Digital Media Labs in Libraries Amanda L.

Goodman, 2014-09-15 Families share stories with each other and veterans reconnect with their comrades, while teens edit music videos and then upload them to the web: all this and more can happen in the digital media lab (DML), a gathering of equipment with which people create digital content or convert content that is in analog formats. Enabling community members to create digital content was identified by The Edge Initiative, a national coalition of leading library and local government organizations, as a library technology benchmark. Surveying academic and public libraries in a variety of settings and sharing a range of approaches to creating DMLs, this issue of Library Technology Reports points the way towards meeting that benchmark, showing Funding sources and amounts for 16 DML projects in a range of libraries Links to sample policies and liability forms Information on hardware, software, and websites for sound production, videography, graphic design, and animation How to design a DML, addressing considerations such as power, noise prevention, ventilation, lighting, furniture, and more Configuration and equipment lists for 8 DMLs, ranging from portable to large libraries In-depth profiles of 5 digital media labs compiled from an 11-question survey

Recharge Your Library Programs with Pop Culture and Technology: Linda D. Behen, 2013-06-17 Learn how to integrate pop culture and technology into school library programs and classrooms, and make today's digital content, mobile devices, and students' changing interests work to the educator's advantage. Today's school libraries need to evolve and meet the needs of 21st-century students—the instruction, programming, and library services must be relevant to today's learners. Additionally, the interactions between educators and the students are what make the critical difference in the students' learning, and turn the library and classroom into places where they will find, assimilate,

experience, and understand information. This book provides practical strategies for using pop culture and technology trends to connect with easily distracted middle and high school students and hold their attention. Author Linda D. Behen addresses why school libraries are in transition and why there is a need for dramatic change. She discusses the evolution of all libraries in response to digital content; ubiquitous mobile devices such as smart phones, iPads, and other tablet computers; patrons' changing interests; and the ways in which schools and school libraries have found to effectively adapt to technology changes and student needs. This book is essential for middle and high school librarians and educators, library school students and instructors, and young adult public librarians.

Audio Recorders to Zucchini Seeds Mark Robison, Lindley Shedd, 2017-05-30 This exploration of the range of options for a library of things collection demonstrates what has been implemented successfully and offers practical insights regarding these nontraditional projects, from the development of concepts to the everyday realities of maintaining these collections. What services libraries provide and how they function in their communities is constantly being reconsidered and redefined. One example of this is the trend of experimenting with building

circulating collections of nonliterary things—such as tools, seeds, cooking equipment, bicycles, household machinery, and educational materials—by drawing on traditional library functions and strengths of acquisition, organization, and circulation. *Audio Recorders to Zucchini Seeds: Building a Library of Things* enables you to consider the feasibility of creating a specific type of thing collection in your library and get practical advice about the processes necessary to successfully launch and maintain it, from planning and funding to circulation, promotion, and upkeep. This contributed volume provides a survey of library of things projects within the United States, from both public and academic libraries, offering real-world lessons learned from these early experiments with nontraditional collections. The authors offer practical insights from their projects, from the development of their initial ideas to the everyday realities of maintaining and circulating these collections, including cataloging, space needs, safety concerns, staff training, circulation, marketing, and assessment. The contributed chapters are organized thematically, covering things collections that encompass a wide variety of objects first, followed by collections with a community-building focus (seeds, recreation, tools) and those that serve an educational purpose, such as curriculum centers, children's toys, or collections that support a university curriculum. The last section addresses collections that support media production.

Posing and Lighting Techniques for Studio Portrait

Photography J. J. Allen,2000 The analysis of the portraits in this book gives insight into how they were created and explains to studio photographers of all skill levels how to get the same great results. Carefully matching the pose to the subject of a photograph is a central lesson presented in this guide and ensures that the best portrait possible will be created to delight both client and photographer. Lighting setups and appropriate poses for head shots, three-quarter, and full-length portraits, as well as for specific body parts, are discussed at length. Works from the author's portfolio are shown and analyzed to reinforce each of the concepts presented.

Mastering Digital Flash Photography Chris George,2008

Electronic flash not only brings light to a photograph, it can be an important artistic tool--if you've acquired the knowledge to use it creatively. To master those skills, digital photographers need only turn to this complete reference. Packed with inspirational photos, it takes the mystery out of flash, covering every type of equipment and explaining such essentials as guide numbers, sync speeds, white balance, and more. Photographers will see how fill flash can decrease contrast and shadows in outdoor portrait photography, understand how to control the light using bounce and multiple flash techniques, and expertly employ high-speed and rear curtain synchronization to create impressive motion-blur images. Everything you need to know is here--including a section on studio flash and computer processing.

Inventive Life Mariam Fraser, Sarah Kember, Celia Lury, 2006-01-19 This book demonstrates how and why vitalism - the idea that life cannot be explained by the principles of mechanism - matters now. Vitalism resists closure and reductionism in the life sciences whilst simultaneously addressing the object of life itself. The aim of this collection is to consider the questions that vitalism makes it possible to ask: questions about the role and status of life across the sciences, social sciences and humanities and questions about contingency, indeterminacy, relationality and change. All have special importance now, as the concepts of complexity, artificial life and artificial intelligence, information theory and cybernetics become increasingly significant in more and more fields of activity.

Photographing Newborns , 2014-08-18 In this comprehensive book, Cooney touches on each facet of being a successful newborn portrait photographer. She begins by outlining the foundation of her business model and provides insight for the reader to establish something similar for their business. Defining your target market and ideal customer profile are essential to guiding your business in the right direction. Cooney focuses her business, and this book, on what she calls a 'boutique' brand. These are pricier photo shoots and packages, which require more time and care. Working with clients at this level often creates a lasting relationship and hopefully, repeat business. This is where

the branding of your business is so important. Not only can it deliver regular clients, but can also inspire important word-of-mouth references. Emphasizing how important it is for a photography studio to have structure and direction to become and remain successful, Cooney walks the reader through many scenarios that have helped form her business. A strong social media presence, creative marketing & promotions and repeat customers are the key to standing apart from the competition, therefor remaining vital.
