Lightspeed John C. H. Spence, 2019-10-14 This is the human story and adventures of the great scientists who measured the speed of light -- which takes eight minutes to get here from the sun, so that when we look at the stars we are looking back in time. The book narrates how, since the ancient Greeks, scientists from Faraday, Maxwell, Fizeau and Michelson struggled to understand how light can travel through the vacuum of outer space, unless it is filled with a ghostly invisible vortex Aether foam. The reader moves from Galileo's observations of the eclipses of Jupiter's moon for navigation, to Einstein's theories and his equation $E = mc^2$, and all the quantum weirdness which followed. Space probes, the Transit of Venus expeditions, the discovery of radio, optics and satellite navigation, and the amazing scientific instruments built to detect the Aether wind are described.

Lightspeed E. Douglas Ward, Lonie Blackman Ward, 2007-04 Lightspeed is a continuous saga of one family's search through the centuries to find the secret of light--enabling man to travel in space throughout earth's solar system and the vast galaxies in the universe.

Lightspeed Magazine, September 2018 Lightspeed Magazine, John Adams, Carrie Vaughn, Ken Liu, Sofia Samatar, Charles Yu, Seanan McGuire, Maria Headley, Sam Miller, Charlie Anders, Theodora Goss, Adam-Troy Castro, A. Merc Rustad, 2018-09 In the pages of Lightspeed Magazine, you will find the finest science fiction: from near-future, sociological soft SF, to far-future, star-spanning hard SF-and fantasy: from epic fantasy, sword-and-sorcery, and contemporary urban tales, to magical realism, science-fantasy, and folktales. Issue #1 was launched in June 2010, and now eight years later, we've reached a milestone: Issue 100. To celebrate, we decided to publish a super-sized issue, with ten original stories-more than twice the amount of original fiction than usual-plus ten reprints and some special nonfiction to boot. And to make things even more commemorative, the vast majority of our fiction in this issue, both original and reprint, comes from our most frequently published fiction contributors-the Lightspeediest writers to ever Lightspeed. It's a distillation of what we're made of, and we're beyond excited to share it with all of you. Featuring work by Vylar Kaftan, Carrie Vaughn, Adam-Troy Castro, A. Merc Rustad, Ken Liu, Sofia Samatar, Charles Yu, Caroline M. Yoachim, An Owomoyela, Seanan McGuire, David Barr Kirtley, Genevieve Valentine, Cadwell Turnbull, Yoon Ha Lee, Maria Dahvana Headley, Sam J. Miller, Kat Howard, Theodora Goss, Charlie Jane Anders, Jeremiah Tolbert, and more.

Lightspeed John C. H. Spence, 2019-10-14 This book tells the human story of one of man's greatest intellectual adventures - how it came to be understood that light travels at a finite speed, so that when we look up at the stars, we are looking back in time. And how the search for a God-given absolute frame of reference in the universe led most improbably to Einstein's most famous equation $E=mc^2$, which represents the energy that powers the stars and nuclear weapons. From the ancient Greeks measuring the solar system, to the theory of relativity and satellite navigation, the book takes the reader on a gripping historical journey. We learn how Galileo discovered the moons of Jupiter and used their eclipses as a global clock, allowing travellers to find their Longitude. And how Ole Roemer, noticing that the eclipses were a little late, used this to obtain the first measurement of the speed of light, which takes eight minutes to get to us from the sun. We move from the international collaborations to observe the Transits of Venus, including Cook's voyage to Australia, to the achievements of Young and Fresnel, whose discoveries eventually taught us that light travels as a wave but arrives as a particle, and all the quantum weirdness which follows. In the nineteenth century, we find Faraday and Maxwell, struggling to understand how light can propagate through the vacuum of space unless it is filled with a ghostly vortex Aether foam. We follow the brilliantly gifted experimentalists Hertz, discoverer of radio, Michelson with his search for the Aether wind, and Foucault and Fizeau with their spinning mirrors and lightbeams across the

rooftops of Paris. Messaging faster than light using quantum entanglement, and the reality of the quantum world, conclude this saga.

LightSpeed Pioneers Charlotte Hathaway, 2018-09-29 Throttle to LightSpeed! In a future golden age of space exploration, the LightSpeed Pioneers is the premiere training program of the solar system's teenage astronauts-to-be, who match their wits and wills as they ready for voyages to other worlds. Simulated dangers become all too real, however, after a crash landing on Mars strands Centauri Squad on the wrong side of the planet, where they'll have to think fast-- and use their science know how-- to survive the red planet's ever-mounting dangers.

The Misadventures of M.A.D.S. - Lightspeed CRAIG. WAID, Craig Waid, 2006-08 The Misadventures of M.A.D.S. - Lightspeed. The trilogy concludes as M.A.D.S. and their Atlantian friends race towards Kartravia to rescue the Professor from the evil Kron. Kron has plans to rule the galaxy. And now with the Emerald Eye in his possession, it is up to M.A.D.S. and a small band of friends to save the Professor, recapture the Emerald Eye, and stop Kron from his quest of galaxy domination. Young adult science fiction / adventure. Fun for all ages.

Lightspeed Frontier Adam Corres, 2016-11-21 Lightspeed Frontier: Kicking the Future is a comedy science fiction novel by Adam Corres, unlike anything else ever written in the genre. It is a book of intensive imagination, idea-fuelled wit, fascinating scientific thought, occasional parody and there are lines in here you can't help quoting. This novel has been released alongside Lightspeed Frontier the video game, by Vid Rijavec and Philip Devine, developed at Crowdwork Studios and published by Riveted Games.

