Roles of Cymatics & Sound Therapy in Spirituality & Consciousness Victor Christianto,Kasan Susilo,Florentin Smarandache, Sound is one of the types of waves that can be felt by the sense of hearing. In physics, the definition of sound is something that is produced from objects that vibrate. Objects that produce sound are called sound sources. The sound source will vibrate the molecules into the air around it. Sound is mechanical compression or longitudinal waves that propagate through the medium. This medium or intermediate agent can be liquid, solid, gas.

Tuning the Human Biofield Eileen Day McKusick,2021-09-07 • Provides a precise map of the energetic biofield that surrounds the body, showing where specific emotions, memories, traumas, and pain are stored • Details how to locate stored trauma in the biofield with a tuning fork and clear it • Winner of the 2015 Nautilus Silver Award When Eileen McKusick began offering sound therapy in her massage practice she soon discovered she could use tuning forks to locate and hear disturbances in the energy field, or biofield, that surrounded each of her clients. Passing the tuning forks through these areas in the biofield not only corrected the distorted vibrational sounds she was hearing but also imparted consistent, predictable, and sometimes immediate relief from pain, anxiety, insomnia, migraines, depression, fibromyalgia, digestive disorders, and a host of other complaints. Now, more than 20 years later, McKusick has fully developed her sound healing method, which she calls Biofield Tuning, and created a map of the biofield, revealing the precise locations where specific emotions, memories, ailments, and traumas are stored. In this book, McKusick explains the basics of Biofield Tuning practice and provides illustrations of her Biofield Anatomy Map. She details how to use tuning forks to find and clear pain and trauma stored in the biofield and reveals how the traditional principles and locations of the chakras correspond directly with her biofield discoveries. Exploring the science behind Biofield Tuning, she examines scientific research on the

nature of sound and energy and explains how experiences of trauma produce “pathological oscillations” in the biofield, causing a breakdown of order, structure, and function in the body. Offering a revolutionary perspective on mind, energy, memory, and trauma, McKusick’s guide to Biofield Tuning provides new avenues of healing for energy workers, massage therapists, sound healers, and those looking to overcome chronic illness and release the traumas of their past.

Sound Healing with the Five Elements Daniel Perret, 2005 Sound created by singing bowls, drums, flutes, string instruments, and many others described in this book, can produce healing effects. Many music therapists and sound healers have been using this knowledge with success. Working with sound healing to harmonize body, soul, and spirit is more complex than just working with music or using sounds. Our consciousness is the key to lasting changes, and sounds can work as keyholes. The system of the five elements--earth, water, fire, air, and space?creates a comprehensive approach to using sound that integrates body zones, emotions, and thought patterns as well as the subtle anatomy, the energy fields of the human being. Perret learned how the use of the ancient wisdom of the five elements can produce a harmonic balance. In working with sound healing we need to find the right sounds for a person. An earth person may need some fiery sounds and instruments to get a step further, while an airy person may need more earth, or more grounding. This is a practical handbook for therapists and anyone else interested in sound healing.
