The TV Brand Builders Andy Bryant,Charlie Mawer,2016-04-03 The TV Brand Builders is the definitive account of how the biggest television networks, channels and programmes are created as brands, with rare privileged access to the marketing strategies and creative thinking behind culturally defining TV promos, digital and social media campaigns and design identities. Written by two leading practitioners responsible for work as famous as the BBC One hippos, the creation of a TV channel called Dave and the re-launch of Doctor Who, and featuring interviews with 50 leading industry experts from 8 countries, from HBO to ESPN, from DreamWorks to CANAL+, The TV Brand Builders combines practical advice and strategic insight with exclusive stories from the ratings front line. Online resources include a bonus chapter on TV channel design in a multi-screen world, plus a 'Student and Instructor's Manual' with chapter summaries.

The Media in Britain Jeremy Tunstall,1983 British newspapers -- The Times, The Guardian, Daily Telegraph, and Financial Times -- have long been considered among the best in the world, and the BBC has become the world's most venerated television and radio organization. In this book Jeremy Tunstall, author of The Media are American, surveys British media since 1945, including television, radio, films, newspapers, and magazines, with the purpose of studying how they operate and what the future holds for them. In the course of the book he discusses such issues as the relationship of politics to the media, media audiences, media biases, control of the media by conglomerates, and policies for the future.

140 All-Time Must-See Movies for Film Lovers Now Available On DVD John Howard Reid,2012-05-01 John Howard Reid's books are not only noted for the wealth of essential information he provides on each film he discusses, but for the insight and clarity of his reviews. Reid has been reviewing films professionally since 1955, and has contributed an enormous amount of material to newspapers and magazines in England, France, Australia and the USA. In the course of his work, Reid has come into contact with many famous stars and directors, and is often able to provide quotes and information that no other sources can duplicate. As a reviewer for one of Reid's previous books rightly pointed out, Nobody does it better than John Howard Reid. In fact, Reid often provides far more information than the titles of his books suggest. 140 All-Time Must-See Movies is a typical case. The book actually provides full details and reviews for 160 feature films plus brief comments on over 30 shorts.

User-Centered Interaction Design Patterns for Interactive Digital Television Applications Tibor Kunert,2009-06-12 Technology is meant to make life easier and to raise its quality. Our interaction with technology should be designed according to human needs instead of us being required to adapt to technology. Even so, technology may change quickly and people and their habits change slowly. With the aim of supporting user acceptance of iTV, the focus of this book is on the usability of iTV applications. A method for developing interaction design patterns especially for new technologies is presented for the first time. The main characteristics covered in this new approach are: systematic identification of recurrent design problems; usability as a quality criterion for design solutions; integration of designers into the pattern development process including identification of designers' needs, and iterative evaluation and optimisation of patterns to encourage designers to accept and use them; usability testing to identify proven design solutions and their trade-offs; presentation of specific design guidelines.

Holy Terror Eric S. Christianson,Christopher Partridge,2016-04-08 The authors of religious scriptures had little difficulty enhancing sacred narratives with the rhetoric of violence. The phenomenon continues in the habitual linkage of violence and religion in contemporary film, music and literature. 'Holy Terror' brings together scholars of religious studies, biblical studies, film studies and sociology to examine the social function of violence in popular discourse. The book questions how violent rhetoric shapes belief and values, how audience empathy with violent protagonists can be understood, and the significance of the association of violence with particular religious groups and ideas. A range of phenomena are analysed, including terrorism in Scripture, apocalyptic texts in film and violence in sport.

The New Book of Snobs D.J. Taylor,2016-10-20 'Hugely enjoyable' AN Wilson, Sunday Times 'Thoughtful, entertaining and enjoyable' Michael Gove, Book of the Week, The Times Inspired by William Makepeace Thackeray, the first great analyst of snobbery, and his trail-blazing The Book of Snobs (1848), D. J. Taylor brings us a field guide to the modern snob. Short of calling someone a racist or a paedophile, one of the worst charges you can lay at anybody's door in the early twenty-first century is to suggest that they happen to be a snob. But what constitutes snobbishness? Who are the snobs and where are they to be found? Are you a snob? Am I? What are the distinguishing marks? Snobbery is, in fact, one of the keys to contemporary British life, as vital to the backstreet family on benefits as the proprietor of the grandest stately home, and an essential element of their view of who of they are and what the world might be thought to owe them. The New Book of Snobs will take a marked interest in language, the vocabulary of snobbery - as exemplified in the 'U' and 'Non U' controversy of the 1950s - being a particular field in which the phenomenon consistently makes its presence felt, and alternate social analysis with sketches of groups and individuals on the Thackerayan principle. Prepare to meet the Political Snob, the City Snob, the Technology Snob, the Property Snob, the Rural Snob, the Literary Snob, the Working-class Snob, the Sporting Snob, the Popular Cultural Snob and the Food Snob.

The Business of Broadband International Engineering Consortium,2003 This report addresses issues related to delivering products and services over broadband, including the technical and business challenges of providing multimedia entertainment, video and other services on demand, interactive television, the wireless Web, videoconferencing, telemedicine, and more. The report also considers the current and potential markets for such applications, the business models providers that can adopt, and pricing and fee structures, while focusing on those applications and on the business models that will make them available and profitable.

Independent Television in Britain Jeremy Potter,2016-07-27 The ITV network was designed as a federation of companies, different in size and character, jointly and severally constructing programme schedules in which strands of entertainment were interwoven with news bulletins, drama with sport, feature films with documentaries, church services with broadcasting for schools. The purpose of this volume is to convey some impression of diversity by illustrating and illuminating the rich assortment of companies and programmes making up ITV's overall service to the public in the operation of a plural system on a single television channel during a peak period in British broadcasting.
