But untangling them will challenge your mind, expand your knowledge, and develop your powers of deduction and reasoning. Success begins with a process of trial and error: examine the propositions, and logically test one against the other. Some will cancel each other out. Others point to additional information that helps you arrive at the correct answer. Give the six sections a shot: each one contains a different type of puzzle, starts with the simplest, and becomes increasingly intricate. Here's just a sample of what you'll find! By looking at the five statements, figure out in which subject Prince Tal excelled, and in which he did especially well: 1. If he excelled in chivalry, he did especially well in horsemanship. 2. If he excelled in horsemanship, he did especially well in fencing. 3. If he did especially well in horsemanship, he excelled in fencing. 4. If he excelled in fencing, he did especially well in chivalry. 5. If he did especially well in chivalry, he excelled in horsemanship. The answer is number two. Devious Deductions David Popey,2006 In spite of the fact that logic puzzles are based on words and ideas, there is an amazing variety to be found. There are fascinating number puzzles, too. Indeed, numbers themselves are puzzles: There are ten digits and twenty-six letters, but the variety of words is finite while numbers are infinite. Words and numbers are both handled by the left hemisphere of the human brain and processed in the same way, regardless of their seeming differences. Thus traditional formats for word-based puzzles, such as crosswords and word searches, also get their own numeric treatments.
