We can choose to learn how to become conscious creators.There is a law operating in the universe that is SO amazing in its potential that we could be surprised to discover we are using it every day without even realising it (although often in the wrong way, which is called creating unconsciously)!Here's how we manifest Millions by simply focusing on the lottery!?! In this case, you wish to win the lottery, but how much do you plan on winning? \$1,000? \$5,000? \$100,000? 1,000,000?Seems that many times, when a person first hears about or begins to understand the ideas behind the law of attraction and vibration based philosophies, they soon think of one thing. Winning the lottery through desire and law of attraction.Okay, so maybe not everyone thinks immediately of winning the lottery, but many do, and many may also believe in some scenario that creates a sudden financial windfall and/or success financially. What better way than the quickest and easiest of them all? The lottery. Financial freedom is a universal desire that nearly everyone dreams about.The trouble with using the law of attraction to manifest winning the lottery is that a lot of us have a hard time truly believing in the possibility. We think thoughts that make us question ourselves and put doubt in our minds. Do you truly believe you can and/or will win the lottery? Mathematics of Keno and Lotteries Mark Bollman,2018-04-17 Mathematics of Keno and Lotteries is an elementary treatment of the mathematics, primarily probability and simple combinatorics, involved in lotteries and keno. Keno has a long history as a high-advantage, high-payoff casino game, and state lottery games such as Powerball are mathematically similar. MKL also considers such lottery games as passive tickets, daily number drawings, and specialized games offered around the world. In addition, there is a section on financial mathematics that explains the connection between lump-sum lottery prizes (as with Powerball) and their multi-year annuity options. So-called winning systems

for keno and lotteries are examined mathematically and their flaws identified.
