Family Names and Their Story Sabine Baring-Gould,1910 The source of surnames.

Forests and Chases of England and Wales C.1500 to C.1850 John Langton,Graham Jones,2005 Forests and chases were bounded areas where a legal regime separate from the Common Law protected royal and aristocratic hunting proveleges and commoners' rights. Their survival and their history after the Middle Ages is little recorded, yet forest law and customs continued into Victoria's reign, and some still do. In this volume, historians, geographers, ecologists, archaeologists and environmental managers investigate the survival of forests and how they may best be managed in today's world.

The Reign of Henry III D. A. Carpenter,1996-01-01 This volume discusses the long reign of Henry III (1216-1272). It examines subjects such as the whole nature of Henry IIIs personal rule, the immediate causes of the revolution of 1258, the rise of Simon de Montfort, and the explosive development of Engli

Select Pleas of the Forest England. Curia Regis,1901

The Royal Forests of Medieval England Charles R. Young,2015-10-28 The distinction between the

forest and the trees is fundamental to this study, for the royal forest of medieval England was a complex institution with legal, political, economic, and social significance. To protect the beasts of the forest and their habitat, initially for the king's hunting and later for economic exploitation, an elaborate organization of officials and courts administered a system of forest law that was unique to medieval England. The subject can first be studied in detail in the records and chronicles of the Angevin kings, which reflect the restless activity of Henry II and his growing corps of officials that led to the expansion of the area designated as royal forest. At its height in the thirteenth century, an estimated one-fourth of the land area of England and its riches came under the special jurisdiction of forest law. Barons whose holdings lay within the royal forest were restricted in their use of the land, and the activity of all who lived or traveled in the forest was circumscribed. Until the institution of new taxes overshadowed the economic importance of the forest and the king divested himself of large areas of forest in 1327, the extent of the royal forest, with its special jurisdiction, was often a source of conflict between king and barons and was a major political issue in the Magna Carta crisis of 1215. This is the first general history of the royal forest system from its beginning with the Norman Conquest to its decline in the later Middle Ages. The author pays special attention to the development of forest law alongside common law, and the interrelationship between the two types of law,

courts, and justices. The preservation of extensive unpublished records of the forest courts in the Public Record Office makes possible this intensive study of the legal and administrative aspects of the royal forest; chronicles and the records of the Exchequer, among other sources, shed light on the political and economic importance of the royal forests in medieval England. The author's ultimate objective is to show the influence of the royal forest upon the daily lives of contemporaries--both the barons who held land and the peasants who tilled land within the royal forests.

World Politics James N. Rosenau, Kenneth W. Thompson, Gavin Boyd, 1976

The History of the English People, 1000-1154
Henry (of Huntingdon), 2002 Henry of Huntingdon's narrative covers one of the most exciting and bloody periods in English history: the Norman Conquest and its aftermath. He tells of the decline of the Old English kingdom, the victory of the Normans at the Battle of Hastings, and the establishment of Norman rule. His accounts of the kings who reigned during his lifetime--William II, Henry I, and Stephen--contain unique descriptions of people and events. Henry tells how promiscuity, greed, treachery, and cruelty produced a series of disasters, rebellions, and wars. Interwoven with memorable and vivid battle-scenes are anecdotes of court life, the death and murder of nobles, and the first written record of Cnut and the waves and the death of Henry I from a surfeit of lampreys. Diana Greenway's translation of her definitive Latin text has been revised for this edition.

Negotiating the Landscape Ellen F.

Arnold, 2012-12-18 *Negotiating the Landscape* explores the question of how medieval religious identities were shaped and modified by interaction with the natural environment. Focusing on the Benedictine monastic community of Stavelot-Malmedy in the Ardennes, Ellen F. Arnold draws upon a rich archive of charters, property and tax records, correspondence, miracle collections, and saints' lives from the seventh to the mid-twelfth century to explore the contexts in which the monks' intense engagement with the natural world was generated and refined. Arnold argues for a broad cultural approach to medieval environmental history and a consideration of a medieval environmental imagination through which people perceived the nonhuman world and their own relation to it. Concerned to reassert medieval Christianity's vitality and variety, Arnold also seeks to oppose the historically influential view that the natural world was regarded in the premodern period as provided by God solely for human use and exploitation. The book argues that, rather than possessing a single unifying vision of nature, the monks drew on their ideas and experience to create and then manipulate a complex understanding of their environment. Viewing nature as both wild and domestic, they simultaneously acted out several roles, as stewards of the land and as economic agents exploiting natural resources. They saw the natural world of the Ardennes as a type of wilderness, a pastoral haven, and a source of human salvation, and actively incorporated these differing views of

nature into their own attempts to build their community, understand and establish their religious identity, and relate to others who shared their landscape.

The Formation of the English Common Law John Hudson, 2017-08-07 The Formation of English Common Law provides a comprehensive overview of the development of early English law, one of the classic subjects of medieval history. This much expanded second edition spans the centuries from King Alfred to Magna Carta, abandoning the traditional but restrictive break at the Norman Conquest. Within a strong interpretative framework, it also integrates legal developments with wider changes in the thought, society, and politics of the time. Rather than simply tracing elements of the common law back to their Anglo-

Saxon, Norman or other origins, John Hudson examines and analyses the emergence of the common law from the interaction of various elements that developed over time, such as the powerful royal government inherited from Anglo-Saxon England and land holding customs arising from the Norman Conquest. Containing a new chapter charting the Anglo-Saxon period, as well as a fully revised Further Reading section, this new edition is an authoritative yet highly accessible introduction to the formation of the English common law and is ideal for students of history and law.

New Forest Hadrian Cook, 2017 Inter-disciplinary study of the history of the New Forest, analysing the origins of the legal Royal Hunting Forest, the various legal systems of the Middle Ages that came to bear on the landscape how governance changes have shaped the appearance and management of the area.
