How Tobacco Smoke Causes Disease, 2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

Paratextualizing Games Benjamin Beil, Gundolf S. Freyermuth, Hanns Christian Schmidt, 2021-11-30 Gaming no longer only takes place as a ›closed interactive experience‹ in front of TV screens, but also as broadcast on streaming platforms or as cultural events in exhibition centers and e-sport arenas. The popularization of new technologies, forms of expression, and online services has had a considerable influence on the academic and journalistic discourse about games. This anthology examines which paratexts gaming cultures have produced - i.e., in which forms and formats and through which channels we talk (and write) about games - as well as the way in which paratexts influence the development of games. How is knowledge about games generated and shaped today and how do boundaries between (popular) criticism, journalism, and scholarship have started to blur? In short: How does the paratext change the text?

Who Did It First? Bob Leszczak, 2014-03-13 In *Who Did It First?: Great Pop Cover Songs and Their Original Artists*, the second volume in Bob Leszczak's exciting *Who Did It First?* series, readers explore the hidden history of the most famous, indeed legendary, pop songs and standards. As Leszczak points out, the version you purchased, swayed to, sang to, and grew up with is often not the first version recorded. Like wine and cheese, some tunes do get better with age, and behind each there is a story. Little-known facts and amusing anecdotes, often gathered through Leszczak's vast archive of personal interviews with the singers and songwriters, record producers and label owners, who wrote, sang, recorded, and distributed either the original first cut or one of its classic covers.
