The Routledge Companion to Italian Fascist Architecture Kay Bea Jones,Stephanie Pilat,2020-04-30 Today, nearly a century after the National Fascist Party came to power in Italy, questions about the built legacy of the regime provoke polemics among architects and scholars. Mussolini's government constructed thousands of new buildings across the Italian Peninsula and islands and in colonial territories. From hospitals, post offices and stadia to housing, summer camps, Fascist Party Headquarters, ceremonial spaces, roads, railways and bridges, the physical traces of the regime have a presence in nearly every Italian town. The Routledge Companion to Italian Fascist Architecture investigates what has become of the architectural and urban projects of Italian fascism, how sites have been transformed or adapted and what constitutes the meaning of these buildings and cities today. The essays include a rich array of new arguments by both senior and early career scholars from Italy and beyond. They examine the reception of fascist architecture through studies of destruction and adaptation, debates over reuse, artistic interventions and even routine daily practices, which may slowly alter collective understandings of such places. Paolo Portoghesi sheds light on the subject from his internal perspective, while Harald Bodenschatz situates Italy among

period totalitarian authorities and their symbols across Europe. Section editors frame, synthesize and moderate essays that explore fascism's afterlife; how the physical legacy of the regime has been altered and preserved and what it means now. This critical history of interpretations of fascist-era architecture and urban projects broadens our understanding of the relationships among politics, identity, memory and place. This companion will be of interest to students and scholars in a range of fields, including Italian history, architectural history, cultural studies, visual sociology, political science and art history.

Writing Architectural History Aggregate

Architectural History Collective, 2021-12-14 Over the past two decades, scholarship in architectural history has transformed, moving away from design studio pedagogy and postmodern historicism to draw instead from trends in critical theory focusing on gender, race, the environment, and more recently global history, connecting to revisionist trends in other fields. With examples across space and time—from medieval European coin trials and eighteenth-century Haitian revolutionary buildings to Weimar German construction firms and present-day African refugee camps—Writing Architectural History considers the impact of these shifting institutional landscapes and disciplinary positionings for architectural history. Contributors reveal how new methodological approaches have developed interdisciplinary research beyond the traditional boundaries of art history departments and architecture schools, and explore the challenges and opportunities presented by conventional and unorthodox forms of evidence and narrative, the tools used to write history.

Digital Modernism Heritage Lexicon Cristiana Bartolomei, Alfonso Ippolito, Simone Helena Tanoue Vizioli, 2021-08-11 The book investigates the theme of Modernism (1920-1960 and its epigones) as an integral part of tangible and intangible cultural heritage which contains the result of a whole range of disciplines whose aim is to identify, document and preserve the memory of the past and the value of the future. Including several chapters, it contains research results relating to cultural heritage, more specifically Modernism, and current digital technologies. This makes it possible to record and evaluate the changes that both undergo: the first one, from a material point of view, the second one from the research point of view, which integrates the traditional approach with an innovative one.

The purpose of the publication is to show the most recent studies on the modernist lexicon 100 years after its birth, moving through different fields of cultural heritage: from different forms of art to architecture, from design to engineering, from literature to history, representation and restoration. The book appeals to scholars and professionals who are involved in the process of understanding, reading and comprehension the transformation that the places have undergone within the period under examination. It will certainly foster the international exchange of knowledge that characterized Modernism

Rare Order and Rules in Chaos of Lottery

Outcomes Yury Goldyrev, 2019-09-03 Have you ever wanted to get anything for nothing? Have you ever noticed a temporary order inside the outcomes of absolutely accidental events? Are you among those who have ever tried to reveal an enigma? Well, join the community in that cause. This book is about my unique and, on the whole, victorious ways into the world of lotteries. Up to the summer of 2019 playing lotteries and collecting their prizes have always been more like my hobby than a kind of business because, limitedly, for 3 summer months can I be a lotto player and the rest of the time a successful English tutor, busy with numerous students. Once, on a 1985 spring day, I took part in a Pick 5 in 35 draw. A few months later I won my first 4 in 5 prize with a payout of RR. Today, with all my lotto background summarized in this book, I agree wholeheartedly with my Canadian friend Derek's opinion at the end of his June 22, 2019 email: "With each email I follow your fantastic progress in TOP 3,...the hunch Yury, you have to play the hunch. ...Yes, APS is strong like MOG if 'CHANCE' is out to play and if MOG confirms APS. Confirmation is what

I seek using MOG-APS and various strategies in GH. Use your inner talent, Yury. I've seen it for years, now bet on it. You are a strong player. Your MOG and my APS in KENO are fantastic player strategies no one else has." In 2005 Derek came across my "The Proven Lotto System" document on eBay and he turned out to be a KENO winner with his own APS lotto system.

Drawings from New York Collections. Vol. 1, The Italian Renaissance ,

Portraits Enrico Maria Dal Pozzolo,Miguel Falomir Faus,2018 This book accompanied the Lotto Lorenzo Portraits exhibition at the National Gallery (5 November 2018 - 10 February 2019). Celebrated as one of the greatest portraitists of the Italian Renaissance, Lorenzo Lotto uniquely portrayed a cross section of middle-class sitters, among them clerics, merchants and humanists. Lotto depicted men, women and children in compositions rich in symbolism and imbued with great psychological depth. The prominent addition of objects which hinted at the social status, interests, and aspirations of his subjects added meaning to each work. With the inclusion of documents that have survived from Lotto's own account books, this catalogue provides extraordinary insight into the artist's individualistic style and the people he portrayed.

Hooked Rugs Cynthia Fowler, 2017-07-05 Through a close look at the history of the modernist hooked rug, this book raises important questions about the broader history of American modernism in the first half of the twentieth century. Although hooked rugs are not generally associated with the avant-garde, this study demonstrates that they were a significant part of the artistic production of many artists engaged in modernist experimentation. Cynthia Fowler discusses the efforts of Ralph Pearson and of Zoltan and Rosa Hecht to establish modernist hooked rug industries in the 1920s, uncovering a previously undocumented history. The book includes a consideration of the rural workers used to create the modernist narrative of the hooked rug, as cottage industries were established throughout the rural Northeast and South to serve the ever increasing demand for hooked rugs by urban consumers. Fowler closely examines institutional enterprises that highlighted and engaged the modernist hooked rugs, such as key exhibitions at the Museum of Modern Art and the Metropolitan Museum of Art in the 1930s and '40s. This study reveals the fluidity of boundaries among art, craft and design, and the profound efforts of a devoted group of modernists to introduce the general public to the value of modern art.