Lightspeed Magazine, June 2015 (Queers Destroy Science Fiction Special Issue) Lightspeed Magazine, Seanan McGuire, Chaz Brenchley, John Chu, 2015-05-10 Even in science fiction, supposedly the genre of limitless possibility, where everyone is invited to the adventure, heterosexual, heteroromantic, and cisgendered are considered the default, to the extent that everything else is deviation, and must be eyed with suspicion. This issue contains 10 original science fiction short stories (selected by guest editor Seanan McGuire), including new stories by award-winning queer authors Amal El-Mohtar, and John Chu; 4 classic short story reprints and a novella reprint (selected by guest reprint editor Steve Berman); approx. 10,000 words of original flash fiction (selected by guest flash fiction editor Sigrid Ellis); 7 nonfiction articles (selected by guest nonfiction editor Mark Oshiro); approx. 30 personal essays about the experience reading and writing science fiction as a queer person (selected by managing editor Wendy N. Wagner); original artwork (selected by and featuring a cover by guest art director Elizabeth Leggett); and more!

Beyond the Hallowed Sky Ken MacLeod, 2023-03-21 Mathematician Lakshmi Nayak receives a letter from her future self about faster-than-light travel. The equations work, and the letter itself seems to prove the possibility will someday be realized. But her paper on the topic is fiercely criticized, and she's warned away by a sinister Alliance agent. After defecting to the Union, she gets an unexpected offer: "I can build your ship." Shipbuilder John Grant learns of a secret project, which unknown to the world has been traveling to the stars for decades: Black Horizon. Biologist Emma Hazeldene works for Black Horizon on an alien world, Apis, whose life has clearly come from Earth, investigating rock formations that are thought to be an alien, crystal-like intelligence. But refugees exiled to a hard life in the wilds of Apis already know more than the scientists have ever suspected. Everything changes when the rocks wake up, with dire results. As secrets emerge and rival powers seize advantage, three worlds are shaken to their foundations--and all involved have to fight for their lives, and their futures. Science fiction legend Ken MacLeod begins a new space opera trilogy by imagining humankind on the precipice of discovery--the invention of faster-than-light travel unlocks a universe of new possibilities, and new dangers.

Lightspeed to Babylon J. Y. Jones, 2015-03-15 Buck Morgan goes on mankind's

first interstellar journey, leaving behind a late twenty-first century world of progress and good stewardship, with both Christianity and the animal rights movements marginalized. He returns nine years older but 90 years later, and finds the animal rights movement in control through the ruling Antichrist. Conflict arises as Morgan seeks to help the resistance, in the process finding that events have placed mankind on the brink of the Apocalypse.

Speedlights & Speedlites Lou Jones, 2012-11-12 Canon Speedlites and Nikon Speedlights are small, off-camera flashguns that can provide big results - if you know how to use them properly. Acclaimed Boston photographers Lou Jones, Bob Keenan and Steve Ostrowski guide you through the technical and creative aspects of how to get the most out of these powerful tools in this indispensable guide, packed full of inspirational images and comprehensive diagrams of the lighting set ups used to capture them. They are significantly more advanced, lighter and considerably cheaper than a standard flashgun, and have many advantages. They are small (and cheap) enough that a number can be carried in your kit, and they can be used in combination, triggered wirelessly. They use through-the-lens (TTL) metering, which allows you to use the in-camera LCD and histograms to calculate the required power/direction, rather than having to use a light meter or trial and error. They use proprietary, dedicated technology (from Canon and Nikon) that means there are no compatibility issues. Getting the most out of them, however, remains a mystery - most photographers still just use their speedlights in the same way as a standard flash gun. This is where this book comes in.

Lightspeed Business J. Neil Weintraut, Christopher Barr, 2001-10-29 Leading experts get entrepreneurs and investors up to speed on high-growth business opportunities The rules of building a new business changed dramatically with the bursting of the dot com bubble. Yet despite the ups and downs of the stock market, the time has never been riper for entrepreneurs and investors. Most industry observers now agree that the next few years will see a dramatic growth of opportunities in wireless and broadband communications, consumer and enterprise marketing, health services, and banking, just to name a few e-business sectors. But, to succeed in this new environment, you have to play by new rules, and sources of expert advice and guidance are few and far between. Coauthored by one of today's most successful and visible entrepreneurs and venture capitalists, *Lightspeed Business* fills that information vacuum with no-nonsense advice and practical wisdom. With hard-hitting analysis, invaluable insights, and war stories gleaned from an unparalleled tenure in the trenches, the authors deliver proven money-making ideas, present new rules on how to start, finance, and invest in a successful startup, and explain why conventional business strategies are doomed to failure in this new business environment. *Lightspeed Business* provides everything investors need to know to recognize a big opportunity and quickly build a successful business. J. Neil Weintraut (Palo Alto, CA) is the founder and General Partner of 21st Century Internet Venture Partners. Christopher Barr (San Francisco, CA) was the founding Editor in Chief of CNET. Currently, he serves as Vice President and Editor at Large at CNET.

Compendium on Light Speed Travel James Essig, 2017-05-26 Some theoreticians contemplate and formulate the physics of tachyons, which are hypothetical particles, that would always travel faster than light but which could never slow down to the speed of light just as they anticipate sublight speed massive particles never being able to achieve light speed. So my theoretical work on the physics and kinematics of light-speed massive systems sets me apart from general trends in the theoretical field of relativistic astronautics. This book is a continuation of how and why we may be able to, at some future time, travel at the speed of light.
