Global Warming and the Creator's Plan Jay A. Auxt, Dr. William M. Curtis, 2009 Droughts, floods, hurricanes, cyclones. We constantly hear of extreme weather conditions all over the world. We hear dire warnings like 'Flee Hurricane Ike or face certain death, officials warn.' To be politically correct we must assume that these are a direct result of global warming. However, is this true? Jay Auxt, *Global Warming and the Creator's Plan* God has a clear plan for this earth and its inhabitants. Although the media would have you believe the earth is doomed due to global warming, the truth is that the earth has always been warming very gradually and that the current warming is insignificant - especially considering the scope of God's ultimate plan for each and every one of us. Unlock the clues to this contemporary controversy by discovering: Old Testament Biblical references from the past Scientific data of the present Biblical prophecy for the future Contrary to secular media, this book clearly illustrates that the concept of man induced global warming is totally unfounded and that God alone is in control of our destiny. Learn to sift unsupported rumor and alarmist rhetoric from verifiable facts on this hot-button issue with *Global Warming and the Creator's Plan*.

The Global Findex Database 2017 Asli Demirguc-Kunt, Leora Klapper, Dorothe Singer, Saniya Ansar, 2018-04-19 In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.

From the American dream to the American nightmare Heinrich Anker,2024-04-16 Conflicts in Western societies have been on the rise, and not just since the financial crisis of 2008. This is generally explained in economic terms - with growing disparities in wealth and income. The left should benefit from this with its redistribution philosophy. However, the right is on the upswing, even though its neoliberalism is fueling social conflicts. How is that? Behind the economic tensions lies a deep crisis of meaning. The right is exploiting this by offering simplistic set pieces of meaning. With success, because people strive for nothing so much as meaning in their own lives. The example of the USA shows how neoliberalism destroys people and societies. Possible solutions also come from there.

ShakeCast Loren L. Turner,David Jay Wald,Kuo-wan Lin,2009 Following a major earthquake, one of Caltrans' most critical tasks is to assess the condition of all potentially impacted bridges and roadway corridors in the state highway system. Timely response is important to ensure public safety, guide emergency vehicle traffic, and re-establish critical lifeline routes. In the past, bridge inspection teams had difficulties setting priorities immediately following an earthquake, because they lacked

precise information about where the worst shaking and, most likely, the greatest damage had occurred. In 2005 Caltrans initiated a contract with the United States Geological Survey (USGS) to develop and implement a Caltrans-specific version of their ShakeCast system, a post-event software analysis tool that was anticipated to change the way Caltrans responds following a major earthquake. ShakeCast is a web-based application that automatically retrieves measured earthquake shaking data, analyzes it against individual bridge performance characteristics, and generates inspection prioritization emails and other web-based products for emergency responders within minutes of an event. Benefits have already been realized over the course of the test deployment phase. The ShakeCast system has proved to be a valuable tool for post-earthquake response for Caltrans during real events as well as for scenario planning exercises.
