Retooling for an Aging America Institute of Medicine,Board on Health Care Services,Committee on the Future Health Care Workforce for Older Americans,2008-09-27 As the first of the nation's 78 million baby boomers begin reaching age 65 in 2011, they will face a health care workforce that is too small and woefully unprepared to meet their specific health needs. *Retooling for an Aging America* calls for bold initiatives starting immediately to train all health care providers in the basics of geriatric care and to prepare family members and other informal caregivers, who currently receive little or no training in how to tend to their aging loved ones. The book also recommends that Medicare, Medicaid, and other health plans pay higher rates to boost recruitment and retention of geriatric specialists and

care aides. Educators and health professional groups can use Retooling for an Aging America to institute or increase formal education and training in geriatrics. Consumer groups can use the book to advocate for improving the care for older adults. Health care professional and occupational groups can use it to improve the quality of health care jobs.

Advancing Oral Health in America Institute of Medicine, Board on Health Care Services, Committee on an Oral Health Initiative, 2012-01-05 Though it is highly preventable, tooth decay is a common chronic disease both in the United States and worldwide. Evidence shows that decay and other oral diseases may be associated with adverse pregnancy outcomes, respiratory disease, cardiovascular disease, and diabetes. However, individuals and many health care professionals remain unaware of the risk factors and preventive approaches for many oral diseases. They do not fully appreciate how oral health affects overall health and well-being. In *Advancing Oral Health in America*, the Institute of Medicine (IOM) highlights the vital role that the Department of Health and Human Services (HHS) can play in improving oral health and oral health care in the United States. The IOM recommends that

HHS design an oral health initiative which has clearly articulated goals, is coordinated effectively, adequately funded and has high-level accountability. In addition, the IOM stresses three key areas needed for successfully maintaining oral health as a priority issue: strong leadership, sustained interest, and the involvement of multiple stakeholders from both the public and private sectors. Advancing Oral Health in America provides practical recommendations that the Department of Health and Human Services can use to improve oral health care in America. The report will serve as a vital resource for federal health agencies, health care professionals, policy makers, researchers, and public and private health organizations.

People Are Unappealing Sara Barron, 2009-03-10 Born the child of a homo and a hypochondriac (Okay, okay. Her dad's not really a homosexual. He just acts like it. Her mom, however, really is a hypochondriac), Sara Barron never stood a chance of being normal. At age eleven, she starts writing porn ("He humped me wildly with his wiener"). At twelve, she gets mistaken for a trannie. The pre-op sort, no less. By seventeen, she's featured on the Jerry Springer Show. And that's all before she hits

New York. *People Are Unappealing* tells the strange, funny, and sometimes filthy stories of Sara Barron's twisted suburban upbringing and deranged attempt at taking the Big Apple by storm—first as an actor (then a waiter), then a dancer (then a waiter), then a comic (then a waiter). It's there that she meets the ex-boyfriend turned street clown. The silk pajama-clad poet. The OCD Xanax addict who refuses to have sex wearing any fewer than three condoms. Barron has a knack for attracting the unattractive. *People Are Unappealing* is her wickedly funny look at the dark side of humanity.

Robboy's Pathology of the Female Reproductive Tract Stanley J. Robboy, 2009-01-01 Thoroughly revised and updated to bring you state-of-the-art assistance in diagnosing pathologies of the female reproductive tract. It covers more than 1100 common, rare, benign, and malignant lesions, and tackles the questions so often asked and not answered elsewhere. All entities are illustrated by well-chosen photographs of outstanding quality. The updated text provides the latest advances in immunohistochemistry, molecular biology, and cytogenetics, as well as the most current concepts, classification and staging systems for all diseases and disorders of the female genital tract. Road

maps at the beginning of each chapter help you navigate the book more quickly. Integrates histopathologic features with data from ancillary techniques such as immunohistochemistry and cytogenetics and discussions of the relevant clinical manifestations of gynecological diseases.

Testimonios: Stories of Latinx and Hispanic Mathematicians Pamela E. Harris, 2021-08-16

Testimonios brings together first-person narratives from the vibrant, diverse, and complex Latinx and Hispanic mathematical community. Starting with childhood and family, the authors recount their own individual stories, highlighting their upbringing, education, and career paths. Their particular stories, told in their own voices, from their own perspectives, give visibility to some of the experiences of Latinx/Hispanic mathematicians. Testimonios seeks to inspire the next generation of Latinx and Hispanic mathematicians by featuring the stories of people like them, holding a mirror up to our own community. It also aims to provide a window for mathematicians (and aspiring mathematicians) from all ethnicities, with the hope of inspiring a better understanding of the diversity of the mathematical community.

Health Financing in Indonesia, 2009-01-01 In 2004 the Indonesian government made a commitment to provide its entire population with health insurance coverage through a mandatory public health insurance scheme. It has moved boldly already provides coverage to an estimated 76.4 million poor and near poor, funded through the public budget. Nevertheless, over half the population still lacks health insurance coverage, and the full fiscal impacts of the government's program for the poor have not been fully assessed or felt. In addition, significant deficiencies in the efficiency and equity of the

current health system, unless addressed will exacerbate cost pressures and could preclude the effective implementation of universal coverage (UC) and the desired result of improvements in population health outcomes and financial protection. For Indonesia to achieve UC, systems' performance must be improved and key policy choices with respect to the configuration of the health financing system must be made. Indonesia's health system performs well with respect to some health outcomes and financial protection, but there is potential for significant improvement. High-level political decisions are necessary on key elements of the health financing reform package. The key transitional questions to get there include: [the benefits that can be afforded and their impacts on health outcomes and financial protection; [how the more than 50 percent of those currently without coverage will be insured; [how to pay medical care providers to assure access, efficiency, and quality; [developing a streamlined and efficient administrative structure; [how to address the current supply constraints to assure availability of promised services; [how to raise revenues to finance the system, including the program for the poor as well as currently uninsured groups that may require government

subsidization such as the more than 60 million informal sector workers, the 85 percent of workers in firms of less than five employees, and the 70 percent of the population living in rural areas.
