger health issues are

covered. The bulk of the book is the clinical part which contains several chapters and sub-chapters on clinical aviation medicine with detailed guidance, written by Medical Examiners for Medical Examiners, on how to examine aircrew and how to determine their fitness for flight, especially in cases where the medical requirements are not fully met. Focussing on cardiology, ophthalmology, otology, neurology, psychology and psychiatry, *Principles and Practice of Aviation Medicine* provides an in-depth discussion of many diseases and medical conditions, frequently encountered in aeromedical practice, with emphasis on how they relate to the demands of contemporary aviation, both with regard to airline pilots and private pilots. Throughout particular consideration is given to how and when flexibility can be applied to the medical certification. In addition, the book includes a chapter on the international medical requirements and other pertinent rules and regulations for medical certification set by the Joint Aviation Authorities (JAA) and the Federal Aviation Administration of the United States (FAA), as well as the latest revised medical standards and recommended practices of the International Civil Aviation Organization (ICAO).
