Champagne Football Mark Tighe,Paul Rowan,2020-09-17 THE NO.1 BESTSELLER! 'I read it in one sitting, it's a superb book' Eamon Dunphy, The Stand 'An astonishing exposé' Martin Ziegler, The Times Over the course of fifteen years, John Delaney ran the Football Association of Ireland as his own personal fiefdom. He had his critics, but his power was never seriously challenged until 2019, when Mark Tighe and Paul Rowan published a sequence of stories in the Sunday Times containing damaging revelations about his personal compensation and the parlous financial situation of the FAI. Delaney's reputation as a great financial manager was left in tatters. He resigned under pressure, and the FAI was left hoping for a massive bail-out from the Irish taxpayer. Champagne Football is a gripping, sometimes darkly hilarious and often enraging piece of reporting by the award-winning journalists who finally pulled back the curtain on the FAI's mismanagement. 'Excellent' Irish Sun 'A jaw-dropping story ... brilliant' Irish Times 'Essential reading' Irish Daily Star 'Astonishing ... Side-splittingly hilarious' Guardian 'A damning account' Sunday Independent 'An instant classic, one of the all-time great Irish sports books' Alan English 'Excellent ... includes staggering detail' Daily Mail 'A cracking read ... [An] incredible amount of jaw-dropping detail' Matt Cooper 'One of the most hotly-anticipated sport books of the year' Brendan O'Connor 'A masterpiece' Tommy Martin 'At last, the truth of his ruinous reign has been rigorously and painstakingly exposed' Irish Daily Mail 'An absolutely extraordinary book' Eoin McDevitt, Second Captains 'Remarkable. The desperate story of Irish football but also a book about how Ireland works. Outstanding' Dion Fanning

Intelligence of Apes and Other Rational Beings Duane M. Rumbaugh,David A. Washburn,2008-10-01 What is animal intelligence? In what ways is it similar to human intelligence? Many behavioral scientists have realized that animals can be rational, can think in abstract symbols, can understand and react to human speech, and can learn through observation as well as conditioning many of the more complicated skills of life. Now Duane Rumbaugh and David Washburn probe the mysteries of the animal mind even further, identifying an advanced level of animal behavior—emergents—that reflects animals' natural and active inclination to make sense of the world. Rumbaugh and Washburn unify all behavior into a framework they call Rational Behaviorism and present it as a new way to understand learning, intelligence, and rational behavior in both animals and humans. Drawing on years of research on issues of complex learning and intelligence in primates (notably rhesus monkeys, chimpanzees, and bonobos), Rumbaugh and Washburn provide delightful examples of animal ingenuity and persistence, showing that animals are capable of very creative solutions to novel challenges. The authors analyze learning processes and research methods, discuss the meaningful differences across the primate order, and point the way to further advances, enlivening theoretical material about primates with stories about their behavior and achievements.
